3 Basic annuities
3.1 Introduction, 73
3.2 Annuity-immediate, 74
3.3 Annuity-due, 79
3.4 Annuity values on any date, 83
3.5 Perpetuities, 86
3.6 Unknown time, 89
3.7 Unknown rate of interest, 93
3.8 Varying interest, 95
3.9 Annuities not involving compound interest, 98
Appendix 3, 106
Approximate formula for unknown rate of interest, 106
Exercises, 107

4 More general annuities
4.1 Introduction, 114
4.2 Differing payment and interest conversion periods, 114
4.3 Annuities payable less frequently than interest is convertible, 117
4.4 Annuities payable more frequently than interest is convertible, 121
4.5 Continuous annuities, 125
4.6 Payments varying in arithmetic progression, 127
4.7 Payments varying in geometric progression, 133
4.8 More general varying annuities, 137
4.9 Continuous varying annuities, 140
4.10 Summary of results, 142
Appendix 4, 143
Other formulas for annuities payable more frequently than interest is convertible, 143
Alternative approach for payments varying in arithmetic progression, 144
Exercises, 146

5 Amortization schedules and sinking funds
5.1 Introduction, 152
5.2 Finding the outstanding loan balance, 153
5.3 Amortization schedules, 156
5.4 Sinking funds, 164
5.5 Differing payment periods and interest conversion periods, 170
5.6 Varying series of payments, 172
5.7 Amortization with continuous payments, 178
5.8 Step-rate amounts of principal, 181
Exercises, 185

6 Bonds and other securities ................................................................. 194
6.1 Introduction, 194
6.2 Types of securities, 194
6.3 Price of a bond, 200
6.4 Premium and discount, 206
6.5 Valuation between coupon payment dates, 213
6.6 Determination of yield rates, 219
6.7 Callable and putable bonds, 222
6.8 Serial bonds, 226
6.9 Some generalizations, 228
6.10 Other securities, 231
6.11 Valuation of securities, 234
Appendix 6, 238

Exercises, 240

7 Yield rates .......................................................................................... 248
7.1 Introduction, 248
7.2 Discounted cash flow analysis, 249
7.3 Uniqueness of the yield rate, 255
7.4 Reinvestment rates, 258
7.5 Interest measurement of a fund, 264
7.6 Time-weighted rates of interest, 269
7.7 Portfolio methods and investment year methods, 274
7.8 Short sales, 277
7.9 Capital budgeting - basic techniques, 281
7.10 Capital budgeting - other techniques, 286
Appendix 7, 295

Exercises, 299
8 Practical applications ..................................................309
8.1 Introduction, 309
8.2 Truth in lending, 310
8.3 Automobile financing, 316
8.4 Real estate mortgages, 326
8.5 Approximate methods, 333
8.6 Depreciation methods, 344
8.7 Capitalized cost, 352
8.8 Modern financial instruments, 355
Exercises, 364

9 More advanced financial analysis .......................................373
9.1 Introduction, 373
9.2 An economic rationale for interest, 374
9.3 Determinants of the level of interest rates, 376
9.4 Recognition of inflation, 379
9.5 Consideration of expenses, 385
9.6 Effect of taxes, 391
9.7 Currency exchange rates, 397
9.8 Reflecting risk and uncertainty, 400
9.9 Interest rate assumptions, 408
Exercises, 411

10 The term structure of interest rates ..................................419
10.1 Introduction, 419
10.2 Yield curves, 420
10.3 Spot rates, 424
10.4 Relationship with bond yields, 426
10.5 Forward rates, 431
10.6 Arbitrage, 437
10.7 A continuous model, 440
Exercises, 444

11 Duration, convexity and immunization ...........................450
11.1 Introduction, 450
11.2 Duration, 451
11.3 Convexity, 458
11.4 Interest sensitive cash flows, 467
11.5 Analysis of portfolios, 470
11.6 Matching assets and liabilities, 476
11.7 Immunization, 480
11.8 Full immunization, 486
11.9 A more general model, 488
Appendix 11, 491
Further analysis of varying annuities, 491
Exercises, 492

12 Stochastic approaches to interest..........................................................................................500
12.1 Introduction, 500
12.2 Independent rates of interest, 501
12.3 The lognormal model, 509
12.4 Time series models, 515
12.5 Binomial lattices, 520
12.6 Continuous stochastic models, 527
12.7 Scenario testing, 535
12.8 More advanced models, 540
Appendix 12, 542
Derivation of the variance of annuity, 542
Exercises, 545

13 Options and other derivatives..................................................................................................551
13.1 Introduction, 551
13.2 Definitions and concepts, 552
13.3 Position and profit diagrams, 556
13.4 Determinants of option value, 559
13.5 Combination positions, 563
13.6 Binomial lattices, 566
13.7 Black-Scholes formula, 574
13.8 Some extensions, 576
Appendix 13, 579
Derivation of the Black-Scholes formula, 579
Exercises, 582
