Introducing Property Valuation

Michael Blackledge
Part 1: Background

1 Economic context
  1.1 Why is a valuation needed? 3
  1.2 What types of property value are there? 4
  1.3 Important terms and concepts: value, price, worth, cost and market value 5
  1.4 Supply and demand as determinants of price and value 8
  1.5 Land use principles 11
  1.6 The investment and property markets 14
  1.7 Taxation and its effects 15
  1.8 Influence of town and country planning legislation and policies on property values 16

2 The property valuation profession
  2.1 Skills required by and role of the property valuer 20
  2.2 Who may require the services of a valuer? 23
  2.3 Difference between a valuation and a building survey 24
  2.4 The level of accuracy expected of the valuer 26
  2.5 Independence of the valuer 28
  2.6 The role of the Royal Institution of Chartered Surveyors (RICS) as a regulatory and unifying body for the profession 28
2.7 The RICS professional groups 29
2.8 RICS information resources 29
2.9 International dimensions of the profession 30
2.10 Likely future developments including Automated Valuation Models (AVMs) 31

3.1 Types of investment 34
3.2 Types of investor 46
3.3 Nominal and real returns on investments 46
3.4 The ‘ideal’ investment 48
3.5 Risk and yields 49
3.6 The reverse yield gap 51
3.7 Real property as an investment 52
3.8 Investment evaluation and selection 53
3.9 Methods of purchase and sale 57

Part 2: Valuation mathematics 63

4.1 Simple interest 65
4.2 Compound interest 66
4.3 ‘Traditional’ annually in arrear tables and formulae 68
4.4 Use of calculators and computers 69
4.5 The concepts of compounding and discounting 70
4.6 All risks yields (ARYs) and implied risk/growth allowances 71
4.7 Amount of £1 calculations 73
4.8 Present Value of £1 calculations 73
4.9 Amount of £1 per annum calculations 74

5.1 Role and relevance of sinking funds 78
5.2 Calculation of sinking funds 79
5.3 Effects of tax and adjustments made 80
5.4 Sinking funds and leaseholds 82
5.5 Mortgages and their repayment calculations 82

6.1 Income flows and capital sums 88
6.2 Years purchase in perpetuity 91
6.3 Single rate years purchase for a number of years 92
6.4 Years purchase of a reversion to perpetuity 93
6.5 Years purchase (single rate) deferred 94
6.6 Remunerative and accumulative rates of interest in leasehold valuations 95
6.7 Years purchase dual rate for a number of years 96
6.8 Dual rate years purchase (tax adjusted) 97

7 Alternative valuation tables and formulae  
7.1 Background and historical development  
7.2 Annually in advance calculations  
7.3 Income in advance or in arrear and not receivable annually  
7.4 Quarterly in advance dual rate tax adjusted years purchases  
7.5 *Rose's Tables*  
7.6 *Bowcock's Tables*  
7.7 *Donaldsons' Investment Tables*  
7.8 Practical effects of using alternative tables and formulae  

**Part 3: Valuation methods**  
8 Methods of measurement  
8.1 Overview of RICS *Code of Measuring Practice*  
8.2 Gross external area (GEA)  
8.3 Gross internal area (GIA)  
8.4 Net internal area (NIA)  

9 RICS valuation standards: The *Red Book*  
9.1 Valuation Standards and Guidance Notes  
9.2 Valuation Information Papers  
9.3 Form and content of valuation reports  
9.4 Loan valuations  

10 Comparison method  
10.1 Basis of method  
10.2 Units of comparison and application of the method to the various property types  
10.3 Property market evidence and information sources  
10.4 Making qualitative and quantitative adjustments to comparable evidence  
10.5 Methods of assessing market rent  
10.6 Assessing ground rents  
10.7 Indexed rents  
10.8 Annual equivalents  

11 Investment method: traditional  
11.1 Basis of method  
11.2 Valuation layout  
11.3 Choice of all risks yield  
11.4 Differences between freehold and leasehold all risks yields  
11.5 Initial yields  
11.6 Reversionary yields
Contents

11.7 Equivalent yields • 201
11.8 Equated yields • 201
11.9 Analysis of a property yield • 202
11.10 Term and reversion valuations using the ‘block income’ approach • 204
11.11 From term and reversion with differential yields to equivalent yield approach • 209
11.12 ‘Hardcore’ or ‘layer’ approach • 215
11.13 Gross versus net of tax calculations and effects of tax on leasehold valuations • 222
11.14 Different types of lease repairing-and insuring terms and effects of property outgoings on net rental income • 225

12 Investment method: discounted cash flow • 240
12.1 Discounted cash flow methods • 240
12.2 Use of computer spreadsheets and other software • 244
12.3 Future property rental and capital growth • 245
12.4 Equated yield and implied rental growth formulae • 250
12.5 Application of the method to property investments, including holding period and exit yield • 251
12.6 DCF method compared with ‘traditional’ property valuation methods • 257
12.7 ‘Short-cut’ freehold DCF valuations • 259
12.8 Leasehold DCF valuations • 260
12.9 Combining the methods in a single valuation appraisal: block income, layer, equivalent yield and equated yield/DCF approaches • 263

13 Residual method • 269
13.1 Basis of method and when used • 269
13.2 Simple and more complex methods • 280
13.3 Reliability and limitations of method • 286

14 Profits method • 289
14.1 Basis and variations of method and when used • 289
14.2 Reliability and limitations of method • 297
14.3 Turnover rents and leases • 303

15 Cost methods • 308
15.1 Basis of cost methods and when used • 308
15.2 Age, obsolescence and depreciation • 310
15.3 Format and content of calculations • 313
15.4 Costs in use • 317

Part 4 Applied valuations • 319

16 Landlord and tenant valuations • 321
16.1 Calculation of a premium on the grant of a lease at a reduced rent • 322
16.2 Capital payment on assignment of a lease 324
16.3 Lease surrender and renewals 324
16.4 Premium on variation of a condition of a lease 332
16.5 Sale and leaseback 333
16.6 Marriage valuations 335
16.7 Divorce valuations 342
16.8 Effect of improvements and restrictive user clauses on valuations 343
16.9 Constant rent 348
16.10 Rental equivalent on an annual tenancy 352
16.11 Problems with leasehold valuations, including double sinking fund error theory and relevance of ‘dual rate’ calculations 353
16.12 ‘Reverse premiums’ 357
16.13 Lease inducements 358
16.14 Virtual or equivalent rent and valuation analysis of lease inducements 359
16.15 The problem of overrented property and its valuation 362
