CONTENTS

Preface vii

Part 1 American Agriculture and Globalization 1

1 Is American Agriculture Shrinking? 3
   Introduction to the Big Questions 4
   The Past Is Prologue 5
   Is American Agriculture Shrinking? 5
   Some Implications of a Shrinking Agricultural Sector 13
   Is a Shrinking American Agriculture a "Bad" Thing? 13
   The Past Is Prologue, Again 15

2 American Agriculture's Life Cycle 19
   The Life Cycle Model and Industry Analysis 20
   A Formal Model of Agriculture's Life Cycle 26
   Methods for Sorting Through the Questions 32
   Empirical Results for American Agriculture 34
   Concluding Comments and Opening Arguments 39

3 Profit Patterns Across American Agriculture 45
   Propositions to Be Evaluated 46
   Road Map for Discovery 47
   Exploration Results 56
   Implications of the Strong/Weak States' Results 71
   What Do the Strong/Weak Performing States Have in Common? 73
   The Final Talley 76

4 Agricultural Profits and Farm Household Wealth 82
   A Farm Household Model 85
   Method to the Madness 87
   Empirical Results 91
   Implications of the Results 97
Part 2  The Economics of Agriculture and Global Development 105

5 The Economic Food Chain of Global Development 107
   The Economic Food Chain 108
   Can the United States Leave Agriculture Entirely? 111
   Why Would a Country Want to Leave Agriculture? 114
   What About Comparative Advantage? 114
   Implications of It All 116
   Conclusions and Propositions 117

6 Commodities and the Profit Squeeze 121
   The Bottom Line 121
   Dealing with the Squeeze 123
   Local Decisions 125
   Why Is American Agriculture Being Squeezed? 128
   The Bottom Bottom Line 129

7 Technology as Catalyst and Treadmill 132
   Technology Is the Catalyst 133
   Harvest Mechanization Helps Agriculture Remain Competitive 134
   Technology as Treadmill 139
   Concluding Comments: Surfing on a Tsunami 144

8 Economic Development and the Irony of American Agriculture’s Technical Progress 147
   Economic Development Basics 149
   Management: The Fourth Resource 154
   The Irony of American Agriculture’s Technical Progress 159

Part 3  Global Agriculture’s Effect on Market Evolution 169

9 Farmland Values and Uses as Indicators of National Wealth 171
   Market Marginal Land 172
   Farmland Values 174
   Land Uses 185
   Idle Farmland and Global Capacity 195
   Global Capacity and Land Use as a National and Local Responsibility 202

10 International Mutual Dependence 208
   Short Supplies Created International Trade 209
   Conflict Between Local and Global Comparative Advantage 212
   Mutual Dependence as a Revolving Door 214
   Mutual Dependence Is the Game of Life 216
Part 4 American Production Agriculture’s Response

11 Producers as Investors and Portfolio Managers
  Decision Rules in Agriculture
  When All Assets Are in Agriculture
  When Crop Portfolio Changes Are Needed
  When Assets Must Leave Agriculture
  Land-Use Patterns
  Concluding Comments

12 Measuring Risk for Decision Making
  Income Risk and Its Components
  Methods of Reducing Income Risk
  Portfolio Approach to Risk Reduction
  Empirical Methods and Results
  Summary

13 Portfolio Decision Making of Farmland Owners and Tenants
  A Portfolio Model of Cropping Opportunities
  Effects of Changes in Leasing Rates
  The Returns to Risk in Practice
  Summary and Conclusions

14 Is the Market Failing Producers Who Wish to Manage Risks?
  Survey Results Regarding Risk Needs
  Analysis of Risk Sources
  Markets for Risk Management Tools: Failing, Missing, or Incomplete?
  Risk Tools in Commodity Markets
  Risky Business
  Appendix: Who Uses Price Risk Management Tools?

15 Hedging with Off-Farm Income
  Some Perspective
  A Portfolio Model of Off-Farm Income Effects
  Effects of Off-Farm Income Levels
  Empirical Analysis
  Economies of Scale and Household Off-Farm Income
  Summary and Policy Implications

16 Commodity Market Evolution
  Product Quality and Market Evolution
  Background
  General Proposition
  Economics of the Market Evolution Process
  How Big Can Organic Markets Get?
