FOREWORD ................................................................................................................................................... III
ACKNOWLEDGEMENTS .............................................................................................................................. V
ACRONYMS .................................................................................................................................................... XI
EXECUTIVE SUMMARY ............................................................................................................................. XII

CHAPTER 1: SETTING THE SCENE .................................................................................................................. 1
1.1 Background and rationale .......................................................................................................................... 1
1.2 Context and objective of the study .......................................................................................................... 2
1.3 Components of the study ....................................................................................................................... 2
1.4 Structure of the report and target audience ............................................................................................. 3

CHAPTER 2: FOOD SECURITY IN SUB-SAHARAN AFRICA ........................................................................... 5
2.1 Introduction ............................................................................................................................................. 5
2.2 Food availability in sub-Saharan Africa .................................................................................................. 6
2.2.1 Source of food supply in sub-Saharan Africa .................................................................................. 8
2.2.2 Comparative analysis of sources of food supply at the country level ............................................. 11
2.3 Food access .......................................................................................................................................... 15
2.3.1 Economic access .............................................................................................................................. 16
2.3.2 Physical access ............................................................................................................................... 20
2.3.3 Political factors ............................................................................................................................... 22
2.3.4 Socio-cultural dimension ............................................................................................................... 23
2.4 Conclusion ........................................................................................................................................... 23

CHAPTER 3: AGRICULTURAL DEVELOPMENT AS A STRATEGIC OPTION FOR
ACHIEVING FOOD SECURITY IN SUB-SAHARAN AFRICA ....................................................................... 25
3.1 Poverty and food security ...................................................................................................................... 25
3.2 The link between growth, food security and poverty alleviation ......................................................... 25
3.3 Addressing hunger and poverty in SSA ................................................................................................. 27
3.4 The central role of agriculture and rural development in the immediate term .................................. 27

CHAPTER 4: PERFORMANCE OF THE FOOD AND AGRICULTURE SECTOR IN SUB-SAHARAN AFRICA .......................................................................................................................... 33
4.1 Significance of agriculture ...................................................................................................................... 33
4.1.1 Agriculture in the economy ........................................................................................................... 33
4.1.2 Agriculture’s role in development .................................................................................................. 34
4.2 Agricultural GDP growth ..................................................................................................................... 34
4.3 The performance of agricultural trade .................................................................................................. 35
4.4 Subsector performance ......................................................................................................................... 36
4.4.1 Crops ............................................................................................................................................... 36
4.4.2 Performance of the livestock sector .............................................................................................. 40
4.4.3 Production and export performance of the fisheries sector .......................................................... 41

CHAPTER 5: AGRICULTURAL DEVELOPMENT CONSTRAINTS AND OPPORTUNITIES .......................................................................................................................... 43
5.1 Political unrest and armed conflicts ....................................................................................................... 43
5.2 Non-conducive policy environment and poor institutional framework ............................................ 44
5.3 Constraints on access to resources for expansion of cultivated area .................................................. 46
5.3.1 Availability and access to land ......................................................................................................... 46
5.3.2 Access to traction power and labour ............................................................................................. 48
5.4 Increasing agricultural output and income through improved productivity and control of post-
harvest losses .............................................................................................................................................. 48
5.4.1 Recurrent droughts and under-investment in water control and irrigation .................................... 49
5.4.2 Soil fertility management ................................................................................................................ 51
5.4.3 Research, extension and credit services ......................................................................................... 52
5.4.4 Post-harvest losses .......................................................................................................................... 54
5.5 Constraints related to marketing and market access ............................................................................. 54
5.5.1 Market infrastructure and market information .............................................................................. 54
5.5.2 Deteriorating barter and international terms of trade .................................................................... 56
5.5.3 Unstable and uncertain input and output prices ............................................................................ 57
5.6 Financing agricultural development

5.6.1 Declining trend in public support to agriculture
5.6.2 Decline in official foreign aid for agriculture
5.6.3 Low and declining capital endowment of sub-Saharan African agriculture and low productivity of labour

5.6.4 Is support to agriculture a profitable investment?

CHAPTER 6: SUCCESS STORIES IN AGRICULTURAL DEVELOPMENT: LESSONS LEARNED AND THEIR RELEVANCE TO SUB-SAHARAN AFRICA

6.1 Success stories in Africa

6.1.1 Tea, horticulture and dairy developments in Kenya
6.1.2 Rice in Mali and Guinea
6.1.3 Cassava, roots and tubers
6.1.4 Cotton
6.1.5 Local agricultural development in various areas of sub-Saharan Africa

6.2 Selected success stories from outside Africa

6.2.1 The Marshall Plan (1947-51)
6.2.2 The Southeast Asian experience
6.2.3 India
6.2.4 Agricultural research

6.3 Lessons learned

CHAPTER 7: WHERE DO WE GO FROM HERE?

7.1 General recommendations applying to all SSA countries

7.1.1 Addressed to governments
7.1.2 Addressed to the African Union, NEPAD Secretariat and regional organizations
7.1.3 Addressed to development partners

7.2 Priority areas for action in countries in conflict or emerging from conflicts

7.2.1 Immediate measures to ensure adequate access to food for the hungry and for resettling refugees and demobilized soldiers
7.2.2 De-mining and rehabilitation/construction of rural infrastructure
7.2.3 Establishment of basic rural services
7.2.4 Establishment of an appropriate institutional and policy environment

7.3 Possible exit options for less-advanced countries

7.3.1 A strengthened institutional capacity
7.3.2 An appropriate policy framework in place
7.3.3 Public investment
7.3.4 Public services

7.4 Possible exit options for resource-rich countries

7.4.1 Macroeconomic measures
7.4.2 Investment
7.4.3 Safety nets

7.5 Possible exit options for more-advanced countries

7.5.1 Reinforcement of the role of the private sector
7.5.2 Economic diversification

7.6 Summary and Conclusion

BIBLIOGRAPHY

APPENDICES

Appendix 2.1: Indicators of food intake, undernourishment, growth and sources of cereal supply in SSA
Appendix 2.2: Indicators of food intake, undernourishment, growth and of cereal production, imports and aid in SSA
Appendix 4.1: Share of agriculture in total GDP (%)*
Appendix 4.2: Performance of agriculture: growth rate of agricultural GDP*
Appendix 4.3: Growth of agricultural export in SSA countries by period
Appendix 4.4: Performance of the cereal subsecto (average annual growth rate %)
Appendix 4.5: Maize production per caputa in seven SSA countries
Appendix 4.6: Export of major cash crops
Building a case for more public support

FIGURES

Figure 2.1: Number of food emergency cases in Africa (1982-2001) ................................................. 6
Figure 2.2: Average daily level of food intake per caput in selected regions ........................................... 7
Figure 2.3: Cereal production, imports and food aid in sub-Saharan Africa* ........................................... 9
Figure 2.4: Evolution of food production per caput in selected regions .................................................. 10
Figure 2.5: Map of groups of countries ...................................................................................................... 13
Figure 4.1: Share in world agricultural exports ........................................................................................... 35
Figure 4.2: Number of countries with positive and negative agricultural trade balance ............................. 36
Figure 4.3: Performance of oil crop production by subregion ................................................................. 38
Figure 4.4: Performance of pulse production by subregion ................................................................. 38
Figure 4.5: SSA trade balance of meat and milk production ................................................................. 41
Figure 5.1: Regional comparison of irrigated agriculture ........................................................................... 51
Figure 5.2: Fertilizer consumption index .................................................................................................. 52
Figure 5.3: Cereal yield comparison – SSA subregions, Asia-Developing ............................................ 53
Figure 5.4: Terms of trade between agricultural commodities and manufactured products (MUV) ........ 57
Figure 6.1: Cassava, roots and tubers: total production and yield indices .............................................. 67

BOXES

Box 2.1: The importance of non-farm income in rural areas of SSA ......................................................... 19
Box 2.2: Example of food marketing constraints in Kenya ......................................................................... 21
Box 2.3: Example of food access problems in war-affected areas of Sudan .............................................. 22
Box 2.4: The impact of 1997 sanctions on Burundi ................................................................................ 23
Box 2.5: Main points on food security in sub-Saharan Africa and conclusions ........................................ 24
Box 3.1: Examples of the empirical relationship between hunger, inequality and growth .................. 26
Box 3.2: Agriculture development and its growth linkages ................................................................... 29
Box 3.3: China’s growth with poverty reduction strategy ......................................................................... 29
Box 3.4: Agriculture’s effective role for hunger and poverty reduction ................................................. 30
Box 3.5: Mutual benefits of the development of agricultural and of other economic sectors ............. 31
Box 3.6: Strategic options for food security in SSA and conclusions ..................................................... 32
Box 4.1: Main points on performance of agriculture in sub-Saharan Africa and conclusions .............. 42
Box 5.1: The brain-drain of Africa ........................................................................................................... 46
Box 5.2: Some basic figures on agricultural research in Mozambique and Brazil .................................. 46
Box 5.3: Land distribution in Zimbabwe .................................................................................................. 47
Box 5.4: Post-liberalization marketing in Zambia .................................................................................... 55
Box 5.5: Agricultural market instability in sub-Saharan Africa ............................................................ 58
Box 5.6: The cost and implications of food aid and commercial import in Malawi ............................... 62
Box 5.7: Main constraints and opportunities of agriculture in SSA and conclusion ............................ 63
Box 6.1: Viet Nam - Agriculture and rural development evaluation of the Five-Year Plan (1996-2000) ........................................................................................................... 70
Box 6.2: Lessons learned from success stories ....................................................................................... 73
Box 7.1: Summary points on the way forward ......................................................................................... 85
