- What standards and criteria exist to support effective quality management systems? 54
- What is ISO 9000? 54
- What are supplier certification requirements? 61
- What is ISO 14000? 63
- What is Six Sigma? 66
- What is the Malcolm Baldrige National Quality Award? 75
- Lessons Learned 80
- Chapter Questions 85

## 4 Creating a Customer Focus
- Why is a focus on customers so important? 92
- How do customers define quality? 92
- How do customers define value? 94
- What is the difference between satisfaction and perceived value? 95
- Why is it important to understand how the customer views the process? 96
- How does an effective organization create an unwavering focus on customers' requirements, needs, and expectations? 97
- How do effective organizations know what their customers want? 99
- How do effective organizations capture the voice of the customer and turn that voice into actions that drive customer-perceived value? 100
- How can the Malcolm Baldrige National Quality Award criteria help an organization create a more effective customer focus? 114
8 Managing the Supply Chain
What is a supply chain? 222
What are the benefits of effective supply chain management? 222
What are the elements of effective supply chain management? 224
What challenges face the development of an effective supply chain? 238
How does supply chain management relate to the Malcolm Baldrige National Quality Award? 238
Lessons Learned 239
Chapter Questions 241

9 Measures of Organizational Success
Why measure? 250
What are good measures of performance? 250
How are measures of performance utilized in an effective organization? 261
What are the goals of a measurement system? 262
What role does the cost of quality information play in an effective organization? 265
How are quality costs defined? 267
What types of quality costs exist? 270
What does a formal quality cost measurement system look like? 274
How are quality costs utilized for decision making? 275
How do the Malcolm Baldrige National Quality Award criteria support measurement, analysis, and knowledge management for effective organizations? 277
Lessons Learned 279
Chapter Questions 281

10 Benchmarking
How does benchmarking help an effective organization measure its success? 290
What is the purpose of benchmarking? 291
What types of benchmarking can be performed? 292
What are the benefits of benchmarking? 293
What are the different standards for comparison? 293
How is benchmarking done? 295
How do the Malcolm Baldrige National Quality Award criteria view benchmarking? 297
Lessons Learned 298
Chapter Questions 299

11 Process Management

What is a process? 310
How are key processes identified? 311
What is the difference between a functionally structured organization and a process-focused organization? 312
Why do functionally structured organizations have more difficulty focusing on key processes? 313
What benefits does a process orientation provide? 316
How do well-managed processes create value and generate customer satisfaction? 316
How are processes improved? 320
Why is it important to determine the objective of the process as it relates to the customer? 320
Why is it important to identify the boundaries of the process? 322
Why is it important to involve individuals from key activities in the process improvement effort? 323
What is meant by process ownership? 323
Why is it necessary to create a process map by identifying all of the activities in the process? 323
Why should an effort be made to separate the non-value-added activities from the value-added activities? 330
Why should non-value-added activities be eliminated? 332
What is variation, and why should it be eliminated? 335
Why is it critical to determine whether the remaining value-added activities are truly the "best practice"? 336
Why should the process be redesigned using the knowledge gained during the improvement effort? 336
How do the Malcolm Baldrige National Quality Award criteria support process management? 337
Lessons Learned 340
Chapter Questions 341

12 Lean Tools and Techniques

What is lean thinking? 354
What is value stream process mapping? 356
What is kaizen? 358
What are the five Ss? 360
What is kanban (pull inventory management)? 364
xii  CONTENTS

What is error proofing (poka-yoke)? 365
What is productive maintenance? 367
What is setup time reduction (single minute exchange of dies [SMED])? 370
What are reduced batch sizes (single piece flow)? 371
What is line balancing? 372
What is schedule leveling? 374
What is standardized work? 374
What is visual management? 378
Lessons Learned 378
Chapter Questions 380

13 Problem-Solving Tools and Techniques 382
How does an effective organization make value-driven improvements? 384
What are typical steps in a problem-solving process? 388
What happens during the “Plan” phase? 388
What happens during the “Do” phase? 437
What happens during the “Study” phase? 439
What happens during the “Act” phase? 440
Lessons Learned 444
Chapter Questions 446

14 Project Management 454
Why do organizations engage in project management? 456
What are the characteristics of a project? 456
How are projects selected? 456
What is a project proposal? 458
What are the components of an effective project proposal? 460
What are the characteristics of clear project goals and objectives? 460
What are the components of an effective project plan? 463
How are projects scheduled? 465
How are resources budgeted? 476
What are contingency plans and change control systems? 476
What is project control? 476
What must a project manager do in order to be effective? 478
Lessons Learned 479
Chapter Questions 481

15 Business Results 484
Why are business results key to effective organizations? 486
How does auditing allow an effective organization to see its progress? 490
What types of audits exist? 491
