THREE ESSAYS ON ASSET PRICING ANOMALIES, INVESTOR OVERREACTION, AND MUTUAL FUND PERFORMANCE

A Dissertation
Presented to the Faculty of the Graduate School
of
Yale University
in Candidacy for the Degree of
Doctor of Philosophy

by
Hong Zhang

Dissertation Director: Matthew Spiegel

December, 2004
Contents

Acknowledgements 7

1 Dynamic Beta, Time-Varying Risk Premium, and Momentum 8

1.1 The Model of a One-Firm Economy ........................................ 14
  1.1.1 The Firm ........................................................................ 14
  1.1.2 The Investors ................................................................ 19
  1.1.3 The Equilibrium Asset Price and Return Process ............... 20

1.2 The Dynamic CAPM Model and Momentum .............................. 23
  1.2.1 Undiversified and Well-Diversified Investors ....................... 23
  1.2.2 Cross-Sectional Asset Pricing Models ................................. 24

1.3 The Existence of Momentum .................................................. 29

1.4 Model Discussion .................................................................. 36

1.5 Empirical Estimation of Momentum Profits ............................. 37
  1.5.1 A Time Series Model and the Kalman Filter ...................... 37
  1.5.2 Data Description and Momentum Portfolios ...................... 38
  1.5.3 Decomposition of Momentum Profits: 1965-1999 ................. 42
  1.5.4 Empirical Test of the Model Prediction: 1965-1999 ............ 47

1.6 Related Literature ................................................................... 51

1.7 Conclusion ........................................................................... 53

2 Can Rational Investors Overreact? 54

2.1 The Model ............................................................................ 59
  2.1.1 Cumulative uncertainty and Asset Allocation Problems ........ 59
  2.1.2 Equilibrium Prices and Relative Overreaction ................. 63
  2.1.3 Cumulative uncertainty for Dividend Payers ..................... 71

2.2 Model Predictions .................................................................. 75
  2.2.1 Bubbles and Excess Volatility ......................................... 75
### 2.2.2 Systematic Overreaction: New Predictions

2.2.3 Mimicking Portfolios of Overreaction

### 2.3 Empirical Analysis

2.3.1 Hypotheses Testing

2.3.2 Mimicking Portfolios

2.3.3 Robustness Check and Alternative Explanations

2.3.4 Closed-End Fund Discount

### 2.4 Conclusion

### 3 Estimating the Dynamics of Mutual Fund Alphas and Betas

3.1 Statistical Model

3.2 Problems with Constant Coefficient Models

3.3 Data Description and Model Estimation

3.4 Simulation Study

3.5 Fund Dynamics

3.6 Empirical Decomposition of Alphas and Betas

3.7 Performance of Trading Strategies

3.7.1 Tests using a Four Factor Model

3.8 Comparison with FS Model

3.9 Conclusion

### Appendix

Appendix A

Appendix B

Appendix C

Appendix D
