Contents

1. Introduction 1
   What is this book? 10
   A quick overview of the influences on this book 11
   The plan of this book 14

2. The spatial equilibrium within the city 18
   Spatial equilibrium in the Alonso–Muth–Mills model 18
   Transport technologies 23
   Endogenizing land areas 25
   Building housing 29
   Income heterogeneity 33
   Endogenous and exogenous amenities 37
   Job decentralization within the metropolitan area 40
   Using the model to understand urban history 44

3. The spatial equilibrium across cities 47
   The static model and the Rosen–Roback framework 49
   The dynamic framework and urban growth 68
   Multiple skill levels and the rise of the skilled city 80
   Housing supply heterogeneity and urban decline 99
   High frequency housing price dynamics 111

4. Agglomeration economies 116
   Income and density 117
   Measuring concentration: Natural advantage vs. agglomeration 125
   Reducing transport costs 131
   The division of labor is limited by the extent of the market 138
   Labor market pooling 141
   Matching in cities 144
   Learning in cities 148
   Testing different theories: The coagglomeration evidence 154
   The evolution of agglomeration economies 156
