Integrating Customers into Industrial Product Innovation  
- Lessons from Extreme Programming

DISSERTATION
of the University of St. Gallen,  
Graduate School of Business Administration,  
Economics, Law and Social Sciences (HSG)  
to obtain the title of  
Doctor of Business Administration

submitted by  
Patricia Sandmeier  
from  
Seengen (Aargau)

Approved on the application of

Prof. Dr. Oliver Gassmann  
and  
Prof. Dr. Roman Boutellier

Dissertation no. 3241

Difo-Druck GmbH, Bamberg 2006

EXECUTIVE SUMMARY ........................................................................................................... I

INDEX ................................................................................................................................... III

CONTENTS .............................................................................................................................. IV

LIST OF FIGURES ................................................................................................................... VII

LIST OF TABLES ....................................................................................................................... IX

LIST OF ABBREVIATIONS ...................................................................................................... X

1 INTRODUCTION ................................................................................................................... 1

1.1 MOTIVATION AND RESEARCH GOAL ......................................................................... 1

1.1.1 Relevance of research subject .............................................................................. 1

1.1.2 Deficits in current research .................................................................................. 4

1.1.3 Research objective ................................................................................................. 7

1.2 RESEARCH CONCEPT ................................................................................................. 8

1.2.1 Research classification ......................................................................................... 8

1.2.2 Research methodology ......................................................................................... 9

1.3 THESIS STRUCTURE ...................................................................................................... 14

1.4 TERMS AND DEFINITIONS .......................................................................................... 15

1.4.1 Product innovation processes, new product development, and innovation front-end ........................................... 15

1.4.2 Customers, product users, and product buyers ...................................................... 17

2 CUSTOMER INTEGRATION INTO PRODUCT INNOVATION: STATE-OF-THE-ART IN RESEARCH ......................................................................................................................... 19

2.1 INSIGHTS ON CUSTOMER INTEGRATION FROM ORGANIZATIONAL LEARNING THEORY .......................................................... 21

2.2 LITERATURE ON THE PROCESS ORGANIZATION OF PRODUCT INNOVATION ........................................................................... 24

2.2.1 Sequential new product development ................................................................. 24

2.2.2 Experimental new product development ............................................................ 26

2.2.3 Success factors for new product development ..................................................... 30

2.2.4 Innovation front-end management ....................................................................... 31

2.3 LITERATURE ON THE STRUCTURAL ORGANIZATION OF CUSTOMER INTEGRATION ........................................................................... 34

2.3.1 Customer integration impact on product innovation ........................................... 34

2.3.2 Organizational prerequisites for customer integration ....................................... 37

2.3.3 The lead user concept and other customer integration methods .......................... 39

2.4 LITERATURE ON THE INCORPORATION OF CUSTOMER CONTRIBUTIONS INTO PRODUCT INNOVATION ......................................................... 45

2.4.1 Access to customer contributions ...................................................................... 45

2.4.2 Customer participation ....................................................................................... 50

2.5 OVERALL CONTRIBUTIONS AND LIMITATIONS OF THE EXISTING LITERATURE ......................................................................................... 53

3 REFERENCE FRAMEWORK DEVELOPMENT BASED ON EXTREME PROGRAMMING ........................................................................... 55

3.1 INTRODUCTION TO EXTREME PROGRAMMING ....................................................... 56

3.1.1 Extreme Programming and agile software development ..................................... 56

3.1.2 Extreme Programming process, practices, and planning .................................. 58

3.1.3 Extreme Programming strengths and weaknesses .............................................. 65

3.2 EXTREME PROGRAMMING ASSESSMENT FROM AN INDUSTRIAL PRODUCT INNOVATION PERSPECTIVE ......................................................... 70

3.2.1 Process organization of product innovation ....................................................... 70

3.2.2 Structural organization of customer integration ................................................ 74

3.2.3 Incorporation of customer contributions into product innovation .................... 78
| 6.2.2 | Process organization: toward a discretization of the product innovation process | 196 |
| 6.2.3 | Structural organization: toward customer-centered product innovation cells | 199 |
| 6.2.4 | Practices of XP-based product innovation | 203 |
| 6.3 | IMPLEMENTING XP-BASED PRODUCT INNOVATION | 211 |

### 7 CONCLUSION

| 7.1 | IMPLICATIONS FOR MANAGEMENT THEORY | 216 |
| 7.1.1 | Summary and contribution to research | 216 |
| 7.1.2 | Directions for further research | 220 |
| 7.2 | IMPLICATIONS FOR MANAGEMENT PRACTICE | 221 |
| 7.2.1 | Central statements and recommendations | 221 |
| 7.2.2 | Future directions and trends | 226 |
