  The Birth of the Welfare State ....................................... 34
  The Bretton Woods Agreement ....................................... 37
  The International Monetary Fund (IMF) .......................... 38
  The Bank for Reconstruction and Development (the World Bank) .......................................................... 39
  General Agreement on Tariffs and Trade (GATT) .............. 40
  The Marshall Plan ........................................................ 41
  The Point Four ............................................................ 43
  The Brave New Post War World ...................................... 44

3 Laying the Foundations of Keynesian Economics .................. 45
  Aggregate Supply and Aggregate Demand ......................... 46
  National Income Accounting ......................................... 51
  The Rise of Econometrics ............................................ 53
  Simultaneity and Identification ..................................... 55
  Errors in Variables ...................................................... 57
Adaptive Expectations Model ........................................ 58
Partial Adjustment Model ............................................ 61
Discounting and Present Value ...................................... 61
The Consumption Function .......................................... 62
Permanent Income Hypothesis ....................................... 65
Cross Section Estimate of Propensity to Consume .............................. 68
Life Cycle Hypothesis .................................................. 69
The Investment Function .............................................. 71
Tobin's q ............................................................... 74
Demand for Money ...................................................... 74
The Growth Model of Harrod and Domar ............................... 76
Solow's Model .......................................................... 80
Solow Residual .......................................................... 82
The Golden Age of Macroeconomics ................................ 83

4 Keynesian Economics in Action ..................................... 85
Okun's Law ............................................................. 89
The Phillips Curve ....................................................... 91
Stagflation ............................................................... 93
The Natural Rate of Unemployment ................................... 95
Rational Expectations .................................................. 96
The Augmented Phillips Curve ....................................... 98
Income Distribution ................................................... 100

5 Macroeconomics of an Open Economy ............................. 103
Equilibrium in an Open Economy .................................... 108
Fixed Exchange Rates with Capital and Foreign Exchange Controls .................................................. 109
Monetary and Fiscal Policies Under Capital Mobility ............. 110
Monetary Policy Under Fixed Exchange Rates ..................... 111
Fiscal Policy Under Fixed Exchange Rates ......................... 113
Monetary Policy Under Flexible Exchange Rates ................ 114
Fiscal Policy Under Flexible Exchange Rates ..................... 115
The Preeminence of Monetary Policy in the 21st Century .......... 116

6 The Collapse of Post-War International Economic Order ...... 117
A New Economic Policy ............................................... 117
The Aftermath .......................................................... 122
The End of Bretton Woods .......................................... 123
Milton Friedman and Flexible Exchange Rates .................... 125
The Oil Shocks ........................................................ 126
OPEC ................................................................. 127
The Sources of Oil Shocks .......................................... 128

7 The New Classical Revolt Against Activist Economic Policy ... 131
Microfoundations ....................................................... 132
Coordination Mechanism ............................................ 133
Empirical Validity of the Keynesian Model ........................................... 135
The Identification Problem ................................................................. 135
The New Classical Criticism of Keynesian Policies ................................. 136
Policy Ineffectiveness ........................................................................... 136
The Lucas Critique ................................................................................ 138
Time Series Analysis ............................................................................. 142
Stationary Series and ARIMA Models ...................................................... 142
Wold's Theorem ..................................................................................... 143
Spurious Regression .............................................................................. 146
Causality ................................................................................................. 147
VAR Modeling ......................................................................................... 147
Deterministic vs. Stochastic Trend .......................................................... 148
Cointegration and Error Correction ......................................................... 150

8 Business Cycles: Evidence, Theory, and Policy .................................... 153
Forecasting Recessions and Recovery ....................................................... 155
Frisch's Theory of Cycles ........................................................................ 157
Samuelson's Model of Interaction Between Multiplier and Acceleration 159
Hicks's Model of Two Limits ................................................................... 160
A Critique of Keynesian Models of Business Cycles ............................... 162
Real Business Cycles Theory ................................................................. 162
A Simple Model of Real Business Cycles ............................................... 162
Dynamic Stochastic General Equilibrium Models .................................... 164
Calibration .............................................................................................. 166
A Bayesian Interpretation of Calibration ................................................. 168
New Keynesian Models with Nominal and Real Rigidities ....................... 169
Convergence in Macroeconomics: DSGE Models with New Keynesian Features ................................................................. 170
Business Cycles and Economic Policy ..................................................... 171
Economic Model as a Means of Communication ...................................... 173
An Anti Empirical Trait Among Economists .......................................... 174

9 Money, Monetary Policy, and Monetarism .......................................... 179
The Quantity Theory of Money ............................................................... 182
The Money Supply Process .................................................................... 184
The Federal Funds Market ..................................................................... 187
Open Market Operation and FOMC ....................................................... 188
Targeting Money Supply vs. the Federal Funds Rate .............................. 189
Central Bank's Credibility .................................................................... 190
Central Bank's Independence ................................................................. 190
Inflation Targeting ................................................................................ 192
Monetarism Program for Monetary Stability ......................................... 193
Rules vs. Discretion .............................................................................. 193
Time Inconsistency of Optimal Plans ...................................................... 194
The Term Structure of Interest Rates ..................................................... 195
The Market Segmentation Hypothesis .................................................... 197
