## Part I

**THE THEORY OF CONSUMER BEHAVIOUR**

1. The basic theory of consumer choice                                   13
2. Money income and real income                                          41
3. Utility                                                               70

## Part II

**CONSUMER THEORY: FURTHER TOPICS**

4. Intertemporal choice                                                 91
5. Intertemporal choice and capital markets                              103
6. Choice in the face of risk                                            117

## Part III

**PRODUCTION AND COSTS**

7. Production functions                                                 139
9. Cost functions                                                        165
10. Production functions, cost functions, and the demand for factors of production 184

## Part IV

**BASIC THEORY OF THE FIRM**

11. Perfect competition                                                 205
12. Monopoly                                                             232
13. Product differentiation and monopolistic competition                 259
14. Alternative theories of the firm                                     279

## Part V

**OLIGOPOLY AND STRATEGIC INTERACTION**

15. Oligopoly: an introduction                                           303
16. Oligopoly, and strategic interaction                                 313
17. Game theory                                                         340

## Part VI

**FACTOR MARKETS**

18. Factor demand                                                        365
19. Factor supply                                                        397
20. Labour markets – trade unions and bargaining                         416

## Part VII

**GENERAL EQUILIBRIUM AND WELFARE**

21. The exchange economy                                                439
22. General equilibrium with production                                  454
23. Welfare economics                                                   468

## Part VIII

**MISSING MARKETS**

24. Taxes, externalities and public goods                                489
25. Economics of information                                             501
26. Public choice                                                       523

Further reading                                                          541
Index                                                                   545
### 6 Intertemporal choice and capital markets 103

**Key words and phrases**

Introduction 103
The production opportunity curve and the internal rate of return 103
Access to a perfect capital market 106
The separation of investment and consumption decisions 107
Rules for selecting the optimal investment–production plan 110
Interdependent production opportunities 111
Capital market imperfection 112
Concluding comment 114
Summary 114
Problems 115
Note 116

---

### 7 Choice in the face of risk 117

**Key words and phrases**

Introduction 117
The idea of expected utility 117
Probability and cardinal utility 118
Diminishing marginal utility and expected utility 119
Insurance and gambling 122
Insurance and gambling: further analysis 124
Further analysis of risk 127
Equilibrium demand for insurance 131
A note on moral hazard and adverse selection 133
Concluding comment 133
Summary 134
Problems 135

---

### 8 Production functions 139

**Key words and phrases**

Introduction 139
Ownership, control and the entrepreneur 140
Production 141
Activities and the isoquant 142

---

### 9 Cost functions 165

**Key words and phrases**

Introduction 165
Expenditure on inputs and the cost function 166
Long-run cost minimisation 166
Long-run total cost and the expansion path 170
Average and marginal costs in the long run 172
Long-run costs with varying returns to scale 172
The short run 174
Short-run cost functions 175
Short- and long-run average cost - the ‘envelope’ 177
Fixed and variable costs 179

* From production to cost functions in the short run – a formal treatment 180
Concluding comment 181
Summary 181
Problems 182

---

### 10 Production functions, cost functions, and the demand for factors of production 184

**Key words and phrases**

Introduction 184
From production to cost functions in the long run 185
Fixed proportions technology 188
Perfect substitutability 190
Cobb-Douglas technology 191
Conditional factor demand functions 194
Costs when input prices change 194
The cost function and conditional factor demand functions 195
### Contents

Some properties of conditional factor demand functions 196
The effect of changes in input prices on average and marginal costs 199
Concluding comment 201
Summary 201
Problems 202

**Part IV**
**BASIC THEORY OF THE FIRM**

### 11 Perfect competition 205

*Key words and phrases*

Introduction 205
The profit-maximisation hypothesis 206
The perfectly competitive firm’s demand function 206
Total, average and marginal revenue 207
The firm’s short-run supply curve 210
* A formal treatment 212
Price determination in the short run 214
The firm and the industry in the long run 215
The properties of the competitive industry 218
The U-shaped average cost curve and managerial inputs 221
Inter-firm differences in efficiency 222
Variations in factor prices in the short run 224
Factor price variations in the long run 226
Perfect competition and the supply curve 227
* Appendix – returns to scale and profitability in the Cobb-Douglas case 227
Summary 230
Problems 231
Note 231

### 12 Monopoly 232

*Key words and phrases*

Introduction 232
The demand curve, total revenue, and marginal revenue 233
* A formal treatment of the relationship between demand and marginal revenue – some examples 237
Profit-maximising price and output 238
* A formal treatment of monopoly equilibrium 241
Natural monopoly 242
Producer’s surplus and the cost of monopoly 245
Price discrimination 247
Demand elasticity and price discrimination 250
Perfect price discrimination 252
Multipart tariffs 253
Classifying types of price discrimination 254
Concluding comment 255
Summary 256
Problems 257

### 13 Product differentiation and monopolistic competition 259

*Key words and phrases*

Introduction 259
Goods, attributes and choice 260
The basic framework 260
A simple application – brand loyalty 263
An elaboration – combining brands 264
Product differentiation and market research 265
Advertising 267
Differentiated products and monopolistic competition 268
The firm in monopolistic competition 269
Monopolistic competition and efficiency 270
* A more formal analysis 272
Mark-up pricing 273
Criticisms of monopolistic competition 275
Concluding comment 275
Summary 276
Problems 277

### 14 Alternative theories of the firm 279

*Key words and phrases*

Introduction 279
Corporate governance 280
Revenue maximisation in a competitive market 282
The revenue-maximising hypothesis under monopoly 283
The effects of lump-sum taxes 284
The competitive labour-managed firm – an introduction 286
Maximising income per worker 286
Enterprise choices in the short run 288
* A more formal treatment 289
A comparison of income-per-worker-maximising and profit-maximising firms 290
The short-run supply curve 291
The labour-managed firm in the long run 295
Labour-managed and profit-maximising firms with free entry 297
Concluding comment 298
Household production and the labour supply function 411
Factor prices and the distribution of income 413
Summary 413
Problems 414

20 Labour markets – trade unions and bargaining 416
Key words and phrases 416
Introduction 416
An overview of union behaviour 417
Basic analysis of the monopoly union model 418
Wage bill maximisation 419
* Maximising expected utility of the representative worker 422
The monopoly union model – a final comment 425
Bargaining between unions and firms 426
Efficient bargaining 427
* Bargaining theory 431
Different union objectives and efficient bargaining 432
Concluding comment 434
Summary 434
Problems 435

23 Welfare economics 468
Key words and phrases 468
Introduction 468
The Pareto criterion and Pareto optimality 469
The Pareto criterion and competitive equilibrium in an exchange economy 470
Pareto optimality in production 471
The Pareto optimality of competitive equilibrium in a production economy 472
The two fundamental theorems of welfare economics 475
The Pareto criterion and distributional questions 475
Some illustrations 477
Compensation criteria 477
The compensation criteria in an ambiguous case 480
The utility frontier 480
The distribution of welfare 481
Concluding comment 483
Summary 483
Problems 484
Note 485

24 Taxes, externalities and public goods 489
Key words and phrases 489
Introduction 489
Taxation and Pareto optimality 490
The second-best principle 491
Externalities and absence of markets 491
Property rights and the Coase theorem 494
Public goods 497
The free rider problem 498
Public goods and government intervention 498
Concluding comment 499
Summary 500
Problems 500

Supporting resources
Visit www.pearsoned.co.uk/estrin to find valuable online resources

Companion Website for students
- Extra practice and self-assessment problems linked to the boxes in the text
- Solutions to selected problems in the text
- An online glossary of key terms
- Flashcards to test your understanding of key terms
- Annotated links to relevant economics sites on the web

For instructors
- Complete, downloadable Instructor’s Manual
- Detailed solutions to end-of-chapter problems in the text
- New to this edition, testbank of customisable questions for formative or summative assessment
- PowerPoints of all figures and captions in the book

Also: The Companion Website provides the following features:
- Search tool to help locate specific items of content
- E-mail results and profile tools to send results of quizzes to instructors
- Online help and support to assist with website usage and troubleshooting

For more information please contact your local Pearson Education sales representative or visit www.pearsoned.co.uk/estrin
