Tables

2.1 Share of female employment in EPZs: selected countries, 2000–3 22
4.1 Structure of sample: country and years 62
4.2 Exports as a percentage of GDP 62
4.3 Manufacturing as a percentage of exports 63
4.4 Trends in the manufacturing–manufacturing NBTT and ITT of Southern sample relative to North, 1975–95 63
4.5 Export-weighted GWR in manufacturing for Southern sample 63
4.6 Export-weighted GWR in manufacturing for Northern sample 66
4.7 Women’s secondary educational attainment relative to men’s 66
4.8 Education-adjusted gender wage ratios (EGWR) 67
4.9 Change (%) in degree of discrimination against women in the South relative to North, 1975–95 67
4.10 Ratio of Southern to Northern output per worker (RELPROD) (1975–90) 68
4.11 Estimation results 69
4.A Variable Construction 73
6.1 Comparative static effects of increasing the women’s wage rate 97
6.2 Comparative dynamic results 104
7.1 Export composition and gender structure of the labor force in Bangladesh and Zambia 120
7.2 Female/male wage gap by educational level 120
7.3 Allocation of time between market and nonmarket activities 121
7.4 Educational and gender structure of SAM sectors, Bangladesh 122
7.5 Educational and gender structure of the SAM sectors, Zambia 123
7.6 Sectoral structure of Bangladesh and Zambia 124
7.7 Tariffs and openness 125
7.8 Values of substitution elasticities in the CES production function 126
7.9 Effects of tariff abolition on output 127
7.10 Effects of tariff abolition on employment and wages, Bangladesh 129
7.11 Effects of tariff abolition on employment and wages, Zambia 130
8.1 Characteristics of female-intensive and male-intensive industries 149
8.2 Variables and data sources 151
8.3 Means and standard deviations of variables 152
8.4 Determinants of women’s and men’s wages and the GWR in Taiwan’s manufacturing industry, 1984–93 154
9.1 Industry trade orientation classification 168
9.2 Employment by trade orientation 169
9.3 Worker ratios 170
9.4 Jobs for all workers 172
9.5 Job creation and destruction by skill and gender 174
9.6 Gender differences by trade orientation 176
9.7 Gender differences by plant entry and exit 177
9.8 Gender differences in job creation and destruction 178
10.1 Import penetration for manufacturing industries, 1970–95 186
10.2 Female percentage of manufacturing employment, 1975–97 189
10.3 Relative female intensity of employment, 1978–94 190
10.4 Employment effects from trade of manufactures: absolute numbers 193
10.5 Employment effects from trade of manufactures: relative to 1978–80 manufacturing employment (%) and measures of gender bias 194
10.6 Female percentage of manufacturing employment by industry 198
10.7 Correlation coefficients for female percentage of manufacturing employment in 22 industries 201
10.8 Employment effects from trade of manufactures: excluding textiles, apparel, leather, and leather goods relative to 1978–80 manufacturing employment (%) and measures of gender bias 202
10.9 Labor productivity and female percentage of employment in the textiles, apparel, leather, and leather goods industry 205
10.10 Trade deficits with non-OECD countries for the textiles, apparel, leather, and leather goods industry 206
10.11 Export and import propensities with non-OECD countries for the textiles, apparel, leather, and leather goods industry 207
10.A Industry classification and OECD data 212
11.1 Change in manufacturing employment by occupation, 1976–93 219
11.2 Female share in manufacturing employment by occupation, 1976–93 220
11.3 Distribution of women and men across occupations 1976–93 220
11.4 Regression results 224
11.5 Robustness checks 226
11.A Non Competitive/Competitive and import-impacted not import-impacted industries 229
11.B Variables and data sources 230
12.1 Code compliance by NIKE suppliers 249
13.1 Composition of Mercosur trade with EU (2002) 268
13.2 Values and shares of Mercosur trade with major trading partners 269
13.3 Gender equality indicators, Mercosur 1995–2004 269
13.4 Gender and trade indicators for Mercosur trade with EU 1995–2004 270
15.1 Female to male manufacturing ratios (%), selected countries 297
