| Part 2 | 15 |

| 3 Project A, Competitive woodworking industry – work design in the future (1992-1996) | 17 |

| 4 Summary 1. Use of Key Variables for Improving the Ergonomic Situation in a Company | 19 |
| Contextual framework for Paper 1 | 19 |
| Summary of Paper 1 | 20 |
| Background | 20 |
| Definition of key variables | 21 |
| The design of a key variable model | 21 |
| Experience from companies | 22 |
| Discussion in retrospect | 22 |

| Contextual framework for Paper 2 | 25 |
| Summary of Paper 2 | 26 |
Aim and approach ................................................................. 26
Results and discussion .......................................................... 27
Discussion in retrospect .......................................................... 29

Contextual framework for Paper 3 ........................................... 33
Summary of Paper 3 ............................................................... 33
  Background and aim ......................................................... 33
  Results and discussion ...................................................... 35
  Discussion in retrospect .................................................... 36

7 Summary 4. Change processes and ergonomic improvements in SMEs ............................................. 41
Contextual framework for Paper 4 ........................................... 41
Summary of Paper 4 ............................................................... 41
  Background and aim ......................................................... 41
  Method and results .......................................................... 42
  Vision-driven change ....................................................... 45
  Action-driven change ...................................................... 45
  The framework and ergonomics ........................................... 47
  Discussion in retrospect .................................................... 48

8 Project B, Change and planning ........................................... 51

9 Summary 5. SMECA – A methodology for organisational change in SMEs ............................................... 53
Contextual framework for Paper 5 ........................................... 53
Summary of Paper 5 ............................................................... 53
  Background and aim ......................................................... 53
  Change and SME ............................................................ 54
  Methodology considerations ............................................. 56
  Small and Medium-Sized Enterprise Change Analysis (SMECA) .................................................. 57
  Application of the methodology ......................................... 59
  Findings and results ......................................................... 60
  Discussion and conclusions .............................................. 61
  Discussion in retrospect .................................................... 61

10 Summary 6. Ergonomists, experts and participants in change; how do they relate? ............................... 65
Contextual framework for Paper 6 ........................................... 65
Summary of Paper 6 ............................................................... 66
  Background and aim ......................................................... 66
  Some differences between expert and participant ..................... 67
Discussion and conclusions .......................................................... 68
Discussion in retrospect ............................................................... 69

Part 3 .............................................................................................. 73

11 SME characteristics .................................................................. 75
  Definition of SME ........................................................................ 75
  Management of SME .................................................................... 76
  SME and change .......................................................................... 76
    Organisational change ............................................................... 77
    Technological change ................................................................ 80
  SME and ergonomics ................................................................... 81

12 Change in organisations ......................................................... 85
  Organisations as systems ............................................................ 85
    Socio-technical systems ............................................................ 87
  Organisational change theory ....................................................... 91
  Theories of changing .................................................................. 93
  Ergonomics and organisational change ........................................ 101
    Macroergonomics .................................................................... 102
  Participatory ergonomics ............................................................. 103
  Activity analysis ......................................................................... 105

13 Research approach and epistemological considerations 109
  The research approach ............................................................... 109
  Access and preunderstanding of the small firms ......................... 110
  Action research and action science in small firms ....................... 111
  A comment on the methods used ............................................... 114
    Interviews ............................................................................... 114
    Questionnaire ......................................................................... 115
    Observation ............................................................................ 116
  Document studies ....................................................................... 116
  The epistemological confusion in ergonomics ............................ 116
    Ergonomics and science ........................................................... 116
  Healthy and rewarding work or "Det goda arbetet" ....................... 117
    Health ................................................................................... 118
    Vision of the legislator on healthy and rewarding work ............. 120
  The character of the knowledge produced here ........................... 121

14 My contribution and future research ....................................... 123
  Practical relevance for small firms in the secondary woodworking
    industry .................................................................................. 123
  Theoretical relevance .................................................................. 125
15 Referenser

16 Appendices

1. Use of Key Variables for Improving the Ergonomic Situation in a Company
2. Working conditions and effects of ISO 9000 in six furniture-making companies – implementation and processes
3. Standardization- A Means for Creating Developing Work?
4. Change processes and ergonomic improvements in SMEs
5. SMECA – A method for organisational change in SMEs
6. Ergonomists, experts and participants in change; how do they relate?
7. List of other publications by Johan Karltn
