Orient Academic Forum Special

Proceedings of

2006 International Conference on Management of Logistics and Supply Chain

September 20-22 2006
Chang Sha - Sydney

Organized by
- Orient Academic Forum, Australia
- Hunan Provincial Laboratory of Logistics Information and Simulation Technology P.R. China
- Beijing Zhongjing Shiji Investment Co., Ltd, P.R. China

Sponsored by
Blue Mountains Group Pty Ltd

Editor / Distributor:
Zhang Henry; Zhao Rui Mei; Chen Lisa; Zhang Han Jiang

Publisher: Orient Academic Forum

Oct 2006
Contents

Part One Logistic System Engineering

Logistics Strategy and Challenges for the Future in China
Shaoqiang YU, Hualong YANG ............................................................... 3
Research on the Government’s Policy of Urban Logistics Development
Liao Danfeng, Zhang Wensong ................................................................. 8
Regional Economy Growth Relate Its Logistic System Development
Xu Hongfan, Liu Duan, Chen Shou .......................................................... 14
Developing Third Party Logistics for Existing Transport Sector in
China – Necessary Choice of Synergizing Social Resources
Sun Yu Feng ........................................................................................... 19
Model of Logistics Field and Space Structure
TANG Yin-ying, PENG Qi-yuan ............................................................... 23
The Correlativity Analysis between Logistics Industry and National
Economy Development
Shuai Bin, Sun Chaoyuan ....................................................................... 30
The Explanation on Evolution of Logistics Industry Using
New Classical Economics
Sun Chaoyuan, Shuai Bin ....................................................................... 34
Regional Logistic Systems And Operation Mode Based On Industrial
Cluster
Sun Shusheng, Hai Feng ........................................................................ 39
Advancing Model for Knowledge Chain Management
Wuyi Zhang, Xiaxia Zhou ....................................................................... 45
Adaptive Logistics Combination Forecasting Model
Lu Yujin, Chen Hongming ....................................................................... 50
Optimize Logistic Distribution System Based on L-OD
MA Hong-sheng, ZHANG Jin ................................................................. 56
How Logistics Impact Competitiveness between Industry Clusters
Zhu Fuliang ............................................................................................. 61
Build SCM in Conjunction with Process Integration
Gu Suishan ............................................................................................. 67
The Discussion on Exploitation and Construction Mode of Logistics
Park in China
Part Two  Supply Chain Management and Application

Innovation on Retail Outlets and its Supply Chain in China
   JIANG Xiaohong, LIU Dan .....................................................89
Study on Core Competitiveness of Supply Chain Management
   GUAN Lixin, YU Manman ....................................................93
Research on Dynamic Character of Relationships Among
Supply Chain Partners
   JIANG Wenyang, YUAN Feng .............................................97
Study on Operational Model for Supply Chain Integrity
   LIU Xiaofeng, ZANG Hongyu .............................................101
Discussions on the Allied Chain-like Operation Pattern of Logistics
   SHU hui ........................................................................105
Research on the Operation Mode and Mechanism of the Integrated
Supply Chain Logistics
   HAI Feng, ZHANG Li-li .....................................................110
The Analysis on Collaborative Knowledge Creation in Supply chains
   LIU mingxia ..................................................................115
The Analysis of Protection About Infantile Strategic Industries
Based on Game Theory
   QIN Jianlan, ZHANG Chengke ..........................................121
Optimization of Extended Hub-and-spoke Regional Port Transportation
Networks with Interval Cost Parameters
   WANG Chuanxu ...............................................................127
Modeling the Shortest Delivery Lead-Time in Supply Chain
   GONG Dai-hua .................................................................134
A Case Study on the LRP Model Based on the Supply Chain
   ZHANG Yihua, ZHANG Lei .................................................139
Analysis of the Bargaining and Stability of Supply Chain
   PENG Hua-tao, XIE Ke-fan ...............................................145
Supply Chain Concept in Providing Education Training Program
REN Jin-zheng, CHEN Bao-feng ................................................................. 150
A Comparison and Game Analysis on the Formation of
Supply Chain Alliance
Wang Jing ............................................................................................... 155
The Optimal Structure and Performance in Two Supply Chains
with Different Stackelberg Leaders
Zhong Deqiang, Li Jinghong .................................................................. 159

Part Three Industry Organization Theory and Practice

Study on Practicing Green Supply Chain Management in China
Wang Ling .............................................................................................. 167
Refund System of EPR in the Management of WEEE
Wen - Xianming .................................................................................... 172
The Evolvement Mechanism of EIPs Based on GA Algorithm
QIN Sun-tao ............................................................................................ 178
Reconstruct Regional Logistic System with Appliance for
Integrated Economy
HOU Rui, ZHANG Bi-xi ........................................................................ 183
Analysis of Cooperative Enterprise Relationship in Supply
Chain Based on Evolutionary Game
MA Han-wu, GUO Pei-yao ................................................................. 188
Design of Cooperative Contract for Water Resources Supply Chain
in Face of Supply-Demand Risks
Dai Jun, Ji Chang-ming ........................................................................ 192
Research of the Green Logistics for Recycling Cell Phone
in Guangzhou
Yang Jianhui, Panhong ......................................................................... 202
The Construction and Implementation of Green Supply Chain
Management Model
PANG yan, WU Zheng-xin .................................................................... 206
Reverse Logistics System of Waste Electronic and Electric Equipment
ZHANG Han-jiang, Huang Hengwei ..................................................... 212
Research on the Measurement Model for Organizational
Learning Capability
Mao Jianjun, Cai weimin ...................................................................... 219
Part Four Logistic Information Engineering

Innovatively Developing Online Mail-delivery Business in China Post

*Fan Pengfei* ................................................................. 227

The Application of Geographic Information Systems in Logistics Management

*Lei Hao* ................................................................. 233

Present Situations and Corresponding Proposals of Logistics Information Standardization in China

*YU Weitian, XU Jian* .................................................. 238

A Supply Chain Management Framework Based on SOA

*Luo Duanhong* .......................................................... 243

New Trend of E-logistics

*ZHANG Weixi, WANG Jian-jun* ........................................ 249

A Network Designing Method for Closed-Loop Supply Chain

*Yao Weixin* .............................................................. 252

A Goal Programming Model for Supplier Selection

*Quan Zhang* .............................................................. 257

Collaborative Application of Digital Library with Assistance of Office Automation

*DENG Zhonghua, CHEN Mei* .......................................... 262

Optimization Analysis of Pull Supply Chain Scheduling Based on System’s Dynamic Idle Production Ability Constraint

*YAO Jian-ming, LIU Li-wen* ........................................... 268

The Research on Enterprise Resources Integration in E-Commerce

*Qu Fenggeng, Jiulingli* ............................................... 275

A Planning Model for Distribution Network Design Based on Fuzzy Multiobjective Lattice-order Decision

*Liu Yugang, Hao Guang* ............................................... 280

The System Model for Supply Chain Process Optimization

*Yan Jianyuan, Qin Fan* .................................................. 288

Study of Stock Customer Relationship Management Model Based on Data Mining

*HUANG Feixue, LI Zhijie* ............................................. 294

Game Analysis on Causes for Statistical Data Distortion
A Web Service Based Architecture for Third-party Logistics MIS

Peng Minjing

Information Technical Support System of Management of the Supply Chain

Yang Jing, Jiang Hua

A Performance Evaluation Model Based on DEA and Its Application

YE Yi-yong, XIAO Jian-hua

Fourth Party Logistics Information Platform Based on Virtual Data Warehouse and XML

Liu Changshi, Nie kai

Design an Integrated Information Model of Supply Chain Using RFID

Liu Kanying, Li Wei

Frameworks Convergence between XML-based B2B Standards

Yao Kao-hua, Liu Chang-chuan

On the Periods of Some Transformations Used in Digital Image Scrambling

Shaochuan Fu, Chengxian Xu

How Information Sharing Impact Pricing Power in Longitudinal Monopoly Market

Li Zhiwen, Luo Dingti

Part Five Transport Technology and Management

Arithmetic Model For Logistic Center Expansion

Luo Zhaohui, Dong Peng

How to Deploy Port Machines to Improve Handling Efficiency

He xiangyang, Zhang qingnian

Decision - Making Model for Commodity Transport Based on Making to Order

Shao Jungang, Shu Liangyou

Optimum Model and Arithmetic Analyzing of Multi-time Inventory and Transportation Based on VMI

Mu Neng-ye, Zhang Jin

The application of Genetic-tabu Algorithm To Vehicle Routing Problem with Time Window

Xu Xusong, Wei Zhongcheng
Research on the Relations of Railway Freight Transport and Modern Logistics

CHED Han-li, QIN Tao .................................................................388

A New Immune Genetic Algorithm for the Large Scale Ship Routing Problems

XIAONAN SUN, NA LI .................................................................395

Road Freight System in Coal Mine Supported with Information Technology

DAIHONG, ZHANG RUNTONG ..........................................................401

Solving the Large-Scale Vehicle Routing Problem by Location Based Heuristic & Genetic Algorithm

CAO ER-BAO, LAI MING-YONG ......................................................406

Study on an Improved Optimization Model of Logistics Distribution Vehicle Scheduling based on Stranger Problem

NIE KAI, LAI MING-YONG ..............................................................411

An Improved Genetic Algorithm for the Vehicle Routing Problem

YANG HONGLIN, YUAN JIJUN .........................................................418

Vehicle Routing Monitor and Navigation under Third Party Logistics

QU XIAOXIANG ............................................................................424

Part Six Market Requirement and Public Relation

Building Customer Complaint Ontology: Using OWL to Express Semantic Relations

YAN YALAN, ZHANG JINTONG .......................................................433

Strategies on Logistics Enterprises’ Customer Segmentation

WANG TAO, LI ZHIXIONG ............................................................438

Research on Risk Evaluation Method for Reservoir Flood Control

SHEN XIN-PING, YE ZEGANG .......................................................444

Study on Business Processes Re-engineering Based on Value Chain of Construction Enterprise

LIU JUN'E, LIU JINGYAN ...............................................................454

System Dynamics Modeling for Customer-Production-Sale in Supply Chain

ZHA XIANJIN, YAN MI .................................................................461

A Research on the Demand – Fulfillment Electronic Commerce Model in the Modern Electron Manufacturing Industry
The Analysis of the Affective Factors on the Management Mechanism of Supplier

Wang Hua Lin

On Logistic Marketing Strategy – Call Center Prevails Customer Service Center

Jiang Wei, Deng Xiaopeng

Analysis on the Influencing Factors of Logistics Managerial Patterns of Chinese Chain Retail Companies

Li Shuang-mei, Wu Zi-jun

On Retailer’s Order Policy – One Way Substitution against Quality Unreliable Commodities

Hui-feng Tao, Xu Chen

Study on Optimal Selection of Vendors based on Profit Maximization

LIU Xue-quan, LI Jun

An Empirical Study on the Effects of Win-back Strategy on Company Performances in China Market

Xiao-fei Tang, Ting-Jui Chou

Corrections to Some Theoretical Results of an EOQ Model

Xiaowei Wen, Min Pang

From Point Advantage to Group Advantages—the Succeeding Way of Wal-Mart

Zhu Aimin, Yu lijuan

Wholesale Price Contract under the Newsvendor Problem

Li Jinghong, Luo Dingti

Application of ERP in the Building Enterprise

Liu Jun’e, Liu Jingyan

Part Seven Financial Service

A Single Asian Currency: The Right Time for Asia Now?

Yang Ling, Yang Baojian

Research on the Logistics Mode of PB Products of Retail Enterprises

Zhang De-peng, Huang Xue-ling

The Study of International Factoring Business in the Process of Financing at the Front End of Supply Chain - Based on Chinese Small and Medium-sized Export Manufactures
Li Li, Geng Wei ................................................................. 544
Appliance of Activity - Based Costing Control to Evaluate
Third Party Logistics
Li Dongbing, Jian Lingxiang ........................................... 553
Pricing and Ordering Policies for Quality Unreliable Product
with One-way Substitution
Tian Zhiyu, Xu Chen ...................................................... 559
Application of Activity Based Costing to Logistics Cost
Miao Shujuan, Liu Xin ................................................... 565
Research on Cost Control of Designed Activity Ability in Third-Party
Logistics Enterprises
Yang Zan, Jian Lingxiang ................................................. 569
The Effect of Crime on Logistic Property Value and Logistic Property
Investment Analysis
Zhang Jianqing, Shen Minghui ..................................... 575
Research on Investment Management Ability of Mutual Security
Investment Funds
Zhang Shuhai ............................................................... 582
The Research on Logistics Cost Accounting and Management in China
Qi Dianwei ..................................................................... 591
Cointegration Analysis of Exchange Rate in Foreign Exchange Market
Wang Jian, Wang Shu-li .................................................. 595
Modern Logistics Financial Services Innovation—Finance Logistics
Yu Ping ........................................................................... 600
Pricing with Imperfect Quality Product in Two-Member Supply Chain
Zhigang Yuan, Xu Chen .................................................. 605
Reverse Logistics and the Forming of Circular Economy Hypercycle
Structure
Zhang Zeqiang, Cheng Wenming .................................... 612
An Empirical Study on the Closed-End Funds Performance in China
Using Conditional Measures
Yang Kuan ........................................................................ 618
Integration of Activity-based Costing and Balanced Scorecard
in the Logistics Enterprises of China
Xue-Feng He, Jian-Min Yi .................................................. 626
The Researches on Calculating Method of Insurance Premium of
Residential Mortgage Loan
Shang Yaohua, Liu Jiali ..................................................... 631
Part Eight  Warehouse Operating and Inventory Management

Research on Integrative Innovation of Automatic Material Handling System
Zhuang Yongyao, Huang Jie ................................................................. 639

Study on Real Estate Supply Chain Based on Modularity Theory
GUO Jing-juan, XU Shou-bo ............................................................. 644

Research on How Tax Policy Restrain Real Estate Bubble
Li Shao-ping ......................................................................................... 649

Distribution Center Allocation Study Based on the Lagrangian Relaxation Heuristic Algorithm
CAI Yongming, GUAN Zhongliang ....................................................... 655

Research on Commercial Enterprises Distribution Center Location and Halftone Optimization
Guo zhanglin, He hongjuan ................................................................. 661

The Synergetic Research of Supply Chain Coordination Management Based on Supply Chain Surplus
Yu Chunjie, Li Chen ........................................................................ 667

The Container Terminal Network Planning Method Based on Game Theory
ZHAO Xu, YANG Zan ........................................................................ 671

The Programming and Construction of Logistics Infrastructure in Towns
PAN Sheng-qiang, XIAO Wei ............................................................. 677

Part Nine  Network Design and Virtual Imitation

AS/RS RealTime Simulation and Control Integrated System Research
Xu Xusong, Xiong Hongbin ............................................................... 685

The Application of Virtualization Strategy in Supply Chain Management
Yue Houbin, Yu Xinghua ................................................................. 694

Function Transferring and Supply Chain Management
Zhao Li, Liu Xiaofeng .......................................................................... 697

Study of Master Data Management with the Method of Transaction Flow & Data Analysis
Mo Zan, Liu Ai-jun ............................................................................ 700
Probe on Regional Node Model in Logistics based on its Growing Competence
Jijiang Liang ........................................................................................................ 705
A Short-term Forecasting Method for Regional Logistics Demand Based on Support Vector Regression
Xiao Jianhua, Tang Jun ......................................................................................... 710
Efficiency of Closed-End Funds Performance Measurement: A Non-parametric Approach
Wang Weibin ......................................................................................................... 715

Part Ten Reverse Logistic and Cycle Economy

The Empirical Analysis on Changing Industry Structure and Growing Economy in China
Zhi Daling, Han Jianyu .......................................................................................... 723
The Failure of Doha Signals the Demise of Globalization
Yang Baojian, Yang Ling ....................................................................................... 730
Ports Competition Evaluation Model and Application in Northeast Asia Ports
Dai Ming-hua, Chen Shuang-xi ............................................................................... 733
Reverse Logistics Analysis of the External Effects
Jiang Hua, Yang Jing .............................................................................................. 741
Strategic Alliance on Logistic Enterprises – Trend and Government Tactics
Li Song-qing .......................................................................................................... 747
The Enterprise Value Analysis Based on Reverse Logistics
Chen Ming ............................................................................................................. 752
Reverse Logistics of Enterprises Based on Circular Economy
Shi Baojuan, Zheng Zuting .................................................................................... 759
The Coordinate Study of Reverse Logistics and Green Supply Chain
Yuan Jingbo .......................................................................................................... 763
The Evolution Routines of Labor Division in New Classical Economics and Recent Developments in International Logistics
Yang Sangan, Ge Weina ........................................................................................ 768
Choice and Management of Product Outsourcing
Yin Changyan, Li Lin .............................................................................................. 774
A Study on the Government Functions in the Logistic Industry
Wang Lei, Liang Pu-xuan .................................................................779

Part Eleven   Logistic Service in Manufacturing Sector

Logistic System Comparison in Agriculture – US, European and China
Zhang Wensong, Liao Danfeng .................................................................785

The Study on the Human Resource Management of the Logistics
Enterprises Based On the Competency Model
You Chun, Li Yanping .................................................................795

A Study on the Supply Chain Management and Integration of
the Chinese Textile Industry in the Post-quota Era
Xu Hui, Zhang Jun .................................................................802

A Conceptual Model of Supply Chain Coordination in Aerospace
Industry
Chen Yuan .................................................................810

Dairy Product Supply Chain under Risk of Demand Uncertainty
-   On Implements VMI and Expands Order Sharing in Dairy Stations
ZHANG Han-jiang, WU Na .................................................................815

Cost Control Study of Tobacco Logistics Enterprise
ChenHongming, QiaoQiao .................................................................821

Analysis Investment in Tobacco Industry Logistics Infrastructure
Liu Xiaozhuo, Chen Hongming .................................................................825

Grey Analysis on Logistics and Textile Industry in Hebei Province
Hui Hongqi, Zu Yidan .................................................................830

Supply Chain Management in Petroleum Industry – Quandary and
Countermeasures
Wang Jiashan, Wang Jingzhong .................................................................835

Allocate Distribution Center in Agro Logistics – Model and
Its Application
Mao Yuzhong, Gong Yun .................................................................840

Research on the Essential Factors and Mechanism of
Regional Logistics System
Zhang Lili, Hai Feng .................................................................845

Model Research on Manufacturing Resources Integration
Zhou Xiao-ye, Sun Li-zhi .................................................................849

The Research on Estimating Model of Innovation Conduction Effect
among Industries
Zhao Shukuan, Jiang Hong ................................................................. 855
Positive Analysis on the Modes of the Eco-Industrial Chains in
China’s Eco-Industrial Parks
Zheng Ji-liang, Yang Lin ................................................................. 861
The Research on Chinese Agricultural Product Logistics Based on
the Supply Chain
Zhao Yingxia, Guo Xiangyu ............................................................. 866
Logistic Service in Pharmacy Chain Shop – Case Study from
Chang – Zhu – Tang Region
Liu Li, Zhong Wei-jun ................................................................. 874
