MANAGERIAL ECONOMICS
Economic Tools for Today's Decision Makers

Paul G. Keat
Thunderbird School of Global Management

Philip K.Y. Young
Nth Degree Systems, Inc. and Duke Corporate Education

Pearson Education International
### Contents

*Preface xix*
*About the Authors xxiii*

**CHAPTER 1 Introduction 1**

- Introduction: Economics and Managerial Decision Making 2
- The Economics of a Business 5
- A Brief Review of Important Economic Terms and Concepts 8
- The Case of Global Foods, Inc.: Situations and Solutions 14
- Summary of the Situations and Solutions 16
- Global Application: Reinventing the Corporation Through Strategy and Ownership 19
  - Summary 21
  - Important Concepts 22
  - Questions 22

**CHAPTER 2 The Firm and Its Goals 24**

- Introduction 25
- The Firm 25
  - Coase and the Internet 28
- The Economic Goal of the Firm and Optimal Decision Making 29
- Goals Other Than Profit 30
  - Economic Goals 30
  - Economic Objectives 31
  - Noneconomic Objectives 32
- Once Again—Do Companies Maximize Profits? 32
  - Profit Maximization, Restated 35
- Maximizing the Wealth of Stockholders 36
  - Market Value Added and Economic Value Added 38
- Economic Profits 39
- Global Application 40
  - Summary 42
  - Important Concepts 42
  - Questions 43

**CHAPTER 3 Supply and Demand 45**

- Introduction 46
- Market Demand 46
- Market Supply 50
- Market Equilibrium 52
- Comparative Statics Analysis 53
  - Short-Run Market Changes: The “Rationing Function” of Price 53
  - Long-Run Market Analysis: The “Guiding” or “Allocating Function” of Price 56
  - Using Supply and Demand in Forecasting 60
Supply, Demand, and Price: The Managerial Challenge 61
Case 3.1 Coffee: "Buy Low and Sell High" 62
Case 3.2 Air Travel: "Buy High and Sell Low" 63
Global Application: The Market for Cobalt 64
   The Current Market Situation 64
   A Brief History of the Market for Cobalt 65
   Implications for Managers 65
   Summary 68
   Important Concepts 68
   Questions 69
   Problems 70

Appendix 3A The Mathematics of Supply and Demand 74

CHAPTER 4 Demand Elasticity 77
The Economic Concept of Elasticity 78
The Price Elasticity of Demand 78
   Measurement of Price Elasticity 79
   The Determinants of Elasticity 84
   The Effect of Elasticity on Price and Quantity 85
   The Elasticity of Derived Demand 86
   Elasticity in the Short Run and in the Long Run 87
   Demand Elasticity and Revenue 89
   The Mathematics of Elasticity 92
   Empirical Elasticities 93
The Cross-Elasticity of Demand 94
   Empirical Elasticities 96
Income Elasticity 96
Other Elasticity Measures 99
Elasticity of Supply 100
Global Application: Price Elasticities in Asia 100
   Summary 103
   Important Concepts 103
   Questions 104
   Problems 105

Appendix 4A Applications of Supply and Demand 109

CHAPTER 5 Demand Estimation and Forecasting 124
Demand Estimation 126
Introduction 126
   Key Chapter Objectives 126
   The Critical Importance of Good Data 126
Regression Analysis: A Management Briefing 127
   Specifying the Regression Equation and Obtaining the Data 127
   Estimating and Interpreting the Regression Coefficients 130
   Statistical Evaluation of the Regression Results 132
   Review of Key Steps for Analyzing Regression Results 133
   Implications of the Regression Analysis for Management Decisions 135
Problems in the Use of Regression Analysis 135
   The Identification Problem 135
   Multicollinearity 137
   Autocorrelation 137
Examples of Regression Analysis in Economic Research 139
  Brief Summary of Recent Examples of Economic Studies Using
  Regression Analysis 139

Global Application: Food in Spain, Cigarettes in Taiwan 140

Forecasting 141

Introduction 141

Subjects of Forecasts 142
  Demand Estimating and Demand Forecasting 142

Prerequisites of a Good Forecast 143

Forecasting Techniques 143
  Expert Opinion 144
  Opinion Polls and Market Research 145
  Surveys of Spending Plans 145
  Economic Indicators 146
  Projections 148
  Econometric Models 162

Global Application: Forecasting Exchange Rates 166

Summary 169
  Important Concepts 170
  Questions 171
  Problems 172

Appendix 5A The Demand for White Zinfandel in Los Angeles 178

CHAPTER 6 The Theory and Estimation of Production 186

The Production Function 187

A Short-Run Analysis of Total, Average, and Marginal Product 189
  The Law of Diminishing Returns 191
  The Three Stages of Production in the Short Run 194
  Derived Demand and the Optimal Level of Variable Input Usage 196
  The Case of Multiple Inputs (Abridged Version) 197

The Long-Run Production Function 199

The Estimation of Production Functions 202
  The Various Forms of a Production Function 202
  The Cobb-Douglas Production Function 204
  Statistical Estimation of Production Functions 206
  Aggregate Production Functions 209

The Importance of Production Functions in Managerial
  Decision Making 210
  Careful Planning Can Help a Firm to Use Its Resources in a Rational Manner 211

Going "Beyond the Curves": Current Production Issues and Challenges
  for Today's Managers 212

Call Centers: Applying the Production Function to a Service 214

International Application: Is China Running Out of Workers? 216

Summary 217
  Important Concepts 218
  Questions 219
  Problems 220

Appendix 6A Productivity in Services 226

Appendix 6B The Multiple-Input Case 237

Appendix 6C Expressing the Production Function with the Use
  of Calculus 248
CHAPTER 7  The Theory and Estimation of Cost  252
The Importance of Cost in Managerial Decisions  253
The Definition and Use of Cost in Economic Analysis  255
   Historical versus Replacement Cost  255
   Opportunity Cost versus Out-of-Pocket Cost  255
   Sunk versus Incremental Cost  256
The Relationship between Production and Cost  257
The Short-Run Cost Function  259
   Increasing Cost Efficiency in the Short Run  262
   Alternative Specifications of the Total Cost Function  262
The Long-Run Cost Function  264
   The Relationship between Long-Run Production and Long-Run Cost  264
   Economies of Scale  266
   The Long-Run Average Cost Curve as the Envelope of Short-Run Average Cost  269
   Using Long-Run Average Cost as a Decision-Making Tool: The Importance of Coordinating Production Plans with Market Forecasts  271
The Learning Curve  273
Economies of Scope  276
Economies of Scale: The Short Run versus the Long Run  277
Supply Chain Management  277
Examples of Ways Companies Have Cut Costs to Remain Competitive  280
Cautionary Note to Managers about the Use of Cost-Cutting as a Strategy  285
Global Application: Toll Manufacturing of Chemicals in China  286
   Summary  289
   Important Concepts  289
   Questions  290
   Problems  292
Appendix 7A A Mathematical Restatement of the Short-Run Cost Function  297
Appendix 7B The Estimation of Cost  298

CHAPTER 8  Pricing and Output Decisions: Perfect Competition and Monopoly  309
Introduction  310
Competition and Market Types in Economic Analysis  312
   The Meaning of Competition  312
   Examples of Market Types  313
   Market Types and Competition in Theory and Reality  314
Pricing and Output Decisions in Perfect Competition  315
   The Basic Business Decision  315
   Key Assumptions of the Perfectly Competitive Market  315
   The Total Revenue–Total Cost Approach to Selecting the Optimal Output Level  319
   The Marginal Revenue–Marginal Cost Approach to Finding the Optimal Output Level  320
   Economic Profit, Normal Profit, Loss, and Shutdown  323
   The Competitive Market in the Long Run  326
Pricing and Output Decisions in Monopoly Markets  328
The Implications of Perfect Competition and Monopoly for Managerial Decision Making 331

Global Application: The Brutal Economics of the Market for Bluefin Tuna 333
Summary 337
Important Concepts 337
Questions 338
Problems 339

Appendix 8A The Use of Calculus in Pricing and Output Decisions 342
Appendix 8B Break-Even Analysis (Volume-Cost-Profit) 344

CHAPTER 9 Pricing and Output Decisions: Monopolistic Competition and Oligopoly 358

Introduction 359
Monopolistic Competition 360
Oligopoly 362
Market Concentration 362
Pricing in an Oligopolistic Market: Rivalry and Mutual Interdependence 364
Competing in Imperfectly Competitive Markets 367
Nonprice Competition 367
Economic Optimization and Nonprice Competition 370
The Reality of Monopolistic Competition and Oligopoly: “Imperfect” Competition 371
Strategy: The Fundamental Challenge for Firms in Imperfect Competition 372
Industrial Organization 373
Strategy and the Ideas of Michael Porter 375
Concluding Remarks on the Linkages between Managerial Economics and Strategy 377
Global Application: The World’s Market for Beer 377
Summary 379
Important Concepts 379
Questions 380
Problems 381

CHAPTER 10 Special Pricing Practices 384

Introduction 385
Cartel Arrangements 385
Cases of Price Fixing by Cartels 387
Price Leadership 389
Barometric Price Leadership 390
Dominant Price Leadership 390
Revenue Maximization 392
Price Discrimination 393
Third-Degree Discrimination 395
Examples of Price Discrimination 398
Some Recent Examples of Price Discrimination Practices 399
Pricing in the Hotel Industry: Example of Price Discrimination 401
Tying Arrangements: A Possible Extension of Price Discrimination 402
Social Welfare Implications of Price Discrimination 404
CHAPTER 12  Capital Budgeting and Risk  450

Introduction  451

The Capital Budgeting Decision  452
  Types of Capital Budgeting Decisions  452

Time Value of Money  453

Methods of Capital Project Evaluation  453
  Net Present Value  453
  Internal Rate of Return  455
  The Profitability Index  456
  NPV versus IRR  456
  Capital Budgeting in Practice  459

Cash Flows  459
  Types of Cash Flows  460

Cost of Capital  461
  Debt  462
  Equity  462
  The Weighted Cost of Capital  464

The Capital Budgeting Model  464

Capital Rationing  466

Risk versus Uncertainty  466

Sources of Business Risk  467

The Measures of Risk  467
  Expected Value  468
  The Standard Deviation  469
  Discrete versus Continuous Distributions and the Normal Curve  470
  The Coefficient of Variation  471

Capital Budgeting under Conditions of Risk  472

Two Other Methods for Incorporating Risk  473
  The Risk-Adjusted Discount Rate  473
  Certainty Equivalents  474
  Present Value Break-Even Analysis  475

Sensitivity and Scenario Analysis  475

Simulation  476

Decision Trees  477

Real Options in Capital Budgeting  479
  Real Options in Practice  480
  An Abandonment Option  480

Global Application: Political Risk  482
  Political Risk  482
  A Political Risk Index  483
  Containing International Risk  483
  Capital Budgeting in Practice  483
  Summary  486
  Important Concepts  487
### Contents

*Questions* 488  
*Problems* 489

Appendix 12A The Value of a Corporation 495

**CHAPTER 13  The Multinational Corporation and Globalization** 497

Introduction 498  
Globalization 499  
Is Globalization Good or Bad? 500  
Proglobalization Arguments 500  
Antiglobalization Arguments 501  
Globalization and the Future 502  
Risks Faced by a Multinational Corporation 504  
Exchange Rates 505  
Exchange Rate Hedging 506  
*Offsetting Transactions* 506  
The *Forward Market* 506  
The *Futures Market* 506  
*Currency Options* 506  
*Currency Swaps* 507  
Foreign Direct Investment 507  
Multinational Capital Budgeting 508  
*Intercompany Fund Flows* 508  
*Inflation Rates* 508  
*Exchange Rates* 508  
*Tax Differences* 509  
*Differences in Cash Flows* 509  
*Cost of Capital* 509  
The *Final Project Valuation* 509  
The Repositioning of Funds 510  
Multinational Transfer Pricing 510  
*Multinational Transfer Pricing Example* 511  
Transfer Pricing in Practice 512  
Global Application: “From Here to the Moon in Six Months” 514  
Summary 517  
Important Concepts 518  
Questions 518  
Problems 519

**CHAPTER 14  Government and Industry: Challenges and Opportunities for Today's Manager** 520

Introduction 521  
The Rationale for Government Involvement in a Market Economy 521  
Providing a Legal Framework for Competition: *The Antitrust Laws* 522  
Dealing with Market Externalities: Another Key Function of Government in the Market Economy 525  
Stabilization of the Aggregate Economy: Monetary and Fiscal Policy 527  
*Monetary Policy* 527  
*Fiscal Policy* 528  
*Lags* 529
CHAPTER 15 Managerial Economics in Action: The Case of the Refreshment Beverage Industry

Introduction 543
Economic Overview of the Industry 544  
   Industry Trends 544
Analysis of the Refreshment Beverage Industry 552  
   Carbonated Soft Drinks (CFDs) 552
   Bottled Water 553
   Manufacturing and Distribution 555
   Competition 556
   Consumer Demand 557
   Summary 562
   Questions for Further Study 562

Appendix 15A Interview with Key Beverage Industry Executives 564

Appendix A Statistical and Financial Tables 571
Index 586

The following appendices will be found online, www.pearsonhighered.com/keat:

Review of Mathematical Concepts Used in Managerial Economics
Linear Programming
Calculations for Time Value of Money
Solutions to Odd-Numbered Problems
Demand for White Zinfandel in Los Angeles: Additional Data and Analysis
