Preface xvii
  Why This Book? xvii
  For Whom? xviii
  Outline of the Book xix
Acknowledgments xxi

### Introduction 1

1.1 Why Study Economic Growth? 1
1.2 Some Facts and Puzzles 1
  1.2.1 Growth and Poverty Reduction 1
  1.2.2 Convergence 2
  1.2.3 Growth and Inequality 4
  1.2.4 The Transition from Stagnation to Growth 5
1.3 Growth Policies 6
  1.3.1 Competition and Entry 7
  1.3.2 Education and Distance to Frontier 8
  1.3.3 Macroeconomic Policy and Growth 10
  1.3.4 Trade and Growth 10
  1.3.5 Democracy and Growth 11
1.4 Four Growth Paradigms 12
  1.4.1 The Neoclassical Growth Model 12
  1.4.2 The AK Model 13
  1.4.3 The Product-Variety Model 14
  1.4.4 The Schumpeterian Model 15

### PART I: BASIC PARADIGMS OF GROWTH THEORY 19

1 Neoclassical Growth Theory 21
  1.1 Introduction 21
  1.2 The Solow-Swan Model 21
    1.2.1 Population Growth 24
    1.2.2 Exogenous Technological Change 27
    1.2.3 Conditional Convergence 29
  1.3 Extension: The Cass-Koopmans-Ramsey Model 31
    1.3.1 No Technological Progress 31
3.3.2 The Importance of Exit in the Growth Process 79
3.4 Conclusion 80
3.5 Literature Notes 81
Problems 82

4 The Schumpeterian Model 85
4.1 Introduction 85
4.2 A One-Sector Model 85
4.2.1 The Basics 85
4.2.2 Production and Profits 86
4.2.3 Innovation 87
4.2.4 Research Arbitrage 88
4.2.5 Growth 89
4.2.6 A Variant with Nondrastic Innovations 90
4.2.7 Comparative Statics 91
4.3 A Multisector Model 92
4.3.1 Production and Profit 92
4.3.2 Innovation and Research Arbitrage 94
4.3.3 Growth 95
4.4 Scale Effects 96
4.5 Conclusion 99
4.6 Literature Notes 100
Problems 101

5 Capital, Innovation, and Growth Accounting 105
5.1 Introduction 105
5.2 Measuring the Growth of Total Factor Productivity 106
5.2.1 Empirical Results 107
5.3 Some Problems with Growth Accounting 109
5.3.1 Problems in Measuring Capital, and the Tyranny of Numbers 109
5.3.2 Accounting versus Causation 112
5.4 Capital Accumulation and Innovation 113
5.4.1 The Basics 114
5.4.2 Innovation and Growth 116
5.4.3 Steady-State Capital and Growth 116
5.4.4 Implications for Growth Accounting 118
5.5 Conclusion 119  
5.6 Literature Notes 119  
Appendix: Transitional Dynamics 120  
Problems 121  

PART II: UNDERSTANDING THE GROWTH PROCESS 127  

6 Finance and Growth 129  
6.1 Introduction 129  
6.2 Innovation and Growth with Financial Constraints 130  
6.2.1 Basic Setup 130  
6.2.2 Innovation Technology and Growth without Credit Constraint 132  
6.2.3 Credit Constraints: A Model with Ex Ante Screening 132  
6.2.4 A Model with Ex Post Monitoring and Moral Hazard 134  
6.3 Credit Constraints, Wealth Inequality, and Growth 136  
6.3.1 Diminishing Marginal Product of Capital 136  
6.3.2 Productivity Differences 139  
6.4 The Empirical Findings: Levine’s Survey, in a Nutshell 142  
6.4.1 Cross-Country 143  
6.4.2 Cross-Industry 145  
6.5 Conclusion 147  
6.6 Literature Notes 147  
Problems 148  

7 Technology Transfer and Cross-Country Convergence 151  
7.1 Introduction 151  
7.2 A Model of Club Convergence 152  
7.2.1 Basics 152  
7.2.2 Innovation 153  
7.2.3 Productivity and Distance to Frontier 154  
7.2.4 Convergence and Divergence 156  
7.3 Credit Constraints as a Source of Divergence 158  
7.3.1 Theory 159  
7.3.2 Evidence 161  
7.4 Conclusion 163  
7.5 Literature Notes 165  
Problems 166
10.3.2 Physical-Capital Accumulation 227
10.4 From Manufacturing to Services 230
10.5 Conclusion 232
10.6 Literature Notes 232
Problems 233

11 Institutions and Nonconvergence Traps 237
11.1 Introduction 237
11.2 Do Institutions Matter? 238
11.2.1 Legal Origins 239
11.2.2 Colonial Origins 240
11.3 Appropriate Institutions and Nonconvergence Traps 243
11.3.1 Some Motivating Facts 243
11.3.2 A Simple Model of Distance to Frontier and Appropriate Institutions 246
11.4 Conclusion 258
11.5 Literature Notes 261
Problems 263

PART III: GROWTH POLICY 265
12 Fostering Competition and Entry 267
12.1 Introduction 267
12.2 From Leapfrogging to Step-by-Step Technological Progress 267
12.2.1 Basic Environment 268
12.2.2 Technology and Innovation 269
12.2.3 Equilibrium Profits and Competition in Level and Unlevel Sectors 269
12.2.4 The Schumpeterian and "Escape-Competition" Effects 271
12.2.5 Composition Effect and the Inverted U 272
12.2.6 Empirical Evidence 274
12.3 Entry 274
12.3.1 The Environment 276
12.3.2 Technology and Entry 276
12.3.3 Equilibrium Innovation Investments 277
12.3.4 The Effect of Labor Market Regulations 278
12.3.5 Main Theoretical Predictions 279

15 Liberalizing Trade 353
15.1 Introduction 353
15.2 Preliminary: Back to the Multisector Closed-Economy Model 355
15.2.1 Production and National Income 355
15.2.2 Innovation 357
15.3 Opening Up to Trade, Abstracting from Innovation 358
15.3.1 The Experiment 358
15.3.2 The Effects of Openness on National Income 360
15.4 The Effects of Openness on Innovation and Long-Run Growth 363
15.4.1 Step-by-Step Innovation 363
15.4.2 Three Cases 364
15.4.3 Equilibrium Innovation and Growth 365
15.4.4 Scale and Escape Entry 365
15.4.5 The Discouragement Effect of Foreign Entry 366
15.4.6 Steady-State Aggregate Growth 367
15.4.7 How Trade Can Enhance Growth in All Countries 368
15.4.8 How Trade Can Reduce Growth in One Country 369
15.5 Conclusion 371
15.6 Literature Notes 372
Problems 374

16 Preserving the Environment 377
16.1 Introduction 377
16.2 The One-Sector AK Model with an Exhaustible Resource 377
16.3 Schumpeterian Growth with an Exhaustible Resource 379
16.4 Environment and Directed Technical Change 381
16.4.1 Basic Setup 381
16.4.2 Equilibrium Outputs and Profits 382
16.4.3 Taxing Dirty Production 384
16.4.4 Equilibrium Innovation 385
16.4.5 Growth and the Cost of Taxing Dirty Output 387
