3.3.3 The Probability Density Function of $T_x$ 67
3.3.4 The Hazard Rate Function of $T_x$ 68
3.3.5 Moments of the Future Lifetime Random Variable $T_x$ 68
3.3.6 The Time-to-Failure Random Variable $K_x$ 71
3.4 The Central Rate 73
3.5 Select Survival Models 75
3.6 Exercises 76

CHAPTER 4 THE LIFE TABLE (DISCRETE TABULAR CONTEXT) 81

4.1 Definition of the Life Table 81
4.2 The Traditional Form of the Life Table 83
4.3 Other Functions Derived from $l_x$ 85
  4.3.1 The Force of Failure 86
  4.3.2 The Probability Density Function of $X$ 88
  4.3.3 Conditional Probabilities and Densities 90
  4.3.4 The Curtate Expectation of Life 94
  4.3.5 The Central Rate 96
4.4 Summary of Concepts and Notation 97
4.5 Methods for Non-Integral Ages 97
  4.5.1 Linear Form for $\ell_{x+t}$ 100
  4.5.2 Exponential Form for $\ell_{x+t}$ 104
  4.5.3 Hyperbolic Form for $\ell_{x+t}$ 106
  4.5.4 Summary 108
4.6 Select Life Tables 109
4.7 Life Table Summary 112
4.8 Exercises 113

CHAPTER 5 CONTINGENT PAYMENT MODELS (INSURANCE MODELS) 121

5.1 Discrete Stochastic Models 122
  5.1.1 The Discrete Random Variable for Time of Failure 122
  5.1.2 The Present Value Random Variable 122
  5.1.3 Modifications of the Present Value Random Variable 126
  5.1.4 Applications to Life Insurance 131
5.2 Group Deterministic Approach 135
5.3 Continuous Stochastic Models 138
5.3.1 The Continuous Random Variable for Time to Failure 138
5.3.2 The Present Value Random Variable 139
5.3.3 Modifications of the Present Value Random Variable 141
5.3.4 Applications to Life Insurance 141
5.3.5 Continuous Functions Evaluated from Parametric Survival Models 142
5.4 Contingent Payment Models with Varying Payments 145
5.5 Continuous and $m^{thly}$ Functions Approximated from the Life Table 148
5.5.1 Continuous Contingent Payment Models 148
5.5.2 $m^{thly}$ Contingent Payment Models 151
5.6 Miscellaneous Examples 153
5.7 Exercises 156

CHAPTER 6 CONTINGENT ANNUITY MODELS (LIFE ANNUITIES) 161
6.1 Whole Life Annuity Models 162
6.1.1 The Immediate Case 163
6.1.2 The Due Case 169
6.1.3 The Continuous Case 171
6.2 Temporary Annuity Models 174
6.2.1 The Immediate Case 174
6.2.2 The Due Case 179
6.2.3 The Continuous Case 182
6.3 Deferred Whole Life Annuity Models 185
6.3.1 The Immediate Case 185
6.3.2 The Due Case 187
6.3.3 The Continuous Case 188
6.4 Contingent Annuities Payable $m^{thly}$ 191
6.4.1 The Immediate Case 191
6.4.2 The Due Case 192
6.4.3 Random Variable Analysis 193
6.4.4 Numerical Evaluation in the $m^{thly}$ and Continuous Cases 195
6.5 Non-Level Payment Annuity Functions 197
6.6 Miscellaneous Examples 198
6.7 Exercises 203
## Table of Contents

### Chapter 7  Funding Plans for Contingent Contracts (Annual Premiums) 211

7.1 Annual Funding Schemes for Contingent Payment Models 212
   7.1.1 Discrete Contingent Payment Models 212
   7.1.2 Continuous Contingent Payment Models 217
   7.1.3 Contingent Annuity Models 218
   7.1.4 Non-Level Premium Contracts 218

7.2 Random Variable Analysis 219

7.3 Continuous Payment Funding Schemes 224
   7.3.1 Discrete Contingent Payment Models 224
   7.3.2 Continuous Contingent Payment Models 225

7.4 Funding Schemes with $m^{th}$ Payments 228

7.5 Funding Plans Incorporating Expenses 230

7.6 Miscellaneous Examples 233

7.7 Exercises 240

### Chapter 8  Contingent Contract Reserves (Benefit Reserves) 245

8.1 Reserves for Contingent Payment Models with Annual Payment Funding 247
   8.1.1 Reserves by the Prospective Method 247
   8.1.2 Reserves by the Retrospective Method 250
   8.1.3 Additional Terminal Reserve Expressions 253
   8.1.4 Random Variable Analysis 255
   8.1.5 Reserve for Contingent Contracts with Immediate Payment of Claims 257
   8.1.6 Reserves for Contingent Annuity Models 258

8.2 Recursive Relationships for Discrete Models with Annual Premiums 259
   8.2.1 Group Deterministic Approach 259
   8.2.2 Random Variable Analysis – Cash Basis 263
   8.2.3 Random Variable Analysis – Accrued Basis 266

8.3 Reserves for Contingent Payment Models with Continuous Payment Funding 270
   8.3.1 Discrete Whole Life Contingent Payment Models 270
   8.3.2 Continuous Whole Life Contingent Payment Models 271
   8.3.3 Random Variable Analysis 275
TABLE OF CONTENTS

8.4 Reserves for Contingent Payment Models with $m^{thly}$ Payment Funding 276
8.5 Incorporation of Expenses 279
8.6 Reserves at Fractional Durations 280
8.7 Generalization to Non-Level Benefits and Premiums 282
  8.7.1 Discrete Models 282
  8.7.2 Continuous Models 286
8.8 Miscellaneous Examples 288
8.9 Exercises 292

CHAPTER 9 Models Dependent on Multiple Survivals
(Multi-Life Models) 299

9.1 The Joint-Life Model 299
  9.1.1 The Time-to-Failure Random Variable for a Joint-Life Status 300
  9.1.2 Survival Distribution Function of $T_{xy}$ 300
  9.1.3 Cumulative Distribution Function of $T_{xy}$ 300
  9.1.4 Probability Density Function of $T_{xy}$ 302
  9.1.5 Hazard Rate Function of $T_{xy}$ 303
  9.1.6 Conditional Probabilities 303
  9.1.7 Moments of $T_{xy}$ 305
9.2 The Last-Survivor Model 306
  9.2.1 The Time-to-Failure Random Variable for a Last-Survivor Status 306
  9.2.2 Functions of the Random Variable $T_{xy}$ 307
  9.2.3 Relationships Between $T_{xy}$ and $T_{xy}$ 310
9.3 Contingent Probability Functions 311
9.4 Contingent Contracts Involving Multi-Life Statuses 314
  9.4.1 Contingent Payment Models 314
  9.4.2 Contingent Annuity Models 316
  9.4.3 Annual Premiums and Reserves 317
  9.4.4 Reversionary Annuities 319
  9.4.5 Contingent Insurance Functions 321
9.5 General Random Variable Analysis 322
  9.5.1 Marginal Distributions of $T_x$ and $T_y$ 322
  9.5.2 The Covariance of $T_x$ and $T_y$ 323
  9.5.3 Other Joint Functions of $T_x$ and $T_y$ 325
  9.5.4 Joint and Last-Survivor Status Functions 328
9.6 Common Shock – A Model for Lifetime Dependency 330
9.7 Exercises 333
**TABLE OF CONTENTS**

**CHAPTER 10** MULTIPLE CONTINGENCIES WITH APPLICATIONS (MULTIPLE-DECREMENT MODELS) 339

10.1 Discrete Multiple-Decrement Models 339  
10.1.1 The Multiple-Decrement Table 341  
10.1.2 Random Variable Analysis 344  
10.2 Theory of Competing Risks 346  
10.3 Continuous Multiple-Decrement Models 347  
10.4 Uniform Distribution of Decrement 352  
10.4.1 Uniform Distribution in the Multiple-Decrement Context 352  
10.4.2 Uniform Distribution in the Associated Single-Decrement Tables 354  
10.5 Actuarial Present Value 357  
10.6 Asset Shares 363  
10.7 Multi-State Models 366  
10.7.1 The Homogeneous Process 366  
10.7.2 The Nonhomogeneous Process 372  
10.8 Exercises 374

**PART THREE:**  
MODELS FOR NON-SURVIVAL-CONTINGENT RISKS

**CHAPTER 11** CLAIM FREQUENCY MODELS 383

11.1 Section 2.2 (Discrete Distributions) Revisited 383  
11.1.1 The Binomial Distribution 383  
11.1.2 The Poisson Distribution 384  
11.1.3 The Negative Binomial Distribution 389  
11.1.4 The Geometric Distribution 393  
11.1.5 Summary of the Recursive Relationships 393  
11.1.6 Probability Generating Functions 394  
11.2 Creating Additional Counting Distributions 397  
11.2.1 Compound Frequency Models 397  
11.2.2 Mixture Frequency Models 402  
11.2.3 Truncation or Modification at Zero 405  
11.3 Counting Processes 409  
11.3.1 Properties of Counting Processes 410  
11.3.2 The Poisson Counting Process 411
11.3.3 Further Properties of the Poisson Counting Process 412
11.3.4 Poisson Mixture Processes 415
11.3.5 The Nonstationary Poisson Counting Process 415
11.4 Exercises 418

CHAPTER 12 CLAIM SEVERITY MODELS 425

12.1 Fundamental Continuous Distributions 426
12.1.1 The Normal and Exponential Distributions 426
12.1.2 The Pareto Distribution 426
12.1.3 Analytic Measures of Tail Weight 429
12.2 Generating New Distributions 431
12.2.1 Summation 431
12.2.2 Scalar Multiplication 431
12.2.3 Power Operations 434
12.2.4 Exponentiation and the Lognormal Distribution 437
12.2.5 Summary of Severity Distributions 439
12.2.6 Mixtures of Distributions 442
12.2.7 Spliced Distributions 448
12.2.8 Limiting Distributions 450
12.3 Modifications of the Loss Random Variable 451
12.3.1 Deductibles 452
12.3.2 Policy Limits 454
12.3.3 Relationships between Deductibles and Policy Limits 457
12.3.4 Coinsurance Factors 460
12.3.5 The Effect of Inflation 461
12.3.6 Effect of Coverage Deductibles on Frequency Models 463
12.4 Tail Weight Revisited; Risk Measures 470
12.4.1 The Mean Excess Loss Function 471
12.4.2 Conditional Tail Expectation 474
12.4.3 Value at Risk 475
12.4.4 Distortion Risk Measures 476
12.4.5 Risk Measures Using Discrete Distributions 479
12.4.6 Other Risk Measures 481
12.5 Empirical Loss Distributions 481
12.6 Exercises 485
# Table of Contents

## Chapter 13 Models for Aggregate Payments 495

13.1 Individual Risk versus Collective Risk 495  
13.2 Selection of Frequency and Severity Distributions 499  
13.2.1 Frequency 499  
13.2.2 Severity 500  
13.2.3 Frequency-Severiry Interaction 501  
13.3 More on the Collective Risk Model 502  
13.3.1 Convolutions of the Probability Function of $X$ 502  
13.3.2 Convolutions of the CDF of $X$ 508  
13.3.3 Continuous Severity Distributions 512  
13.3.4 A Final Thought Regarding Convolutions 519  
13.4 Effect of Coverage Modifications 520  
13.4.1 Modifications Applied to Individual Losses 521  
13.4.2 Modifications Applied to the Aggregate Loss (Stop-Loss Reinsurance) 523  
13.5 Infinitely Divisible Distributions 528  
13.5.1 Definition of Infinite Divisibility 528  
13.5.2 The Poisson Distribution 529  
13.5.3 The Negative Binomial Distribution 529  
13.6 Exercises 529

## Chapter 14 Process Models 537

14.1 The Compound Poisson Process 537  
14.1.1 Moments of the Compound Poisson Process 538  
14.1.2 Other Properties of the Compound Poisson Process 539  
14.2 The Surplus Process Model 540  
14.3 The Probability of Ruin 543  
14.3.1 The Adjustment Coefficient 544  
14.3.2 The Probability of Ruin 547  
14.4 The Distribution of Surplus Deficit 550  
14.4.1 The Event of $U(t) < u$ 550  
14.4.2 The Cumulative Loss of Surplus 553  
14.5 Probability of Ruin in Finite Time 557  
14.6 Exercises 558
APPENDIX A  REVIEW OF MARKOV CHAINS  565
APPENDIX B  REVIEW OF STOCHASTIC SIMULATION  587
APPENDIX C  EVALUATION BY SIMULATION  605
APPENDIX D  USING MICROSOFT EXCEL AND VISUAL BASIC
             MACROS TO COMPUTE ACTUARIAL FUNCTIONS  625
APPENDIX E  REVIEW OF THE INCOMPLETE GAMMA FUNCTION  641

ANSWERS TO TEXT EXERCISES  649
