Credit Derivatives and Structured Credit Trading

(Revised Edition)

Vinod Kothari
Foreword xxv
Preface xxvii

PART 1 MARKET, INSTRUMENTS AND MOTIVATIONS

Chapter 1: Credit derivatives: Structure, evolution, motivations, and economics 3

Credit risk: The challenge of our times 4
Derivatives: The building block of credit derivatives 5
Securitization: The other building block 5
Instruments of credit risk transfer 6
Meaning of credit derivatives 6
  What is a credit derivative? 6
  A definition of credit derivatives 7
  A quick guide to basic jargon 7
  A quick example 9
  Synthetic lending 10
  Reasons for trade in credit risk 10
The elements of a credit derivative 11
  Bilateral deals and capital market deals 11
  Reference asset or portfolio 12
  Structured portfolio trade 12
  Basket trades 13
  Index-based credit derivative trades 13
  Credit default swaps (CDS) on asset-backed securities 13
  Loan-only CDS 14
  Protection buyer 14
  Protection seller 14
  Funded and unfunded credit derivatives 15
  Credit event 15
  Notional value 16
  Premium 16
  Tenure 16
  Loss computation 17
  Threshold risk or loss materiality provisions 17
  Cash and physical settlement 17
  Deliverable asset 18
  ISDA documentation 18
Contents

Quick introduction to the types of credit derivatives 19
  Credit default swap 19
  Total return swap 19
  Credit linked notes 20
  Credit spread options 20
  Portfolio default swaps 21
  Index trades 21

Credit derivatives and traditional financial guarantee products 21
  Credit derivatives and guarantees 22
  Credit derivatives and credit insurance 22
  Credit derivatives and loan assignments 22
  Credit derivatives and securitization 24

Motivations 24
  Motivations for the protection buyer 24
    Reducing regulatory capital 24
    Economic capital relief 25
    Offers easier alternative to securitization 25
    Reduction of credit concentration 26
    Better portfolio management 26
    Solving cross-border problem 27
    Enhancing RARoC 27
    Trading motive 27
  Motivations for the protection seller 27
    Synthetic lending 28
    Arbitraging opportunities 29
    Yield enhancement 30
    Risk diversification 30
    Balancing the risk balance sheet 30
    Far fewer expenses 31
    Resolves problems of availability by cloning cash assets 31

Motivations for the traders and re-packagers 31

Economic impact of the credit derivative market 32
  The positive side 32
    Financial stability 32
    Banks to focus on credit asset creation 33
    Reducing the cost of credit 33
    The supply of bank credit increases 34
    Effective risk management by diffusion of risk 34
    Securitization results into disintermediation: Credit derivatives reinforce the role of commercial banks 36
    Credit derivatives and pricing of credit risks 37

The negative side 37
  Lack of transparency in transfer of risks 37
  Cross-sector risk transfers 38
Transfer of risks to the lesser informed 39  
Increased leverage 39  
Credit derivatives promote riskier lending 39  
Insider trading 40  
Unconfirmed trades and operational problems 41  
Credit derivatives have not been tested in adverse market conditions 41

Chapter 2: Credit derivatives: Market, evolution, and current status 47

Evolution of credit derivatives 47  
Credit derivatives and secondary markets in loans 48  
The emergence of credit-linked notes (CLNs) 49  
Four stages of development 49  
Pre-1997: Early period of skepticism 50  
The 1997 and 1998 crises: Credit derivatives get a boost 51  
Enron, WorldCom, Argentina 53  
Standardization of CDS 53  
Advent of index trading 54  
Advent of credit derivative product companies 54  
Synthetic balance sheet securitization 55  
Current state of the market 55  
Growth in credit derivatives relative to other OTC market segments 55

Major centers of credit derivatives activity 58

Major market players 58  
Protection buyers 58  
Protection sellers 58  
Banks 60  
Concentric nature of the credit derivatives market 61  
Trading versus hedging motive 63  
Insurance companies 64  
Financial guarantors 64  
Hedge funds 64

Dealers 65

Hedge funds and credit derivatives 65  
Growth of the hedge fund industry 66  
The advent of credit strategies hedge funds 66  
Role of hedge funds and credit derivatives 68  
Hedge funds as suppliers of equity to credit derivatives 69  
Credit derivatives losses and hedge funds 69  
Implications of the intensive hedge funds role 71

Major products 72

Reference risks: sovereign versus corporate 72  
Credit quality of reference entities 74  
Physical versus cash settlement 76
## PART 2 SINGLE-NAME INSTRUMENTS

### Chapter 3: Credit default swaps

- Meaning of CDS ........................................ 81
- Summary of terms ..................................... 81
  - Numerical illustration ............................ 83
- Main terms of the CDS ............................... 83
  - Reference obligation ............................. 83
  - Notional value ..................................... 84
  - Premium ........................................... 84
  - Credit events ..................................... 85
  - ISDA’s credit events ............................... 85
    - 1 Bankruptcy .................................... 85
    - 2 Obligation acceleration ...................... 86
    - 3 Obligation default ............................ 86
    - 4 Failure to pay ................................ 87
    - 5 Repudiation/Moratorium ....................... 87
    - 6 Restructuring ................................ 87
  - Common credit events .............................. 87
    - Notice of credit event ......................... 88
    - Terms of settlement ........................... 89
      - Physical settlement ......................... 89
      - Deliverable obligation ...................... 89
      - Cash settlement ................................ 89
      - Valuation of the defaulted obligation ..... 89
      - Threshold amount ................................ 89
    - Collateral provisions .......................... 90
- Funded CDS ........................................... 90
  - How do the parties to a CDS encash value ... 91
    - Impact of time decay on mark-to-market valuation 92
- CDS on sovereign names ............................ 92
- Basket default swap ................................ 92
- Portfolio CDS ........................................ 94
- Structured portfolio default swap ............... 96
- Binary swaps ......................................... 98

### Chapter 4: Total rate of return swaps

- Meaning of TROR swaps ............................ 99
- CDS and TROR swaps ................................ 100
- Impact of a TROR swap ............................ 101
- Terms of a TROR swap .............................. 101
  - Reference asset ................................ 101
  - Credit events .................................... 102
  - Settlement methods .............................. 102
- Examples of applications of TRRs ............... 102
Advantages of a TRS

- Creates off-balance sheet synthetic assets
- Avoids problems of availability
- Avoids regulatory barriers in owning the target asset
- Provides very high leverage
- Avoids regulatory barriers in giving a traditional loan
- Provides better security interest for the synthetic lender

Index-based TRSs
Structured TRS
TROR swaps and equity swaps
TROR swaps and property derivatives
TRSs and camouflaged lending transactions

Chapter 5: Credit-linked notes

- Meaning of a CLN
- Distinctive features of CLNs
- Structured risk transfer through CLNs
- CLNs issued by SPVs
- Self-referenced CLNs

Chapter 6: Credit default swaps on asset-backed securities and derivatives exposures

- Need for CDSs on asset-backed securities
- Development of CDS on ABS
- Major differences between CDS of ABS and corporate debt
- Documentation templates for different structured finance products
- Special features in the documentation templates
- Notional value of the swap
- Credit events in the case of ABS
  - Credit events in the case of MBS—physical or cash settlement terms
  - Meaning of Failure to Pay
    - Failure to Pay during the term of the transaction
    - Failure to Pay upon final maturity
  - Meaning of loss event
  - Bankruptcy as a credit event in case of CDS of ABS
  - Rating downgrade to distressed level
  - Restructuring
  - Credit events under the PAUG terms
    - Physical delivery option under PAUG
- Two modes of settlement: PAUG and traditional
  - Payments by the protection buyer
  - Payments made by the protection seller
    - Write-down
    - Principal shortfall
    - Interest shortfall
Contents

CDS of CDOs
  Credit events in case of CDS of CDOs 122
Contingent CDS
  Notional amount of the transaction 122
  Mark-to-market value 123
  Interim payments 124
Credit events 124

Chapter 7: Loan-only CDS 125
Meaning of leveraged loans 125
  Market for leveraged loans 125
The LCDS market 126
Motivations of parties
  Motivations of the protection buyer 127
  Motivations of the protection seller 127
Distinctive features of LCDS as compared to vanilla CDS 128
  European and US LCDS 128
  Secured loans 128
  Physical settlement 128
  Relevant secured list 129
  Auction protocol 129
  Cancellability when no deliverables of required seniority exist 129
ISDA documentation for LCDS 130
LCDS basis 130
  Reasons for basis spreads (LCDS: leveraged loans) 130
  Reasons for basis spreads (LCDS: CDS) 130
LCDX 131
iTraxx LevX 131

Chapter 8: Credit derivatives options and volatility trades 133
Credit spread trades 133
Credit default swaptions 133
Payer option 134
Receiver options 136
  Out of money swaptions 140
Combination trades 140
  Straddle 140
  Strangle 141
  Butterfly 143
  Swaptions on indices 145
  Knock out feature 145
Constant-to-maturity CDS 145
  Distinctive Features of CMCDS 147
  Genesis of CMCDS 147
  Uses of CMCDS 147
  Capped CMCDS 148
  Index CMCDS 148

PART 4 PRICING AND VALUATION OF CREDIT DERIVATIVES

Chapter 16: Approaches to quantification of credit risk 279

Credit risk: semi analytic approaches 280
   Financial statement analysis 280
   Multivariate models 280
      Altman’s Z-score 280
      Probit and Logit models 281
Option-theoretic models 282
   Merton model 282
      Foundation of the Merton model 283
      Critical factors in bankruptcy risk 283
      Value of assets 284
      The Merton formula for probability of default 286
      Implementing the Merton formula 286
      Adding simulation with the Merton formula 287
   The KMV model 287
      Measuring default probability 288
      Asset value and volatility 288
      Computing the distance to default 289
      Computing default probability 290
Intensity or hazard rate models 290
   Back-computing implied probability of default from the market 290
      Pricing of credit risk in a defaultable bond 290
      Computing probability of default from the market spreads 292

Chapter 17: Pricing of a single name credit derivative 293

Establishing multi-period probabilities of default 293
   Working with probability of default 293
   Getting the probabilities of default from credit spread curve 294
Pricing of a credit default swap 295
   Approach to pricing 295
      Defining the cash inflows and outflows 295
      Expected value of the inflow 296
      Expected value of the outflow 297
      CDS Price 297
Introducing details 297
Pricing of a derivative vs. pricing of a bond 298
Relevance of recovery rate 299
Valuation of a credit default swap 299
Value of upfront payment in a CDS 302

Chapter 18: Pricing of a portfolio credit default swap 303

Basic principles of pricing of portfolio default swaps 303
   Meaning of a portfolio 303
   A portfolio without correlation 304
Contents

Binomial distribution 305
Tranching of the risk 306
Pricing of the tranches 307
Simulation method to derive probability distribution 308
Comparing the results of binomial and simulation approaches 309
Introducing different exposures and different recovery rates 310
Introducing correlation 311
  Incorporating correlation in simulation approach 311
  Impact of correlation on the shape of the probability distribution 313
Correlation and tranche pricing 313
Market implied correlation and correlation trading 315

PART 5 LEGAL, REGULATORY, OPERATIONAL, TAX AND ACCOUNTING ASPECTS

Chapter 19: Legal aspects of credit derivatives 319
Legal nature of credit derivatives 319
  Credit derivatives and contingent contracts 320
  Credit derivatives and actionable claims 320
  Contract of guarantee or surety 320
  Contract of indemnity 324
  Credit derivatives and bank letters of credit 325
  Credit derivatives and credit insurance contracts 325
    Robin Pott's opinion on credit derivatives and insurance 327
Are they gaming, gambling or wager contracts? 327
Are they securities? 328
Are they investment contracts? 328
Bilateral contract or transferable 329
Credit derivatives and commodities 330
Enforceability of credit derivative contracts 331
  Regulatory enforceability of the derivative contract 331
  Enforceability of the reference obligation 331
Whether credit event? 332
Meaning of different credit events 332
Bankruptcy 333
  (a) Dissolution 333
  (b) Insolvency 333
  (c) Arrangement or composition with creditors 334
  (d) Institution of bankruptcy or winding up proceedings 334
  (e) Winding-up resolution 335
  (f) Administration, receivership, and so on 335
  (g) Foreclosure action by creditors 335
  (h) Analogous proceedings 336
Obligation acceleration 336
Obligation default 336
Failure to pay 337

Chapter 21: Taxation of credit derivatives

The tax basis of credit derivatives

Nature of credit derivatives from tax viewpoint

Guarantee

Insurance

Notional principal contracts

Option contracts

Key issues in taxation of CDSs

Taxation of the protection buyer

Integration with the reference obligation

Option contract treatment

Notional principal contract

Meaning of notional principal contracts

Are credit derivatives notional principal contracts?

Hedge tax rules applicable to notional principal contracts

No hedge tax accounting for NPCs

TROR swaps

Is it a case of constructive transfer of the asset?

Taxation of CLNs

Taxation of the protection seller

Mark-to-market rules

Book/tax conformity and safe harbor rules

Tax treatment in other countries

Taxation of derivative transactions in UK

Taxation of CLNs

Tax treatment of closeout settlement

Chapter 22: Accounting for credit derivatives

Whether derivatives accounting standards applicable?

The meaning of a derivative

Physical settlement deals

CDSs and financial guarantees

Total rate of return swap

Credit-linked note

Basics of derivative accounting rules

Basics of accounting for financial instruments

Basics of hedge accounting

Why and when hedge accounting?

Impact of hedge accounting

Conditions for hedge accounting

Fair value hedge accounting

Cashflow hedge accounting

Accounting for CDSs

If the CDS is a financial guarantee contract or credit insurance

If the CDS is not merely a financial guarantee contract
