Data Mining for Design and Marketing

Edited by
Yukio Ohsawa
Katsutoshi Yada
Contents

Chapter 1  Sensing Values in Designing Products and Markets on Data Mining and Visualizations........................................1
Yukio Ohsawa

Chapter 2  Refraining the Data-Mining Process........................................19
David Bergner and Ozgur Eris

Chapter 3  The Use of Online Market Analysis Systems to Achieve Competitive Advantage........................................35
Lihua Zhao, Mark D. Uncles, and Gary Gregory

Chapter 4  Finding Hierarchical Patterns in Large POS Data Using Historical Trees.......................................................57
Takanobu Nakahara and Hiroyuki Morita

Chapter 5  A Method to Search ARX Model Orders and Its Application to Sales Dynamics Analysis.....................................81
Kent a Fukata, Takashi Washio, Katsutoshi Yada, and Hiroshi Motoda

Chapter 6  Data Mining for Improved Web Site Design and Enhanced Marketing.................................................................95
Asem Omari

Chapter 7  Discourse Analysis and Creativity Support for Concept Product Design.............................................................107
Noriko Imafuji Yasui, Xavier Horn, and David E. Goldberg

Chapter 8  Data Crystallization with Human Interactions Applied for Designing New Products........................................119
Kenichi Ho tie, Yoshiharu Maeno, and Yukio Ohsawa
Chapter 9  Improving and Applying Chance Discovery for Design Analysis
Brett Bojduj

Chapter 10  Mining for Influence Leaders in Global Teamwork Projects
Renate Fruchter, Shubashri Swaminathan, Naohiro Matsumura, and Yukio Ohsawa

Chapter 11  Analysis Framework for Knowledge Discovery Related to Persuasion Process Conversation Logs
Wataru Sunayama and Katsutoshi Yada

Chapter 12  Association Bundle-Based Market Basket Analysis
Wenxue Huang, Milorad Krneta, Limin Lin, and Jianhong Wu

Chapter 13  Formal Concept Analysis with Attribute Priorities
Radim Belohlavek and Vilein Vychodil

Chapter 14  Literature Categorization System for Automated Database Retrieval of Scientific Articles Based on Dedicated Taxonomy
Lukds PichL, Manabu Suzuki, Masaki Murdta, Daiji Kato, Izumi Murakami, and Akira Sasaki

Chapter 15  A Data-Mining Framework for Designing Personalized E-Commerce Support Tools
Timothy Maciag, Dominik Slezak, Daryl H. Hepting, and Robert J. Hilderinan

Chapter 16  An Adjacency Matrix Approach for Extracting User Sentiments
Bin Shi and Kuiyu Chang

Chapter 17  Visualizing RFID Tag Data in a Library for Detecting Latent Interest of Users
Yukio Ohsawa, Takwna Hosoda, and Takeshi Ui
