

Anja Stöbener

**Economic and psychological theories
to cope with information
asymmetries**

Metropolis-Verlag
Marburg 2008

Table of contents

1 INTRODUCTION.....	11
1.1 Goals and research interests	11
1.2 Hypotheses and methodological steps.....	16
1.2.1 Hypothesis 1	16
1.2.2 Hypothesis 2	17
1.3 Related literature	18
1.4 Chapter summary and conclusions	19
2 MARKETS, FIRMS AND ASYMMETRIC INFORMATION.....	21
2.1 Introduction.....	21
2.2 What are information asymmetries?.....	23
2.3 Industrial economics and the concept of transaction costs.....	24
2.3.1 The contribution of Ronald Coase	25
2.3.2 The contribution of Oliver E. Williamson	28
2.3.3 A critical review of the transaction cost approach.....	31
2.4 Selected market phenomena and their relation to asymmetric information	35
2.4.1 Measurement costs.....	36
2.4.1.1 Block booking.....	39
2.4.1.2 Independent institutions and reputation mechanisms	40
2.4.1.3 Free-riding	41
2.4.2 Agency relationships.....	41
2.4.2.1 Hidden actions and hidden intentions	44
2.4.2.2 Hidden characteristics	47
2.4.3 Quality uncertainty and adverse selection.....	47
2.4.3.1 Signalling.....	50
2.4.3.2 Screening	51

2.4.4 Decision-making under asymmetric information	52
2.4.4.1 Economics and psychology	53
2.4.4.2 Rationality and decision-making	54
2.4.4.3 Cognitive biases	55
2.4.4.4 The role of social psychology	59
2.5 Chapter summary and conclusions	61
3 JOB MARKET SIGNALLING: ECONOMIC APPROACHES.....	65
3.1 Introduction.....	65
3.2 A first approach to job market signalling	66
3.3 The Spence model (1973): Different signalling equilibria.....	69
3.3.1 The separating solution: “Signalling works”	77
3.3.2 Pooling solution I: “A meaningless signal”	84
3.3.3 Pooling solution II: “Signalling is too expensive”	89
3.3.4 Assessment of the Spence model.....	93
3.3.4.1 Strengths of the model.....	94
3.3.4.2 Weaknesses of the model	96
3.4 Selected enhancements and refinements	100
3.4.1 The intuitive criterion.....	103
3.4.1.1 The intuitive criterion in a separating equilibrium	104
3.4.1.2 The intuitive criterion and pooling equilibria.....	108
3.4.2 Signalling under two dimensional asymmetric information .	113
3.4.2.1 Case I: Low heterogeneity in character.....	115
3.4.2.2 Case II: High heterogeneity in character.....	118
3.4.2.3 Alternative solutions	123
3.4.3 The compensation solution.....	131
3.4.3.1 Case I: A situation free of conflicts	133
3.4.3.2 Case II: No chance for a pooling equilibrium	134
3.4.3.3 Case III: Edge cases	135
3.4.4 Imaginations of fairness under compensating	136
3.4.4.1 Case I: The penurious offer	141
3.4.4.2 Case II: The inappropriate demand.....	142
3.4.4.3 Case III: The fair distribution	143

3.4.5 A thought experiment: Compensations under the threat of opportunism	144
3.4.5.1 Compensation payments as credible signals?	145
3.4.5.2 A game-theoretical analysis.....	148
3.5 Chapter summary and review of hypothesis 1	152
3.5.1 Microeconomic textbooks	157
3.5.1.1 Analysis	157
3.5.1.2 Results	159
3.5.2 Textbooks in industrial economics	160
3.5.2.1 Analysis	161
3.5.2.2 Results	163
4 JOB MARKET SIGNALLING: PSYCHOLOGICAL ASPECTS	167
4.1 Introduction.....	167
4.2 The cognitive processing of information	170
4.2.1 Basic mechanisms	170
4.2.2 Concepts and schemata	173
4.3 Stereotyping.....	175
4.3.1 Asymmetric information, signalling and stereotyping.....	181
4.3.2 Theoretical approaches concerning stereotyping behaviour .	183
4.3.2.1 The cognitive economy approach	183
4.3.2.2 The socio-cultural and the psychodynamic approach	187
4.3.2.3 The importance of different approaches in the frame of this work	189
4.3.3 Characteristic features of stereotypic thinking	190
4.3.3.1 Automatic activation and inhibition.....	190
4.3.3.2 Cognitive dissonances.....	192
4.3.3.3 Cognitive biases.....	195
4.3.3.4 The change of cognitive patterns	197
4.3.4 Blessing or curse? Towards an assessment of stereotyping..	202
4.4 Job market signalling and stereotyping: An analysis	205
4.4.1 The Spence model (1973) and the intuitive criterion.....	206
4.4.1.1 The separating equilibrium	207

4.4.1.2 The pooling equilibria	208
4.4.1.3 Alternative scenarios	213
4.4.2 Two dimensional asymmetric information.....	220
4.4.2.1 Case I: Low heterogeneity in character.....	220
4.4.2.2 Case II: High heterogeneity in character.....	223
4.4.2.3 Alternative solutions	230
4.4.3 The compensation solutions and imaginations of fairness....	231
4.4.3.1 From signalling over stereotyping to decision-making.....	232
4.4.3.2 Difficulties in decision-making	237
4.4.3.3 Group stereotyping versus individual differentiation	238
4.4.4 Compensating under the threat of opportunism	240
4.5 Chapter summary and review of hypothesis 2	241
5 CONCLUDING REMARKS	255
LITERATURE.....	259
APPENDIX	273
