1. Introduction	1
2. Why are poor countries poor?	8
Most people live in poor countries	8
Explanations that ignore institutions are inadequate	12
Institutional explanations for underdevelopment	17
What are the institutions that support development?	19
3. Market-supportive institutions	24
How did market-supportive institutions emerge?	24
Why do countries fail to develop market-supportive institutions?	34
The challenge ahead	45
4. Can foreign aid promote development?	47
The foreign aid community is burgeoning	48
Aid has a poor track record in promoting growth or improving institutions	52
Why aid agencies are poor tools to promote institutional reforms	57
Aid in inhospitable institutional environments leads to pro forma reforms	63
A bias towards optimism	65
Can aid avoid the ill effects of damaging institutions?	68
New institutional economics is not good news for foreign aid	76
5. Can we measure institutions and institutional change?	79
How to be precise though vague	79
The democracy debate	83
Money for “good” institutions: the Millennium Challenge Account	87
The problems with aid agency ratings: the World Bank’s CPIA	92
How can we improve institutions if we can’t measure them?	98

6.	Institutions and the reform of urban water systems	100
	What economists generally agree about with respect to water and sanitation	101
	How water and sanitation systems usually operate in the real world	104
	What are the outcomes of water reforms?	108
	An institutional framework for studying water system reform	112
	Institutions at work: water and sanitation reform in Buenos Aires and Santiago	118
	Conclusion	136
7.	The role of scholars and scholarship in economic development	139
	Scholars and the European Enlightenment	141
	The marketplace for scholars in developed and underdeveloped countries	145
	When do scholars influence change in policies, paradigms, and institutions? Some hypotheses	150
	When do scholars influence change in policies, paradigms, and institutions? Case studies	155
	Conclusion	175
8.	Where do we go from here?	185
