

# **The Global Environment, Natural Resources, and Economic Growth**

Alfred Greiner and Willi Semmler

**OXFORD**

UNIVERSITY PRESS

2008

# Contents

<b>Introduction</b>	<b>3</b>
<b>Part I The Environment and Economic Growth</b>	
<b>1 Introduction and Overview</b>	<b>7</b>
<b>2 The Basic Economic Model</b>	<b>10</b>
2.1 The Household Sector	10
2.2 The Productive Sector	11
2.3 The Government	12
2.4 Equilibrium Conditions and the Balanced Growth Path	13
<b>3 Growth and Welfare Effects of Fiscal Policy</b>	<b>17</b>
3.1 Growth Effects of Fiscal Policy on the BGP	17
3.2 Growth Effects on the Transition Path	22
3.3 Welfare Effects of Fiscal Policy on the BGP and the Social Optimum	26
3.3.1 Welfare Effects	26
3.3.2 The Social Optimum	28
<b>4 The Dynamics of the Model with Standard Preferences</b>	<b>31</b>
<b>5 Pollution as a Stock</b>	<b>39</b>
5.1 The Household Sector	39
5.2 The Productive Sector and the Stock of Pollution	40
5.3 The Government	41
5.4 Equilibrium Conditions and the Balanced Growth Path	41
5.5 The Dynamics of the Model	43
5.6 Effects of the Different Scenarios on the Balanced Growth Rate	47
<b>6 Concluding Remarks</b>	<b>51</b>

## **Part II Global Warming and Economic Growth**

<b>7</b>	<b>Introduction and Overview</b>	<b>55</b>
<b>8</b>	<b>Facts on GHG Emissions and the Change in Average Global Surface Temperature</b>	<b>60</b>
<b>9</b>	<b>A Descriptive Model of Endogenous Growth</b>	<b>63</b>
9.1	Structure of the Model	63
9.2	The Balanced Growth Path	65
9.3	Numerical Examples	68
<b>10</b>	<b>The AK Endogenous Growth Model</b>	<b>71</b>
10.1	The Second-Best Solution	72
10.2	The Social Optimum	75
10.3	A Multiregion World	77
10.3.1	The Noncooperative World	79
10.3.2	The Cooperative World	84
10.3.3	Equal Marginal Damages in All Regions	87
<b>11</b>	<b>A Model with Optimizing Agents</b>	<b>89</b>
11.1	The Competitive Economy	89
11.1.1	The Structure of the Economy	89
11.1.2	Analytical Results	92
11.2	The Social Optimum	100
11.3	Modeling Nonlinear Feedback Effects of the Rise in Temperature	107
11.3.1	The Competitive Economy	109
11.3.2	The Social Planner's Problem	116
<b>12</b>	<b>Concluding Remarks</b>	<b>120</b>

## **Part III Depletion of Resources and Economic Growth** **123**

<b>13</b>	<b>Introduction and Overview</b>	<b>125</b>
<b>14</b>	<b>Nonrenewable Resources</b>	<b>127</b>
14.1	Introduction	127
14.2	Economic Growth with Resource Constraints	128
14.2.1	A Basic Model	128
14.2.2	Technological Change	130
14.2.3	The Role of Backstop Technology	132

14.3	The Importance of Intergenerational Equity	133
14.3.1	The Amenity Value of Natural Resources	133
14.3.2	Resources and Intergenerational Equity	135
14.4	Assessment of the Finiteness of Resources	137
14.5	Assessment of Petroleum Reserves	140
14.6	Estimation of a Basic Model	142
	Appendix: Sketch of Solutions and Data Sources	145
<b>15</b>	<b>Renewable Resources</b>	<b>157</b>
15.1	Introduction	157
15.2	Renewable Resources and Optimal Growth	159
15.3	Open Access: Zero Horizon Optimization	166
15.3.1	Elasticity of Demand and Optimal Effort	166
15.3.2	Predator-Prey System	166
15.3.3	System of Competing Species	167
15.4	The Monopoly: Infinite Horizon Optimization	171
15.5	Concluding Remarks	175
	Appendix	177
<b>16</b>	<b>Regulation of Resources</b>	<b>180</b>
16.1	Introduction	180
16.2	The Model	182
16.3	Numerical Results for the Partial and Complete Model	184
16.4	Concluding Remarks	186
	Appendix	188
<b>17</b>	<b>Conclusion</b>	<b>190</b>
	<b>Appendix: Three Useful Theorems from Dynamic Optimization</b>	<b>194</b>
	<b>Bibliography</b>	<b>197</b>
	<b>Index</b>	<b>205</b>
