Foreword xxv
Preface to Volume IV xxix

IV.1 Value at Risk and Other Risk Metrics
   IV.1.1 Introduction 1
   IV.1.2 An Overview of Market Risk Assessment 4
      IV.1.2.1 Risk Measurement in Banks 4
      IV.1.2.2 Risk Measurement in Portfolio Management 6
      IV.1.2.3 Risk Measurement in Large Corporations 7
   IV.1.3 Downside and Quantile Risk Metrics 9
      IV.1.3.1 Semi-Standard Deviation and Second Order Lower Partial Moment 9
      IV.1.3.2 Other Lower Partial Moments 10
      IV.1.3.3 Quantile Risk Metrics 11
   IV.1.4 Defining Value at Risk 13
      IV.1.4.1 Confidence Level and Risk Horizon 13
      IV.1.4.2 Discounted P&L 15
      IV.1.4.3 Mathematical Definition of VaR 15
   IV.1.5 Foundations of Value-at-Risk Measurement 17
      IV.1.5.1 Normal Linear VaR Formula: Portfolio Level 18
      IV.1.5.2 Static Portfolios 20
      IV.1.5.3 Scaling VaR 21
      IV.1.5.4 Discounting and the Expected Return 23
   IV.1.6 Risk Factor Value at Risk 25
      IV.1.6.1 Motivation 26
      IV.1.6.2 Normal Linear Equity VaR 27
      IV.1.6.3 Normal Linear Interest Rate VaR 29
IV.2.8 Student t Distributed Linear Value at Risk 106
   IV.2.8.1 Effect of Leptokurtosis and Skewness on VaR 106
   IV.2.8.2 Student t Linear VaR Formula 107
   IV.2.8.3 Empirical Examples of Student t Linear VaR 109
IV.2.9 Linear Value at Risk with Mixture Distributions 111
   IV.2.9.1 Mixture Distributions 111
   IV.2.9.2 Mixture Linear VaR Formula 113
   IV.2.9.3 Mixture Parameter Estimation 114
   IV.2.9.4 Examples of Mixture Linear VaR 115
   IV.2.9.5 Normal Mixture Risk Factor VaR 119
IV.2.10 Exponential Weighting with Parametric Linear Value at Risk 121
   IV.2.10.1 Exponentially Weighted Moving Averages 121
   IV.2.10.2 EWMA VaR at the Portfolio Level 124
   IV.2.10.3 RiskMetrics™ VaR Methodology 126
IV.2.11 Expected Tail Loss (Conditional VaR) 128
   IV.2.11.1 ETL in the Normal Linear VaR Model 129
   IV.2.11.2 ETL in the Student t Linear VaR Model 130
   IV.2.11.3 ETL in the Normal Mixture Linear VaR Model 132
   IV.2.11.4 ETL under a Mixture of Student t Distributions 133
IV.2.12 Case Study: Credit Spread Parametric Linear Value at Risk and ETL 135
   IV.2.12.1 The iTraxx Europe Index 135
   IV.2.12.2 VaR Estimates 137
IV.2.13 Summary and Conclusions 138

IV.3 Historical Simulation 141
   IV.3.1 Introduction 141
   IV.3.2 Properties of Historical Value at Risk 144
      IV.3.2.1 Definition of Historical VaR 144
      IV.3.2.2 Sample Size and Data Frequency 145
      IV.3.2.3 Power Law Scale Exponents 146
      IV.3.2.4 Case Study: Scale Exponents for Major Risk Factors 147
      IV.3.2.5 Scaling Historical VaR for Linear Portfolios 150
      IV.3.2.6 Errors from Square-Root Scaling of Historical VaR 151
      IV.3.2.7 Overlapping Data and Multi-Step Historical Simulation 151
   IV.3.3 Improving the Accuracy of Historical Value at Risk 152
      IV.3.3.1 Case Study: Equally Weighted Historical and Linear VaR 153
      IV.3.3.2 Exponential Weighting of Return Distributions 156
      IV.3.3.3 Volatility Adjustment 158
      IV.3.3.4 Filtered Historical Simulation 163
   IV.3.4 Precision of Historical Value at Risk at Extreme Quantiles 165
      IV.3.4.1 Kernel Fitting 165
      IV.3.4.2 Extreme Value Distributions 167
      IV.3.4.3 Cornish–Fisher Approximation 170
      IV.3.4.4 Johnson Distributions 172
   IV.3.5 Historical Value at Risk for Linear Portfolios 175
      IV.3.5.1 Historical VaR for Cash Flows 176
      IV.3.5.2 Total, Systematic and Specific VaR of a Stock Portfolio 179

IV.7.3 Scenario Value at Risk and Expected Tail Loss 367
   IV.7.3.1 Normal Distribution Scenarios 367
   IV.7.3.2 Compound Distribution Scenario VaR 371
   IV.7.3.3 Bayesian VaR 375

IV.7.4 Introduction to Stress Testing 378
   IV.7.4.1 Regulatory Guidelines 379
   IV.7.4.2 Systemic Risk 381
   IV.7.4.3 Stress Tests Based on Worst Case Loss 381

IV.7.5 A Coherent Framework for Stress Testing 384
   IV.7.5.1 VaR Based on Stressed Covariance Matrices 385
   IV.7.5.2 Generating Hypothetical Covariance Matrices 388
   IV.7.5.3 Stress Tests Based on Principal Component Analysis 390
   IV.7.5.4 Modelling Liquidity Risk 392
   IV.7.5.5 Incorporating Volatility Clustering 397

IV.7.6 Summary and Conclusions 398

IV.8 Capital Allocation 401
   IV.8.1 Introduction 401
   IV.8.2 Minimum Market Risk Capital Requirements for Banks 403
      IV.8.2.1 Basel Accords 404
      IV.8.2.2 Banking and Trading Book Accounting 405
      IV.8.2.3 Regulatory Framework for Market Risk 406
      IV.8.2.4 Internal Models 408
      IV.8.2.5 Standardized Rules 411
      IV.8.2.6 Incremental Risk Charge 412
   IV.8.3 Economic Capital Allocation 416
      IV.8.3.1 Measurement of Economic Capital 416
      IV.8.3.2 Banking Applications of Economic Capital 421
      IV.8.3.3 Aggregation Risk 422
      IV.8.3.4 Risk Adjusted Performance Measures 424
      IV.8.3.5 Optimal Allocation of Economic Capital 430
   IV.8.4 Summary and Conclusions 433
