GLOBALISATION OF WATER
OPPORTUNITIES AND THREATS OF VIRTUAL WATER TRADE
# Contents

Abstract vii

Chapter 1 Introduction 1
- Globalisation of trade 2
- Globalisation of water 3
- Efficient use of water resources 5
- Virtual water trade 6
- Saving water with trade of products 8
- Measuring water demand and scarcity 10
- Indicators of resource utilisation 11
- Local consumption global impact 13
- Objectives 14
- Structure of the dissertation 14

Chapter 2 Methodology 17
- Virtual water content 18
- Virtual water flows 30
- Water footprints 31
- Water scarcity, dependency and self sufficiency 33
- Water savings and losses 34

Chapter 3 The global component of freshwater demand and supply 35
- International virtual water flows 36
- Virtual water flows between world regions 37
- Dependence on external water resources 40
- Conclusion 42

Chapter 4 Saving water through global trade 45
- National water savings 48
- National water losses 51
- Global water savings 53
- Global blue water savings at the cost of green water losses 58
- Conclusion 59

Chapter 5 Water footprints of nations: water use by people as a function of their consumption pattern 61
- Water needs by product 63
- Water footprints of nations 66
- Conclusion 71

Chapter 6 Virtual versus real water transfers within China 73
- Virtual water flows within China 74
- Water footprint and water self-sufficiency by region 77
- Virtual water imports and exports in relation to water availability 78
- Conclusion 80
