Primary Health Care

Now More Than Ever
Contents

Message from the Director-General viii

Introduction and Overview xi

Responding to the challenges of a changing world xii
Growing expectations for better performance xiii
From the packages of the past to the reforms of the future xiv
Four sets of PHC reforms xv
Seizing opportunities xviii

Chapter 1. The challenges of a changing world 1
Unequal growth, unequal outcomes 2
Longer lives and better health, but not everywhere 2
Growth and stagnation 4
Adapting to new health challenges 7
A globalized, urbanized and ageing world 7
Little anticipation and slow reactions 9
Trends that undermine the health systems' response 11
Hospital-centrism: health systems built around hospitals and specialists 11
Fragmentation: health systems built around priority programmes 12
Health systems left to drift towards unregulated commercialization 13
Changing values and rising expectations 14
Health equity 15
Care that puts people first 16
Securing the health of communities 16
Reliable, responsive health authorities 17
Participation 18
PHC reforms: driven by demand 18

Chapter 2. Advancing and sustaining universal coverage 23
The central place of health equity in PHC 24
Moving towards universal coverage 25
Challenges in moving towards universal coverage 27
Rolling out primary-care networks to fill the availability gap 28
Overcoming the isolation of dispersed populations 30
Providing alternatives to unregulated commercial services 31
Targeted interventions to complement universal coverage mechanisms 32
Mobilizing for health equity 34
Increasing the visibility of health inequities 34
Creating space for civil society participation and empowerment 35
## Chapter 3. Primary care: putting people first

- Good care is about people  
  - The distinctive features of primary care  
    - Effectiveness and safety are not just technical matters  
    - Understanding people: person-centred care  
    - Comprehensive and integrated responses  
    - Continuity of care  
    - A regular and trusted provider as entry point  
- Organizing primary-care networks  
  - Bringing care closer to the people  
  - Responsibility for a well-identified population  
  - The primary-care team as a hub of coordination  
- Monitoring progress  

## Chapter 4. Public policies for the public’s health

- The importance of effective public policies for health  
- System policies that are aligned with PHC goals  
- Public-health policies  
  - Aligning priority health programmes with PHC  
  - Countrywide public-health initiatives  
  - Rapid response capacity  
- Towards health in all policies  
- Understanding the under-investment  
- Opportunities for better public policies  
  - Better information and evidence  
  - A changing institutional landscape  
  - Equitable and efficient global health action  

## Chapter 5. Leadership and effective government

- Governments as brokers for PHC reform  
  - Mediating the social contract for health  
  - Disengagement and its consequences  
  - Participation and negotiation  
- Effective policy dialogue  
  - Information systems to strengthen policy dialogue  
  - Strengthening policy dialogue with innovations from the field  
  - Building a critical mass of capacity for change  
- Managing the political process: from launching reform to implementing it  

## Chapter 6. The way forward

- Adapting reforms to country context  
- High-expenditure health economics  
- Rapid-growth health economies  
- Low-expenditure, low-growth health economies  
- Mobilizing the drivers of reform  
  - Mobilizing the production of knowledge  
  - Mobilizing the commitment of the workforce  
  - Mobilizing the participation of people
List of Figures

**Figure 1.** The PHC reforms necessary to refocus health systems towards health for all

**Figure 1.1** Selected best performing countries in reducing under-five mortality by at least 80%, by regions, 1975–2006

**Figure 1.2** Factors explaining mortality reduction in Portugal, 1960–2008

**Figure 1.3** Variable progress in reducing under-five mortality, 1975 and 2006, in selected countries with similar rates in 1975

**Figure 1.4** GDP per capita and life expectancy at birth in 169 countries, 1975 and 2005

**Figure 1.5** Trends in GDP per capita and life expectancy at birth in 133 countries grouped by the 1975 GDP, 1975–2005

**Figure 1.6** Countries grouped according to their total health expenditure in 2005 (international $)

**Figure 1.7** Africa’s children are at more risk of dying from traffic accidents than European children: child road-traffic deaths per 100 000 population

**Figure 1.8** The shift towards noncommunicable diseases and accidents as causes of death

**Figure 1.9** Within-country inequalities in health and health care

**Figure 1.10** How health systems are diverted from PHC core values

**Figure 1.11** Percentage of the population citing health as their main concern before other issues, such as financial problems, housing or crime

**Figure 1.12** The professionalization of birthing care: percentage of births assisted by professional and other carers in selected areas, 2000 and 2005 with projections to 2015

**Figure 1.13** The social values that drive PHC and the corresponding sets of reforms

**Figure 2.1** Catastrophic expenditure related to out-of-pocket payment at the point of service

**Figure 2.2** Three ways of moving towards universal coverage

**Figure 2.3** Impact of abolishing user fees on outpatient attendance in Kisoro district, Uganda: outpatient attendance 1998–2002

**Figure 2.4** Different patterns of exclusion: massive deprivation in some countries, marginalization of the poor in others. Births attended by medically trained personnel (percentage), by income group

**Figure 2.5** Under-five mortality in rural and urban areas, the Islamic Republic of Iran, 1980–2000

**Figure 2.6** Improving health-care outputs in the midst of disaster: Rutshuru, the Democratic Republic of the Congo, 1985–2004

**Figure 3.1** The effect on uptake of contraception of the reorganization of work schedules of rural health centres in Niger

**Figure 3.2** Lost opportunities for prevention of mother-to-child transmission of HIV (MTCT) in Côte d’Ivoire: only a tiny fraction of the expected transmissions are actually prevented

**Figure 3.3** More comprehensive health centres have better vaccination coverage

**Figure 3.4** Inappropriate investigations prescribed for simulated patients presenting with a minor stomach complaint in Thailand

**Figure 3.5** Primary care as a hub of coordination: networking within the community served and with outside partners

**Figure 4.1** Deaths attributable to unsafe abortion per 100 000 live births, by legal grounds for abortions

**Figure 4.2** Annual pharmaceutical spending and number of prescriptions dispensed in New Zealand since the Pharmaceutical Management Agency was convened in 1993

**Figure 4.3** Percentage of births and deaths recorded in countries with complete civil registration systems, by WHO region, 1975–2004

**Figure 4.4** Essential public-health functions that 30 national public-health institutions view as being part of their portfolio

**Figure 4.5** Percentage of GDP used for health, 2005

**Figure 4.6** Health expenditure in China: withdrawal of the State in the 1980s and 1990s and recent re-engagement

**Figure 4.7** Transforming information systems into instruments for PHC reform

**Figure 4.8** Mutual reinforcement between innovation in the field and policy development in the health reform process

**Figure 4.9** A growing market: technical cooperation as part of Official Development Aid for Health. Yearly aid flows in 2005, deflator adjusted

**Figure 4.10** Re-emerging national leadership in health: the shift in donor funding towards integrated health systems support, and its impact on the Democratic Republic of the Congo’s 2004 PHC strategy

**Figure 5.1** Contribution of general government, private pre-paid and private out-of-pocket expenditure to the yearly growth in total health expenditure per capita, percentage, weighted averages

**Figure 5.2** Projected per capita health expenditure in 2015, rapid-growth health economies (weighted averages)

**Figure 5.3** Projected per capita health expenditure in 2015, low expenditure, low-growth health economies (weighted averages)

**Figure 5.4** The progressive extension of coverage by community-owned, community-operated health centres in Mali, 1998–2007
