Essays on Microeconometrics and Immigrant Assimilation

Alpaslan Akay
Abstract
Preface
Paper I. Asymptotic bias reduction for a conditional marginal effects estimator in sample selection models.

Alpaslan Akay and Elias Tsakas

I Introduction
II Heckman Procedure and Marginal Effects
III Approximating Average Marginal Effects
IV Empirical Applications
   Earnings assimilation of immigrants in Sweden
   Monte Carlo simulation
V Concluding Discussion
References
Appendix

Alpaslan Akay and Kerem Tezic

1 Introduction
2 Econometric specifications
   2.1 The assimilation model
   2.2 Identification of the model and quasi-fixed effects approach for the unobserved individual effects
   2.3 The estimator of assimilation
3 The data
4 Empirical analysis
   4.1 Local unemployment-rates and the identification of economy-wide conditions on employment probabilities and earnings
   4.2 Earnings and employment assimilation with local unemployment-rates
   4.3 Cohort effects
   4.4 Effects of the educational attainments on assimilation
5 Discussion and conclusions
References

Alpaslan Akay

1 Introduction
2 The model and three solution methods of the initial values problem
3 Monte Carlo experiments and the results
   3.1  $MCE_1$: Benchmark design. A normal explanatory variable
   3.2  $MCE_2$: A non-normal explanatory variable
   3.3  $MCE_3$: An autocorrelated explanatory variable
4 Discussion and conclusions
References

Alpaslan Akay

1 Introduction
2 Hypotheses
3 Econometric specifications
   3.1 Specification of the Dynamic Assimilation Model
   3.2 Identification
   3.3 The initial values problem, unobserved individual-effects and estimators
4 The data
5 Empirical analysis
   5.1 Structural state-dependence, unobserved individual-effects, and local and arrival-year unemployment elasticities
   5.2 Predicting employment- and earnings-assimilation from static and dynamic models
      5.2.1 Dynamic employment-assimilation of immigrants, by region and country of origin
      5.2.2 Dynamic earnings-assimilation of immigrants, by region and country of origin
   5.3 Cohort effects
6 Discussion and conclusions
