

Technology Infrastructure

Edited by Cristiano Antonelli, Albert N. Link
and Stan Metcalfe

Contents

Technology Infrastructure: Introduction to the Special Issue <i>by Cristiano Antonelli Albert N. Link and Stan Metcalfe</i>	vii
1 Modeling and Measuring the Economic Roles of Technology Infrastructure <i>by Gregory Tasse</i>	1
2 Public Technology Infrastructure, R&D Sourcing, and Research Joint Ventures <i>by J. D. Adams, M. Marcu and A. J. Wang</i>	16
3 Public–Private Partnership to Develop Technology Infrastructure: a Case Study of the Economic Returns of DNA Diagnostics <i>by Alan C. O'Connor and Brent R. Rowe</i>	34
4 Research Networks as Infrastructure for Knowledge Diffusion in European Regions <i>by Lorenzo Cassi, Nicoletta Corrocher, Franco Malerba and Nicholas Vonortas</i>	47
5 Intelligent Machine Technology and Productivity Growth <i>by David P. Leech and John T. Scott</i>	61
6 To Admit or Not To Admit: the Question of Research Park Size <i>by Stephen K. Layson, Dennis P. Leyden and John Neufeld</i>	72
7 Innovation Platforms and the Governance of Knowledge: Evidence from Italy and the UK <i>by Davide Consoli and Pier Paolo Patrucco</i>	81
8 Assessing the Relative Performance of University Technology Transfer in the US and UK: a Stochastic Distance Function Approach <i>by Donald Siegel, Mike Wright, Wendy Chapple and Andy Lockett</i>	99
9 Placing Innovation: an Approach to Identifying Emergent Technological Activity <i>by Philip Auerswald and Rajendra Kulkarni</i>	112
10 Barriers to the Diffusion of Nanotechnology <i>by Barry Bozeman, John Hardin and Albert N. Link</i>	130
