Using tax incentives
to conserve and enhance
biodiversity in Europe

Clare Shine

Committee of experts for the development
of the Pan-European Ecological Network
(STRA-REP)

Nature and Environment, No 143
Council of Europe Publishing
I. Overview of conservation policy options
   A. Regulatory measures
   B. Non-regulatory measures: the growth of incentives
   C. Where do tax incentives fit in?
II. Tax incentives that directly support landholders
   A. Real property taxes
      1. Property transfer taxes (registration fees and stamp duty)
      2. Local land taxes (rates)
         a. Differential rates for conservation
         b. Revenue implications for local authorities
   B. Personal and general taxes
      1. Income tax
         a. Relief linked to land management practices
         b. Reliefs on donation of property interests (conservation easements)
      2. Wealth tax
      3. Value added tax on conservation-related expenditure
      4. Capital gains tax
      5. Inheritance tax (death duties)
      6. Intestacy
III. Tax frameworks that support the conservation sector
   A. Tax status of private conservation organisations
   B. Incentives for donations
   C. Initiatives to simplify giving
      1. Guidance and information
      2. Administrative procedures
      3. Transnational donations
D. Earmarking tax revenues for conservation ........................................ 30
E. Tax relief on environmentally friendly investment .............................. 32

IV. Practical indicators for designing tax incentives ................................ 32
   A. Objectives ......................................................................................... 32
   B. Quality assurance mechanisms ....................................................... 33
      1. Criteria for selection ................................................................ 33
      2. Valuation of donated land .............................................................. 34
      3. Organisations eligible to receive donations ................................. 35
      4. Sanctions and safeguards .............................................................. 36

V. Conclusion and recommendations ....................................................... 37
   A. Current constraints on biodiversity-friendly tax policy ..................... 38
   B. Opportunities identified .................................................................. 38
   C. Recommendations ............................................................................ 39

Appendix: Questionnaire circulated to Contracting Parties ....................... 42
