Preface ............................... ii

1 A Survey .................................. 1

   1.1 Introduction ................................ 1
   1.2 Informational Asymmetry and Availability of Credit ........ 2
   1.3 Overcoming Informational Problems: Lender-Borrower Relationship ... 5
   1.4 Asymmetric Information and Market Power .................. 7
      1.4.1 The Effect of Lender Market Power in Credit Markets: Theory ... 8
      1.4.2 The Effect of Lender Market Power in Credit Markets: Evidence ... 10
      1.4.3 Bank Organizational Structure and Relationship Lending ........ 11
      1.4.4 Imperfect Information determining Market Structure: Theory ... 13
      and Empirical Evidence ......................................
      1.5 Conclusion ............................................. 15

2 Market Power and Availability of Credit .................. 16

   2.1 Introduction ......................................... 16

   2.2 Theoretical Motivation .................................. 19

   2.3 The Empirical Model .................................... 22
      2.3.1 Estimation Strategy ................................. 23

   2.4 Implementation and Results ................................ 26
      2.4.1 The Data ........................................... 26
      2.4.2 Measurement and Definition of Variables ................ 27
      2.4.3 The Specification .................................... 31
2.4.4 Results ...................................................... 33
2.5 Discussion .................................................... 36
   2.5.1 The Cross-Section Results ............................. 36
   2.5.2 The Time-Series Results ............................... 41
2.6 Conclusion ................................................ 43

3 Adverse Selection in Overdraft Loans ...................... 45
   3.1 Introduction ............................................. 45
   3.2 Theory .................................................. 47
      3.2.1 A Model of Adverse Selection in Overdraft Loans . 50
   3.3 Description of the Industry and Data .................. 54
   3.4 The Empirical Model .................................... 55
      3.4.1 The Stickiness Equation ............................ 55
      3.4.2 The Default Model .................................. 56
   3.5 Results and Discussion ................................ 58
      3.5.1 The Stickiness Equation ............................ 58
      3.5.2 The Default Equation ............................... 60
   3.6 Conclusion ............................................. 62

A A Formal Model ............................................. 64

B Chapter 2 Tables ........................................... 74

C Chapter 3 Tables ........................................... 92

D Chapter 3 Figures .......................................... 98

Bibliography ................................................ 101
