Introduction to the Series xxv

Section 1 Design of Contracts and Securities 1
Overview by Franklin Allen (Pennsylvania)

1 The Design of Debt Contracts 5
Paolo Fulghieri (UNC) and Eitan Goldman (Indiana University, Bloomington)

1. Introduction 6
2. Debt Contracts and Costly State Verification 8
   2.1. Multiperiod Contracts 11
   2.2. Stochastic Monitoring 12
3. Debt Contracts and the Allocation of Control Rights 13
4. Debt Contracts and the Provision of Incentives 17
5. Debt Contracts under Asymmetric Information 18
6. The Structure of Debt Contracts 24
   6.1. Seniority 24
   6.2. Maturity Structure 26
   6.3. Collateral 32
   6.4. The Number of Creditors 34
7. Concluding Remarks 36
   References 36

2 Subordination Levels in Structured Financing 41
Xudong An (SDSU), Yongheng Deng (USC), and Anthony B. Sanders (ASU)

1. Introduction 42
2. Structured Financing and the Pooling and Tranching of Assets 43
## Contents

2. Bank Size and Lending 109
   2.1. *Do Large Banks Lend More Than Small?* 109
   2.2. *Do Large Banks Lend Differently from Small Banks?* 111
   2.3. *Bank Size, Organization Structure, and Lending* 116
   2.4. *How Does Bank Size Affect Credit Availability?* 117
3. Deposit–Lending Synergies 121
   3.1. *Do Deposits Make Banks Better Lenders?* 121
   3.2. *Banks as Liquidity Providers* 123
4. Conclusion 125

References 128

5 Optimal Industrial Structure in Banking 133

*Loretta J. Mester (FRB Philadelphia, The Wharton School)*

1. Introduction and Motivation 134
2. Efficiency Concepts 137
3. Empirical Implementation 140
   3.1. *Bank Production* 140
   3.2. *Cost Minimization* 141
   3.3. *Profit Maximization* 144
   3.4. *More Complicated Objectives* 145
4. Measurement 148
   4.1. *Estimation Techniques* 148
   4.2. *Functional Form, Variable Selection, and Variable Measurement* 150
   4.3. *Special Issues in Banking* 151
5. Empirical Findings in the Literature 153
   5.1. *Scale Economies* 153
   5.2. *Scope Economies* 157
   5.3. *X-Efficiency* 158
   5.4. *Productivity* 159
6. Conclusion 160

References 160

6 Commercial Banks in Investment Banking 163

*Amar Gande (SMU)*

1. Introduction 164
2. Tradeoffs in Combining Lending and Underwriting 168
   2.1. *Costs of Combining Lending and Underwriting* 168
   2.2. *Benefits of Combining Lending and Underwriting* 170
   2.3. *Theory* 171
   2.4. *Empirical Evidence from Debt Underwritings* 171
   2.5. *Empirical Evidence from Equity Underwritings* 175
   2.6. *Organizational Form of Underwriting* 178
3. Competitive Effects of Commercial Bank Entry into Securities Underwriting 182
   3.1. Theory 182
   3.2. Empirical Evidence on Commercial Bank Entry in 1989 182
4. Conclusion 186
References 186

Section 4 Mutual Funds 189
Overview by Sudipto Bhattacharya (LSE)

7 Performance Measurement and Evaluation 191
Bruce Lehmann (UCSD) and Allan Timmermann (UCSD)
1. Introduction 192
2. Theoretical Benchmarks 194
   2.1. Sources of Benchmarks 197
   2.2. A First Pass at Performance Measurement 199
   3.1. Alternative Models of Market Timing 205
   3.2. Observable Information Signals 218
4. Performance Measurement and Attribution with Observable Portfolio Weights 220
   4.1. Should Investors Hold Mutual Funds? 229
   4.2. Determining the Optimal Holdings in Mutual Funds 231
5. The Cross Section of Managed Portfolio Returns 233
   5.1. Inference in the Absence of Performance Ability 234
   5.2. Power of Statistical Tests for Individual Funds 241
   5.3. Inference for Multiple Funds 244
   5.4. Empirical Specifications of Alpha Measures 247
6. Bayesian Approaches 249
   6.1. Asset Mispricing and Investment in Mutual Funds 252
7. Conclusion 255
References 256

8 The Behavior of Mutual Fund Investors 259
Lu Zheng (UCI)
1. Introduction 260
2. Examining Investor Behavior Using Fund Flows 261
   2.1. Estimating Mutual Fund Flows 261
   2.2. The Decision to Choose Among Mutual Funds 262
   2.3. Mutual Fund Flows and Aggregate Market Returns 271
3. Investment Performance of Mutual Fund Investors 272
9. Incentives in Funds Management: A Literature Overview

Sudipto Bhattacharya (LSE), Amil Dasgupta (LSE), Alexander Guembel (Oxford), and Andrea Prat (LSE)

1. Introduction
2. Theories of Incentives for Fund Managers and Informative Experts
   2.1. Principal-Agent Models: Effort Choice, Delegation, and Screening
   2.2. Optimal Contracts Based on Verifiable Portfolio Composition Choices and Returns
   2.3. Returns-Based and Relative Performance-Based Contracts
   2.4. Conformist Trading: The Roles of Career Concerns
   2.5. Fund Manager Incentives and Uninformed Trading
   2.6. General Equilibrium Implications of Fund Manager Incentives
3. Evidence on the Choices and Rewards of Analysts and Fund Managers
4. Conclusion
      References

Section 5 Regulation

Overview by Mark J. Flannery, University of Florida

10 Consolidation in the U.S. Banking Industry: Is the “Long, Strange Trip” About to End?

Kenneth D. Jones (FDIC) and Tim Critchfield (FDIC)

   1.1. Industry Size
   1.2. Industry Concentration
2. Fundamental Causes of Consolidation
   2.1. Environmental Factors
   2.2. Microeconomic Factors in Merger Decisions
3. The Effects of Consolidation
4. Projections of Banking Industry Structure
   4.1. Review of Previous Projections and Their Methodologies
   4.2. New Linear Extrapolations: A Comparison with the Literature
   4.3. Beyond Linear Extrapolations
5. Conclusion
      References
11 Safety, Soundness, and the Evolution of the U.S. Banking Industry

Robert DeYoung (Kansas)

1. Introduction 348
2. The Evolution of the U.S. Banking Industry 349
   2.1. Financial Innovation and Technological Change 350
   2.2. Regulatory Reaction to Financial Innovation and Technological Change 353
   2.3. Widespread Technology Adoption and Industry Transformation 353
3. A Stylized View of Banking Strategies 356
   3.1. Prederegulation 358
   3.2. Postderegulation 358
4. Evidence Consistent with the Strategic Map 360
5. Further Implications of Strategic Change 363
   5.1. Industry Structure 363
   5.2. Noninterest Income 366
   5.3. Financial Performance 368
6. Is the Industry Safe and Sound Today? 369
References 371

12 What Caused the Bank Capital Buildup of the 1990s?

Mark J. Flannery (Florida) and Kasturi P. Rangan (CWRU and HBS)

1. Introduction 376
2. Determining a Bank’s Optimal Leverage 378
   3.1. The Supervisors’ Focus: Book Capital Ratios 381
   3.2. Investors’ Focus: Market Capital Ratios 383
   3.3. BHC Portfolio Volatility and Default Risks 384
   3.4. Possible Causes of the Increased Capitalization 386
4. Regression Model 388
   4.1. Lags in Adjusting Toward Target Capitalization 390
   4.2. Econometric Issues 392
   4.3. Data 393
5. Estimation Results 395
   5.1. Decomposing the Change in BHC Capitalization 398
6. Do Higher Market Ratios Reflect Stricter Regulatory Constraints? 401
7. Robustness 404
   7.1. Adjust for Possible Safety Net Subsidies in MKTRAT 405
   7.2. Alternative Instrument for BHCs’ Realized Stock Return 405
   7.3. Estimates for the 20 Largest Banks 405
   7.4. Estimate for 80 “Next Largest” Banks 407
   7.5. Excluding the Charter Value Proxy 407
Contents

8. Summary and Implications 407
   References 408
Appendix 411
   Estimating BHC Risk-Weighted Assets (RWA) in the 1986–91 Period 411

13 Basel II: A Case for Recalibration 413
   Paul H. Kupiec (FDIC)
   1. Introduction 414
   2. A Review of the AIRB Capital Framework 415
      2.1. Discussion 418
   3. The AIRB and Financial Stability 420
   4. Establishing a Sound Benchmark for Risk Measurement Practices 423
      4.1. The Need for Capital for Bank Interest Expenses 423
      4.2. Procyclicality of the AIRB Soundness Standard 427
      4.3. Incorporating Portfolio Interest Income 428
      4.4. Capital for Systematic Risk in PD and LGD 430
      4.5. Random Loss Given Default and “Downturn” LGD 431
      4.6. Asymptotic Portfolio Loss Distribution 432
      4.7. Random Exposures at Default (EADs) 436
   5. Conclusions 437
   References 438

Section 6 Competition and Regulation in Banking 441
   Overview by Xavier Vives (IESE Business and UPF)

14 Competition and Regulation in Banking 449
   Elena Carletti (Frankfurt)
   1. Introduction 450
   2. Bank Instability and the Need of Regulation 452
      2.1. Bank Fragility: Individual Runs and Systemic Crises 452
      2.2. Excessive Risk Taking 457
      2.3. The Need of Regulation 458
   3. Competition in Banking 461
      3.1. Competition Under Asymmetric Information 461
      3.2. Competition and Switching Costs 463
      3.3. Competition and Networks 464
   4. Competition and Stability: A Positive or a Negative Link? 466
      4.1. Market Structure and Financial Fragility 467
      4.2. Market Structure and Risk Taking 470
