Localised Technological Change
Towards the economics of complexity

Cristiano Antonelli
Contents

List of figures xv
List of tables xvii

1 Introduction 1

PART I
The ingredients 15

2 The dynamic legacies: Smith, Marx, Marshall and Schumpeter 17
1 Introduction 17
2 Adam Smith: the division of labour and the extent of the market 17
3 Alfred Marshall: variety and complementarity 22
4 Karl Marx and induced technological change 29
5 Joseph Schumpeter and the competitive innovation 38
6 Towards a full endogeneity of technological change 42
7 Conclusion 44

3 Localised technological change: a critical assessment 47
1 Introduction 47
2 The process 48
3 The basic ingredients 49
4 The multidimensional scope 57
5 Complex system dynamics and path dependence 60
6 Conclusion 62
PART II
The governance of localised technological knowledge

4 Information economics for the economics of localised technological knowledge
   1 Introduction 65
   2 Localised technological knowledge as an interactive and collective activity 69
   3 An information economics framework for the economics of localised technological knowledge 75
   4 Conclusion 83

5 Models of knowledge and systems of governance
   1 Introduction 84
   2 Knowledge as a quasi-public good 85
   3 Knowledge as a quasi-proprietary good 89
   4 Knowledge as a collective process 95
   5 The path-dependent complex dynamics of collective knowledge 103
   6 Conclusion: knowledge as a path-dependent emergent property 106

6 The new dimensions of knowledge indivisibility: fungibility, cumulability, compositeness and stickiness
   1 Introduction 108
   2 The unfolding of knowledge indivisibility 108
   3 Knowledge fungibility, cumulability and compositeness as a source of external increasing returns 111
   4 Multiple equilibria, instability and the governance of knowledge commons 116
   5 Conclusion 118

7 Knowledge and the theory of the firm: the interdependence among transaction, coordination and production
   1 Introduction 120
   2 Competing theories of the firm 121
   3 The interdependence between production, transaction and coordination 124
   4 Implications 130
   5 Conclusion 133
8 The localised generation and appropriation of technological knowledge 135
  1 Introduction 135
  2 The new economics of knowledge indivisibility and localised appropriability 136
  3 The emergence of the direction of technological change 140
  4 Implications for empirical analysis and technology policy 146
  5 Conclusion 148

9 To use or to sell technological knowledge 150
  1 Introduction 150
  2 Supply-side transaction costs 151
  3 A new knowledge trade-off: to use or to sell 154
  4 Implications for knowledge exploitation strategies 162
  5 Conclusion 164

10 The governance of localised knowledge in the business sector 167
  1 Introduction 167
  2 Hybrid forms of knowledge governance 167
  3 Types of knowledge and governance mechanisms 171
  4 Conclusion 191

11 The new economics of the university: a knowledge governance approach 193
  1 Introduction 193
  2 From open science to the academic management of creativity 194
  3 The comparative economics of agency costs: the university as an effective institution to solve principal–agent problems in creative work 198
  4 The professional university 201
  5 Conclusion and policy implications 211

12 Towards non-exclusive property rights: knowledge as an essential facility 215
  1 Introduction 215
  2 The knowledge trade-off reconsidered 215
  3 An essential facility: economies of density and mandated interconnection – from the economics of telecommunications to the economics of knowledge 220
  4 The liability rule as a mechanism for the governance of technological knowledge 223
Contents

5 Implications for knowledge governance 237
6 Conclusion 239

PART III
The introduction of localised technological change 243

13 Localised technological change: the benchmark 245
  1 Introduction 245
  2 The basic model with strong irreversibility 247
  3 The basic model with weak irreversibility 254
  4 Conclusion 259

14 The system dynamics of collective knowledge: from gradualism and saltationism to punctuated change 263
  1 Introduction 263
  2 Smooth vs discontinuous change 264
  3 The complex dynamics of collective knowledge: networking and spillovers 268
  4 The dynamics of collective knowledge and localised technological change: anecdotal evidence in Piedmont 277
  5 Conclusion 279

15 Factor markets: constraints and inducements to innovation 282
  1 Introduction 282
  2 The induced technological change approach 282
  3 Composition effects: the interaction between relative prices and the direction of technological change 283
  4 General and contingent technological change 285
  5 The inducement of general and contingent localised technological change 288
  6 Applications and implications 294
  7 Conclusion 299

16 Localised product innovation: the role of proximity in the Lancastrian product space 301
  1 Introduction 301
  2 Proximity and product innovation 301
  3 A Lancastrian model of localised product innovation 304
  4 Conclusion 313
17 Diffusion as a process of creative adoption
   1 Introduction 316
   2 Adoption and diffusion in the business sector 317
   3 The role of external knowledge and supply of new technologies 323
   4 Creative adoption and the diffusion of innovations 328
   5 Conclusion 331

18 Path dependence and the quest for complexity
   1 Introduction 333
   2 Path-dependent dynamics 337
   3 The engine of growth: collective knowledge, localised technological change and path dependence 346
   4 Conclusion 353

19 Conclusions: hysteresis and creativity
