Essays on Empirical Growth

by

Oya Pınar Ardiç

A dissertation submitted in partial fulfillment of
the requirements for the degree of

Doctor of Philosophy
(Economics)

at the

UNIVERSITY OF WISCONSIN - MADISON
2003
# CHAPTER I

## Contents

1. Introduction  
2. Existing Empirical Studies  
3. Bayesian Classification Based on Finite Mixture Models  
4. MRW Model  
   4.1 Classification Analysis  
   4.2 Empirical Solow Model Within Groups  
5. An Empirical Growth Model with Key Socioeconomic Indicators  
   5.1 Classification Results  
   5.2 Regression Analyses on Subsamples  
6. Conclusion  

References  

Appendix  

A Empirical Growth Models & the Convergence Hypothesis  
   A.1 The Solow Model  
   A.2 The Augmented Solow Model  
   A.3 Convergence Hypothesis  
B MRW Data Set and Replication  
   B.1 Data Set  
   B.2 Replication  
C Data Set for the Empirical Model with Key Socioeconomic Indicators
CHAPTER II

Contents

1 Introduction

2 Factor Analysis
   2.1 The Factor Model
   2.2 Identification and Estimation

3 Data: Definitions and Analysis
   3.1 Scatters and Correlations
   3.2 Factor Analysis on Levels
      3.2.1 1977 Levels
      3.2.2 1996 Levels
   3.3 Regression Analysis
   3.4 Factor Analysis on Growth Rates
      3.4.1 Actual Growth Rates
      3.4.2 Predicted Growth Rates

4 Conclusion

References
# CHAPTER III

Contents

1 Introduction 131

2 Real Exchange Rate, Crises, and Output 135

3 The Turkish Economy 140

4 Data Analysis 143
   4.1 Data Description 143
   4.2 Bivariate Analysis of the Real Exchange Rate and Output 148
   4.3 VAR Analysis 150
   4.4 The Reasons for the Observed Contractionary Devaluations 156
      4.4.1 Effectiveness Index 156
      4.4.2 Consumption, Investment and Government Spending 157
      4.4.3 Imported Inputs 161
      4.4.4 Debt Structure 163

5 Conclusion 165
