DOING BUSINESS RESEARCH
A GUIDE TO THEORY AND PRACTICE

NICK LEE
WITH IAN LINGS

SAGE
Los Angeles • London • New Delhi • Singapore
Contents

Foreword xv
Acknowledgements xvii
How to use this book xxi

Chapter 1 WHAT IS RESEARCH, AND WHY WOULD ANYONE WANT TO DO IT? 1
Why (yet) another research book? 5
So, what is research? 6
Induction and deduction 6
Commercial versus academic research 9
What is knowledge? 10
Theory, knowledge, research 12
Some practical tips and advice 14
Final points, and how to use this book 16
Further reading 19
Exercises 19

Chapter 2 THE SCIENTIFIC APPROACH TO RESEARCH 20
Philosophy and the roots of science 25
Renaissance, enlightenment and empiricism 27
The Vienna Circle, logical positivism, logical empiricism and the scientific method 29
What is ‘science’, and who are ‘scientists’? 33
Science and social science 34
Scientific knowledge and the scientific method 36
The scientific method 39
The scientific method and the social sciences 42
Typical examples of ‘scientific’ dissertations 42
Summary 44
Further reading 44
Exercises 45
Chapter 3  THE INTERPRETIVE APPROACH TO RESEARCH  46
Science, society (and philosophy) at a crisis point 52
The emergence of alternatives to ‘science’ 54
The interpretive approach to research 56
Hermeneutics as an underpinning 57
Phenomenology, interpretivism and social constructionism 58
Interpretive research traditions 60
Phenomenology and existentialism 61
Ethnographic research 62
Critical research and feminist traditions 63
Implications of taking an interpretive approach 64
Data collection for interpretive research 65
The ‘Three Rs’ of interpretive projects 66
Generalisability and rigour 67
What’s important for YOUR project? 68
Choosing an approach 69
The politics of organisational research 71
Interpretive projects 71
Relating this to the rest of the book 72
Further reading 73
Exercises 74

Chapter 4  REVIEWING EXISTING LITERATURE  76
What is a ‘literature review’? 80
Deciding what ‘literature’ is 83
Academic literature 85
Teaching literature 88
Practitioner-oriented literature 90
The Internet 91
Evaluating the ‘quality’ of literature 92
How do you turn ‘literature’ into a ‘literature review’? 93
How not to do it 94
Reading the literature 96
Structure and synthesis: Adding something to what’s there 97
Structuring your literature review 98
Writing within your structure 100
Some final thoughts and tips 102
Some things to avoid 103
CONTENTS

Chapter 5  THEORY, CONCEPTUALISATION AND HYPOTHESES

Some philosophical assumptions 112
Laws and theories: What they are and what they are not 113
Laws 113
Theories 115
Using existing theory to explain behaviour 116
Developing theory 118
Models 123
Hypotheses and propositions 127
Supporting a hypothesis 130
Summary 131
Further reading 132
Exercises 133

Chapter 6  CONCEPTS, CONSTRUCTS AND MEASUREMENT

Measurement and the theory behind it 138
Scales of measurement 144
What is a ‘construct’? 148
Concepts and constructs 150
A note on dimensionality 151
Summary 154
Further reading 155
Exercises 155

Chapter 7  THE PROCESS OF MEASURE DEVELOPMENT

Moving from the theoretical to the real world 161
Developing a measure 165
Validity of measures 169
Other approaches and models 171
Formative and causal models 172
The C-OAR-SE method 172
Item response theory 173
Final words and summary 174
Further reading 176
Exercises 177
## Chapter 8 RESEARCH DESIGN

- Research design and the control/observance of variation 182
- Level of analysis and theoretical variation 187
- Level of analysis and measurement 191

### The experimental approach
- Cross-sectional designs 197
- Longitudinal designs 198
- Case study designs and action research 200

### Tying it all together
- Summary 202
- Further reading 203
- Exercises 204

## Chapter 9 COLLECTING QUALITATIVE DATA

- Rigour in qualitative research 209
- Qualitative sampling 212
- Interviewing 217
- Focus groups 221
- Observation 224
- Documentary sources of data 225
- Recording your data 227

### Summary
- Further reading 229
- Exercises 230

## Chapter 10 QUALITATIVE DATA ANALYSIS

- A perspective on qualitative analysis 235
  - A general approach to qualitative data analysis 236
  - Reliability and validity in qualitative analysis 237
- Preparatory steps in analysis 240
- Coding and data reduction 243
- Data displays 247
- Beginning to draw conclusions 251
  - Verifying your conclusions and their validity 253
- A brief introduction to some other issues 254
  - Content analysis 255
  - Semiotics 255
  - Discourse analysis 255
  - Narrative analysis 256
## CONTENTS

Feminism: An example of the political influence in qualitative research 256  
The Internet 257  
Summary 257  
Further reading 258  
Exercises 259

### Chapter 11  COLLECTING QUANTITATIVE DATA 260

Quantitative sampling 264  
Probability sampling 268  
Non-probability sampling 270  
Error in samples 272  
How big should a sample be? 273  
Other considerations 274  
Methods of collecting your data 276  
A brief introduction to instrument design 278  
Tips on writing good questions 280  
Testing your draft questionnaire 282  
Cross-national instrument design 283  
Summary 284  
Further reading 285  
Exercises 285

### Chapter 12  HOW AND WHY STATISTICS WORK 286

What are statistics and why do we use them? 290  
The normal distribution 294  
Basic probability theory 297  
Sampling and probability 301  
Statistical inference and hypothesis testing 303  
What actually happens in practice 308  
Type I and Type II errors 309  
Statistical and substantive significance 311  
Summary 312  
Further reading 313  
Exercises 314

### Chapter 13  QUANTITATIVE DATA ANALYSIS I 316

Quantitative analysis software and ‘the dark side’ 320  
Preparing your data 322  
Cleaning your data and dealing with missing data 327
Describing your data 329
  Describing your data with tables 329
  Describing your data with pictures 331
  Describing your data with summary numbers 333
Assessing the characteristics of your data 334
  Assumptions to consider 335
  Outliers 338
Summary 339
Further reading 340
Exercises 340

Chapter 14 QUANTITATIVE DATA ANALYSIS II 342
  Theory testing, research design and quantitative analysis 346
  Analysing associations between variables 349
    Correlation 349
    Regression 351
  Analysing differences between groups 356
    The t-test 356
    ANOVA 358
  Interpretation of statistical results 361
  Going further: A magical mystery tour 362
Summary 364
Further reading 365
Exercises 365

Chapter 15 MIXING METHODS AND PARADIGMATIC INCOMMENSURABILITY 368
  Paradigms and incommensurability 372
    The problem of objective evaluation across paradigms 374
    Strong- and weak-form incommensurability 376
    Multi-paradigm research? 377
  Mixing methods 379
    Qualitative approaches in quantitative research 379
    Quantitative approaches in qualitative research 380
    Overall strategic approaches to mixing methods 381
  Final notes and reflections 382
Further reading 383
Exercises 384
Chapter 16 WRITING AND TALKING ABOUT YOUR WORK

Why disseminate your research? The right mindset to be in

Writing about your work
  Structuring and actually writing the document

Talking about your work

Final conclusions, and Goodbye!

Further reading

Exercises
