# Table of contents

Perspectives of quality management in modern agribusiness  
*Ludwig Theuvsen and Achim Spiller*  
13

**Invited speakers**

Economics of standard owners: competition as barrier to global harmonisation of food assurance systems  
*Kristian Møller*  
23

Façade and means of control: the use of ISO 9000 standards  
*Peter Walgenbach*  
29

**Firm's costs and benefits of quality management and quality assurance systems**

Firm's costs of traceability confronted with consumer requirements  
*Xavier Gellynck, Renata Januszewska, Wim Verbeke and Jacques Viaene*  
45

The effect of transaction costs associated with certification of exports on the profitability of farming systems for Chilean small farmers  
*Pablo Villalobos, Michel Leporati, Luis Saez and Carlos Padilla*  
57

Production costs of citrus growing in the Comunidad Valenciana (Spain): EurepGAP protocol versus standard production  
*Elena Maria Peris Moll and Juan Francisco Juliá Igual*  
69

The role of ISO standards in micro and small-scale food ingredient companies  
*Miriam Quintero Arellanes and Seamus O'Reilly*  
79

Company costs and benefits of organic processed food  
*Cristina Mora and Davide Menozzi*  
91

The effects of certification costs on the success of a PDO/PGI  
*Giovanni Belletti, Tunia Burgassi, Andrea Marescotti and Silvia Scaramuzzi*  
107

**Strategic, organisational and human resource management aspects of quality management**

Improving quality-related communication in food chains with Quality Function Deployment: the dairy industry  
*Martina Peupert and Ludwig Theuvsen*  
125

Failure Mode and Effect Analysis (FMEA) as a decision support tool within a quality information system in pork production chains  
*Andreas Gödderz, Thomas Schmitz, Adriane Mack and Brigitte Petersen*  
139

---

*Quality management in food chains*  
7
Quality assurance in agribusiness: evaluating ‘Qualität und Sicherheit’ and ‘QM Milch’ from a Total Quality Management perspective
Ludwig Theuvsen and Martina Peupert

Regional quality programs: relevance, objectives and strategies
Oliver Poignée and Gerhard Schiefer

Development of a process oriented management system based on a data bank: an approach to successfully fulfil quality requirements in food industry
Hartmut F. Binner and Christiane Jansen

Network management for dairy productivity and quality in Ethiopia
Marijke D'Haese, Gian-Nicola Francesconi and Ruerd Ruben

Organisational process alternatives for process simulation in agri-food processing and trade: the case of the grain chain
Thomas Hannus, Volker Jahn, Oliver Poignée and Gerhard Schiefer

Maintaining organic integrity: tackling fraud in organics
Jochen Neuendorff and Ulrich Fischer

Consumers' expectations of quality assurance and management systems

Food Quality signals and customer confusion: is there a relevance for the marketing of food products?
Rainer Kühl and Wiebke Schulz

Brands as quality signals in the meat market: lessons from the poultry sector
Maren Lüth and Achim Spiller

Food quality from a consumer's perspective
Maike Bruhn and Carola Grebitus

Perceived safety of organic and regional food from a perspective of uncertain consumers
Rainer Franz, Ulrich Enneking and Richard Balling

Consumers' view and awareness of genetically modified food
Antje Wirthgen and Anja Faße

Information releases concerning food scares and their impact on the aggregate demand: using artificial consumer societies
Volker Saggau

The importance of emotional quality as a buying pattern argument: results of a consumer survey
Silvia Zenner, Bernd Wirthgen and Marianne Altmann
Benchmarking and harmonisation methods and their effects on the effectiveness of quality assurance schemes

Conception of integrated models for quality management in production chains in the agri-food sector
*Stephanie Krieger and Gerhard Schiefer*

The organisation of private auditing systems and their limitations: a comparative analysis of the Eurep systems
*Armelle Mazé, Myriam Aït-Aïssa, Nathalie Verjux, Georges Carrotte, Caroline Hédouin and Aurélien Vaucelle*

Analysis of the compatibility of selected quality systems in agriculture and food production
*Bettina Rother*

**Farmers' perceptions and motivation on food safety and quality**

Enhancing the acceptance of quality systems by German farmers: the case of quality management and quality assurance
*Ulrich Enneking, Thomas Obersojer, Richard Balling, Marion Kratzmair and Anton Kreitmeir*

Controversial positions about the QS System in agriculture: an empirical study
*Gabriele Jahn and Achim Spiller*

Growers' perceptions about EurepGAP in developing countries: results of a survey carried out in Peru
*Angelo Lazo, Gabriele Jahn and Achim Spiller*

Dairy farmer's acceptance of a processor driven quality management system: a structural equation model
*Gabriele Jahn and Achim Spiller*

**Quality management: a supply chain perspective**

Comparison among quality assurance and management schemes regarding the ability to enhance suppliers-retailers relationships in Emilia-Romagna (Italy)
*Maurizio Canavari, Roberta Spadoni and Erika Pignatti*

Prevention of food scandals by means of contracts
*Alexander M. Hinrichs*

Globalisation, quality management and vertical coordination in food chains of transition countries
*Liesbeth Dries and Johan F.M. Swinnen*

The consequences of heterogeneous agents and moral hazard on food safety and trade
*Norbert Hirschauer and Oliver Mußhoff*
Supplier relationship management in the German dairy industry
Sabine Gerlach, Achim Spiller and Christian Wocken

Trust and e-commerce in the agrifood industry: configuration of a trust environment for e-commerce activities
Melanie Fritz, Tobias Hausen, Gerhard Schiefer and Maurizio Canavari

Actor organisation for QAS along agro supply-chains: the case of mycotoxins reduction in Southern Cone grains
Alejandra Engler, Guy Henry, Daniel H. Iglesias, Alexandre Florindo Alves, Gonzalo Gutiérrez and Elisabete Salay

Does food quality management create a competitive advantage?
Jon Hanf and Claus-Hennig Hanf
