BRIEF CONTENTS

Preface vii

PART 1 Introduction
1 Thinking Like an Economist 3
2 Comparative Advantage 35
3 Supply and Demand 61

PART 2 Competition and the Invisible Hand
4 Elasticity 97
5 Demand 123
6 Perfectly Competitive Supply 147
7 Efficiency, Exchange, and the Invisible Hand in Action 173

PART 3 Market Imperfections
8 Monopoly, Oligopoly, and Monopolistic Competition 207
9 Games and Strategic Behavior 239
10 Externalities and Property Rights 267

PART 4 Economics of Public Policy
11 Using Economics to Make Better Policy Decisions 297

PART 5 Macroeconomics: Data and Issues
12 Spending, Income, and GDP 321
13 Inflation and the Price Level 349
14 Wages and Unemployment 377

PART 6 The Economy in the Long Run
15 Economic Growth 413
16 Saving, Capital Formation, and Financial Markets 445
17 The Financial System, Money, and Prices 475

PART 7 The Economy in the Short Run
18 Short-Term Economic Fluctuations 507
19 Spending and Output in the Short Run 527
BRIEF CONTENTS

20 Stabilizing the Economy: The Role of the Federal Reserve  569
21 Aggregate Demand, Aggregate Supply, and Macroeconomic Policy  607

PART 8  The International Economy

Glossary  G-1

Index  I-1
Contents

Preface vii

PART I Introduction

Chapter I Thinking Like an Economist 3
Economics: Studying Choice in a World of Scarcity 4
Applying the Cost-Benefit Principle 6
  Economic Surplus 6
  Opportunity Cost 7
  The Role of Economic Models 7
Three Important Decision Pitfalls 8
  Pitfall 1: Measuring Costs and Benefits as Proportions Rather Than Absolute Dollar Amounts 9
  Pitfall 2: Ignoring Implicit Costs 9
  Pitfall 3: Failure to Think at the Margin 11
Normative Economics versus Positive Economics 15
Economics: Micro and Macro 15
The Approach of This Text 16
Economic Naturalism 17
EXAMPLE 1.1 THE ECONOMIC NATURALIST: Why do many hardware manufacturers include more than $1,000 worth of "free" software with a computer selling for only slightly more than that? 17
EXAMPLE 1.2 THE ECONOMIC NATURALIST: Why don't auto manufacturers make cars without heaters? 18
EXAMPLE 1.3 THE ECONOMIC NATURALIST: Why do the keypad buttons on drive-up automatic teller machines have Braille dots? 18
Summary 19
Core Principles 20
Key Terms 20
Review Questions 20
Problems 20
Answers to In-Chapter Exercises 22
Appendix: Working with Equations, Graphs, and Tables 23
Chapter 2  Comparative Advantage  35
Exchange and Opportunity Cost  36
The Principle of Comparative Advantage  37
EXAMPLE 2.1 THE ECONOMIC NATURALIST: Where have all the
400 hitters gone?  39
Sources of Comparative Advantage  40
EXAMPLE 2.2 THE ECONOMIC NATURALIST: Televisions and videocassette
recorders were developed and first produced in the United States, but today the
United States accounts for only a minuscule share of the total world production
of these products. Why did the United States fail to retain its lead in these
markets?  41
Comparative Advantage and Production Possibilities  41
The Production Possibilities Curve  41
How Individual Productivity Affects the Slope and Position
of the PPC  44
The Gains from Specialization and Exchange  46
A Production Possibilities Curve for a Many-Person Economy  47
Factors That Shift the Economy's Production Possibilities Curve  49
Why Have Some Countries Been Slow to Specialize?  51
Can We Have Too Much Specialization?  52
Comparative Advantage and International Trade  53
EXAMPLE 2.3 THE ECONOMIC NATURALIST: If trade between nations
is so beneficial, why are free-trade agreements so controversial?  53
Outsourcing  53
EXAMPLE 2.4 THE ECONOMIC NATURALIST: Is PBS economics reporter
Paul Solman's job a likely candidate for outsourcing?  54
Summary  56
Core Principles  56
Key Terms  56
Review Questions  57
Problems  57
Answers to In-Chapter Exercises  58

Chapter 3  Supply and Demand  61
What, How, and for Whom? Central Planning versus
the Market  63
Buyers and Sellers in Markets  64
The Demand Curve  65
The Supply Curve  66
Market Equilibrium  68
Rent Controls Reconsidered  71
Pizza Price Controls?  73
Predicting and Explaining Changes in Prices and Quantities  74
Shifts in Demand  75
EXAMPLE 3.1 THE ECONOMIC NATURALIST: When the federal government
implements a large pay increase for its employees, why do rents for apartments
located near Washington Metro stations go up relative to rents for
apartments located far away from Metro stations?  77
Shifts in the Supply Curve  78
EXAMPLE 3.2 THE ECONOMIC NATURALIST: Why do major term papers go through so many more revisions today than in the 1970s?  80
Four Simple Rules  81
EXAMPLE 3.3 THE ECONOMIC NATURALIST: Why do the prices of some goods, like airline tickets to Europe, go up during the months of heaviest consumption, while others, like sweet corn, go down?  84
Efficiency and Equilibrium  84
Cash on the Table  85
Smart for One, Dumb for All  86
Summary  87
Core Principles  88
Key Terms  89
Review Questions  89
Problems  89
Answers to In-Chapter Exercises  90
Appendix: The Algebra of Supply and Demand  93

PART 2  Competition and the Invisible Hand

Chapter 4  Elasticity  97
Price Elasticity of Demand  98
  Price Elasticity Defined  98
  Determinants of Price Elasticity of Demand  100
  Some Representative Elasticity Estimates  101
  Using Price Elasticity of Demand  102
EXAMPLE 4.1 THE ECONOMIC NATURALIST: Will a higher tax on cigarettes curb teenage smoking?  102
EXAMPLE 4.2 THE ECONOMIC NATURALIST: Why was the luxury tax on yachts such a disaster?  102
A Graphical Interpretation of Price Elasticity  103
  Price Elasticity Changes along a Straight-Line
  Demand Curve  105
  Two Special Cases  106
Elasticity and Total Expenditure  107
Income Elasticity and Cross-Price Elasticity of Demand  111
The Price Elasticity of Supply  112
  Determinants of Supply Elasticity  114
EXAMPLE 4.3 THE ECONOMIC NATURALIST: Why are gasoline prices so much more volatile than car prices?  116
  Unique and Essential Inputs: The Ultimate Supply Bottleneck  117
Summary  118
Key Terms  119
Review Questions  119
Problems  119
Answers to In-Chapter Exercises  121
Chapter 5  Demand  123

The Law of Demand  124
  The Origins of Demand  124
  Needs versus Wants  125

EXAMPLE 5.1 THE ECONOMIC NATURALIST: Why does California experience chronic water shortages?  126

Translating Wants into Demand  126
  Measuring Wants: The Concept of Utility  126
  Allocating a Fixed Income between Two Goods  130
  The Rational Spending Rule  133
  Income and Substitution Effects Revisited  133

Applying the Rational Spending Rule  136
  Substitution at Work  136

EXAMPLE 5.2 THE ECONOMIC NATURALIST: Why do the wealthy in Manhattan live in smaller houses than the wealthy in Seattle?  136

EXAMPLE 5.3 THE ECONOMIC NATURALIST: Why did people turn to four-cylinder cars in the 1970s, only to shift back to six- and eight-cylinder cars in the 1990s?  136

EXAMPLE 5.4 THE ECONOMIC NATURALIST: Why are automobile engines smaller in England than in the United States?  138

  The Importance of Income Differences  138

EXAMPLE 5.5 THE ECONOMIC NATURALIST: Why are waiting lines longer in poorer neighborhoods?  138

Individual and Market Demand Curves  138
  Horizontal Addition  139

Demand and Consumer Surplus  140
  Calculating Consumer Surplus  140

Summary  143

Key Terms  143

Review Questions  143

Problems  144

Answers to In-Chapter Exercises  145

Chapter 6  Perfectly Competitive Supply  147

Thinking about Supply: The Importance of Opportunity Cost  148

Individual and Market Supply Curves  150

Profit-Maximizing Firms in Perfectly Competitive Markets  151

  Profit Maximization  151
  The Demand Curve Facing a Perfectly Competitive Firm  152
  Production in the Short Run  153
  Some Important Cost Concepts  154
  Choosing Output to Maximize Profit  155
  A Note on the Firm's Shutdown Condition  157
  Average Variable Cost and Average Total Cost  157
  A Graphical Approach to Profit Maximization  157
  Price = Marginal Cost: The Maximum-Profit Condition  159
  The “Law” of Supply  161
Determinants of Supply Revisited 162
   Technology 162
   Input Prices 162
   The Number of Suppliers 163
   Expectations 163
   Changes in Prices of Other Products 163
Applying the Theory of Supply 163

EXAMPLE 6.1 THE ECONOMIC NATURALIST: When recycling is left to private market forces, why are many more aluminum beverage containers recycled than glass ones? 163

Supply and Producer Surplus 166
   Calculating Producer Surplus 166

Summary 167
Key Terms 168
Review Questions 168
Problems 168
Answers to In-Chapter Exercises 171

Chapter 7 Efficiency, Exchange, and the Invisible Hand in Action 173

The Central Role of Economic Profit 174
   Three Types of Profit 174

The Invisible Hand Theory 178
   Two Functions of Price 178
   Responses of Profits and Losses 178
   The Importance of Free Entry and Exit 184

Economic Rent versus Economic Profit 185
The Invisible Hand in Action 187
   The Invisible Hand at the Supermarket and on the Freeway 187

EXAMPLE 7.1 THE ECONOMIC NATURALIST: Why do supermarket checkout lines all tend to be roughly the same length? 187
   The Invisible Hand and Cost-Saving Innovations 187

The Distinction between an Equilibrium and a Social Optimum 188
   Smart for One, Dumb for All 189

EXAMPLE 7.2 THE ECONOMIC NATURALIST: Are there "too many" smart people working as corporate earnings forecasters? 189

Market Equilibrium and Efficiency 190
   Efficiency Is Not the Only Goal 193
   Why Efficiency Should Be the First Goal 193

The Cost of Preventing Price Adjustments 194
   Price Ceilings 194
   Price Subsidies 197

Summary 199
Key Terms 200
Review Questions 200
Problems 201
Answers to In-Chapter Exercises 203
PART 3 Market Imperfections

Chapter 8 Monopoly, Oligopoly, and Monopolistic Competition 207

Imperfect Competition 208
  Different Forms of Imperfect Competition 208
  The Essential Difference between Perfectly and Imperfectly Competitive Firms 210
Five Sources of Market Power 211
  Exclusive Control over Important Inputs 211
  Patents and Copyrights 211
  Government Licenses or Franchises 211
  Economies of Scale and Natural Monopolies 212
  Network Economies 212
Economies of Scale and the Importance of Start-Up Costs 213

EXAMPLE 8.1 THE ECONOMIC NATURALIST: Why does Intel sell the overwhelming majority of all microprocessors used in personal computers? 215

Profit Maximization for the Monopolist 216
  Marginal Revenue for the Monopolist 216
  The Monopolist's Profit-Maximizing Decision Rule 218
  Being a Monopolist Doesn't Guarantee an Economic Profit 220
Why the Invisible Hand Breaks Down under Monopoly 221
Using Discounts to Expand the Market 223
  Price Discrimination Defined 223

EXAMPLE 8.2 THE ECONOMIC NATURALIST: Why do many movie theaters offer discount tickets to students? 224
  How Price Discrimination Affects Output 224
  The Hurdle Method of Price Discrimination 226
  Is Price Discrimination a Bad Thing? 229
  Examples of Price Discrimination 229

EXAMPLE 8.3 THE ECONOMIC NATURALIST: Why might an appliance retailer instruct its clerks to hammer dents into the sides of its stoves and refrigerators? 230

Summary 231
Key Terms 231
Review Questions 232
Problems 232
Answers to In-Chapter Exercises 234
Appendix: The Algebra of Monopoly Profit Maximization 237

Chapter 9 Games and Strategic Behavior 239

Using Game Theory to Analyze Strategic Decisions 240
  The Three Elements of a Game 240
  Nash Equilibrium 242
The Prisoner's Dilemma 244
  The Original Prisoner's Dilemma 244
  The Economics of Cartels 245

EXAMPLE 9.1 THE ECONOMIC NATURALIST: Why are cartel agreements notoriously unstable? 245
  Tit-for-Tat and the Repeated Prisoner's Dilemma 247
EXAMPLE 9.2 THE ECONOMIC NATURALIST: How did Congress unwittingly solve the television advertising dilemma confronting cigarette producers? 248

EXAMPLE 9.3 THE ECONOMIC NATURALIST: Why do people shout at parties? 249

Games in Which Timing Matters 250
  Credible Threats and Promises 252
  Monopolistic Competition When Location Matters 253

EXAMPLE 9.4 THE ECONOMIC NATURALIST: Why do we often see convenience stores located on adjacent street corners? 254

Commitment Problems 255
  The Strategic Role of Preferences 257
    Are People Fundamentally Selfish? 258
    Preferences as Solutions to Commitment Problems 258

Summary 258

Key Terms 260

Review Questions 260

Problems 260

Answers to In-Chapter Exercises 264

Chapter 10 Externalities and Property Rights 267

External Costs and Benefits 268
  How Externalities Affect Resource Allocation 268
  How Do Externalities Affect Supply and Demand? 269
  The Coase Theorem 271
  Legal Remedies for Externalities 275

EXAMPLE 10.1 THE ECONOMIC NATURALIST: What is the purpose of free speech laws? 276

EXAMPLE 10.2 THE ECONOMIC NATURALIST: Why does government subsidize private property owners to plant trees on their hillsides? 276
  The Optimal Amount of Negative Externalities Is Not Zero 277
  Compensatory Taxes and Subsidies 277

Property Rights and the Tragedy of the Commons 279
  The Problem of Unpriced Resources 279
  The Effect of Private Ownership 281
  When Private Ownership Is Impractical 282

EXAMPLE 10.3 THE ECONOMIC NATURALIST: Why do blackberries in public parks get picked too soon? 283

EXAMPLE 10.4 THE ECONOMIC NATURALIST: Why are shared milkshakes consumed too quickly? 283

Positional Externalities 284
  Payoffs That Depend on Relative Performance 284

EXAMPLE 10.5 THE ECONOMIC NATURALIST: Why do football players take anabolic steroids? 285
  Positional Arms Races and Positional Arms Control Agreements 286
  Social Norms as Positional Arms Control Agreements 287

Summary 289

Key Terms 290
PART 4  Economics of Public Policy

Chapter 11  Using Economics to Make Better Policy Choices  297
The Economics of Health Care  298
   The Case for Mandatory Immunization Laws  298
Explaining Rising Health Care Costs  299
   Designing a Solution  301
   The HMO Revolution  302
EXAMPLE 11.1  THE ECONOMIC NATURALIST: Why is a patient with a sore knee more likely to receive an MRI exam if he has conventional health insurance than if he belongs to a Health Maintenance Organization?  302
   Paying for Health Insurance  303
EXAMPLE 11.2  THE ECONOMIC NATURALIST: In the richest country on Earth, why do so many people lack basic health insurance?  304
Using Price Incentives In Environmental Regulation  305
   Taxing Pollution  305
   Auctioning Pollution Permits  307
Overcoming Opposition to International Trade  308
   Welfare Payments and In-Kind Transfers  310
   Means-Tested Benefit Programs  311
   The Negative Income Tax  311
   Minimum Wages  312
   The Earned-Income Tax Credit  313
   Public Employment for the Poor  313
   A Combination of Methods  313
Summary  314
Key Terms  315
Review Questions  315
Problems  315
Answers to In-Chapter Exercises  317

PART 5  Macroeconomics: Data and Issues

Chapter 12  Spending, Income, and GDP  321
Gross Domestic Product: Measuring the Nation’s Output  322
   Market Value  322
EXAMPLE 12.1  THE ECONOMIC NATURALIST: Why has female participation in the labor market increased by so much? What explains the trends illustrated in Figure 12.1?  324
   Final Goods and Services  325
   Produced within a Country during a Given Period  328
The Expenditure Method for Measuring GDP  329
GDP and the Incomes of Capital and Labor  333
Nominal GDP versus Real GDP 334

**EXAMPLE 12.2 THE ECONOMIC NATURALIST:** Can nominal and real GDP ever move in different directions? 336

Real GDP Is Not the Same as Economic Well-Being 338

- Leisure Time 338

**EXAMPLE 12.3 THE ECONOMIC NATURALIST:** Why do people work fewer hours today than their great-grandparents did? 338

- Nonmarket Economic Activities 339
- Environmental Quality and Resource Depletion 340
- Quality of Life 340
- Poverty and Economic Inequality 340

But GDP Is Related to Economic Well-Being 341

- Availability of Goods and Services 341
- Health and Education 341

**EXAMPLE 12.4 THE ECONOMIC NATURALIST:** Why do far fewer children complete high school in poor countries than in rich countries? 343

Summary 343

Key Terms 344

Review Questions 344

Problems 344

Answers to In-Chapter Exercises 347

---

**Chapter 13**  
**Inflation and the Price Level** 349

The Consumer Price Index: Measuring the Price Level 350

Inflation 352

Adjusting for Inflation 354

- Deflating a Nominal Quantity 354
- Indexing to Maintain Buying Power 356

Does the CPI Measure “True” Inflation? 357

The Costs of Inflation: Not What You Think 360

- The True Costs of Inflation 361
- “Noise” in the Price System 361
- Distortions of the Tax System 362
- “Shoe-Leather” Costs 363
- Unexpected Redistribution of Wealth 364
- Interference with Long-Run Planning 365

Hyperinflation 366

Inflation and Interest Rates 367

- Inflation and the Real Interest Rate 368
- The Fisher Effect 370

Summary 371

Key Terms 372

Review Questions 372

Problems 373

Answers to In-Chapter Exercises 375

---

**Chapter 14**  
**Wages and Unemployment** 377

Five Important Labor Market Trends 378
PART 7  The Economy in the Short Run

Chapter 18  Short-Term Economic Fluctuations  507

Recessions and Expansions  509
Some Facts about Short-Term Economic Fluctuations  512
Output Gaps and Cyclical Unemployment  515
  Potential Output and the Output Gap  515
  The Natural Rate of Unemployment and Cyclical Unemployment  517
Okun's Law  519
Why Do Short-Term Fluctuations Occur? A Preview and a Parable  521
EXAMPLE 18.1 THE ECONOMIC NATURALIST: Why did the Coca-Cola Company test a vending machine that "knows" when the weather is hot?  523
Summary  524
Key Terms  525
Review Questions  525
Problems  525
Answers to In-Chapter Exercises  526

Chapter 19  Spending and Output in the Short Run  527

The Keynesian Model's Crucial Assumption: Firms Meet Demand at Preset Prices  530
Planned Aggregate Expenditure  531
  Planned Spending versus Actual Spending  532
  Consumer Spending and the Economy  533
  Planned Aggregate Expenditure and Output  536
Short-Run Equilibrium Output  539
Contents

Finding Short-Run Equilibrium Output: Numerical Approach 539
Finding Short-Run Equilibrium Output: Graphical Approach 541
Planned Spending and the Output Gap 542
The Multiplier 545
Stabilizing Planned Spending: The Role of Fiscal Policy 547
Government Purchases and Planned Spending 547
EXAMPLE 19.1 THE ECONOMIC NATURALIST: Why did Japan build roads that nobody wanted to use? 548
Taxes, Transfers, and Aggregate Spending 551
Fiscal Policy as a Stabilization Tool: Three Qualifications 553
Fiscal Policy and the Supply Side 553
The Problem of Deficits 554
The Relative Inflexibility of Fiscal Policy 554
Summary 555
Key Terms 556
Review Questions 556
Problems 556
Answers to In-Chapter Exercises 559
Appendix A: An Algebraic Solution of the Basic Keynesian Model 563
Appendix B: The Multiplier in the Basic Keynesian Model 567

Chapter 20 Stabilizing the Economy: The Role of the Federal Reserve 569
The Federal Reserve 570
The History and Structure of the Federal Reserve System 570
The Fed's Role in Stabilizing Financial Markets: Banking Panics 572
The Effects of Federal Reserve Actions on the Economy 574.
Can the Fed Control the Real Interest Rate? 574
Planned Aggregate Expenditure and the Real Interest Rate 576
The Fed Fights a Recession 578
The Fed Fights Inflation 581
EXAMPLE 20.1 THE ECONOMIC NATURALIST: Why does news of inflation hurt the stock market? 583
The Fed's Monetary Policy Rule 584
The Federal Reserve and Interest Rates 588
The Demand for Money 588
Macroeconomic Factors That Affect the Demand for Money 589
The Money Demand Curve 590
EXAMPLE 20.2 THE ECONOMIC NATURALIST: Why does the average Argentine hold more U.S. dollars than the average U.S. citizen? 592
The Supply of Money and Money Market Equilibrium 593
How the Fed Controls the Nominal Interest Rate 595
A Second Way the Fed Controls the Money Supply: Discount Window Lending 596
A Third Way of Controlling the Money Supply: Changing Reserve Requirements 597
Summary 598
Key Terms 598
Review Questions 599
Chapter 21  

Aggregate Demand, Aggregate Supply, and Macroeconomic Policy 607

The Aggregate Demand–Aggregate Supply Model: A Brief Overview 608
Inflation, Spending, and Output: The Aggregate Demand Curve 609
Shifts of the AD Curve 611
Inflation and Aggregate Supply 615
Inflation Inertia, Output Gaps, and the AS Curve 615
Shifts of the AS Curve 620
Aggregate Demand–Aggregate Supply Analysis 621
An Expansionary Gap 621
A Recessionary Gap 622
The Self-Correcting Economy 623
Monetary Policy and Inflation 624
Excessive Aggregate Spending 624
Responding to Shocks in Aggregate Supply 627
The Core Rate of Inflation 629
Inflationary Expectations and Credibility 631
Central Bank Independence 631
Announcing a Numerical Inflation Target 632
Central Bank Reputation 635

Summary 636
Key Terms 637
Review Questions 637
Problems 638

PART 8:  The International Economy

Chapter 22  Exchange Rates, International Trade, and Capital Flows 643

Exchange Rates 644
Nominal Exchange Rates 645
Flexible versus Fixed Exchange Rates 647
The Determination of the Exchange Rate in the Short Run 648
A Supply and Demand Analysis 648
Changes in the Supply of Dollars 650
Changes in the Demand for Dollars 652
Monetary Policy and the Exchange Rate 652
The Exchange Rate as a Tool of Monetary Policy 654
Fixed Exchange Rates 655
How to Fix an Exchange Rate 655
Monetary Policy and the Fixed Exchange Rate 658
Should Exchange Rates Be Fixed or Flexible? 661
The Euro: A Common Currency for Europe 662
Determination of the Exchange Rate in the Long Run 663
The Real Exchange Rate 663
A Simple Theory of Exchange Rates: Purchasing Power Parity (PPP) 665
Shortcomings of the PPP Theory 667
The Trade Balance and Net Capital Inflows 669
International Capital Flows 670
The Determinants of International Capital Flows 671
Saving, Investment, and Capital Inflows 673
The Saving Rate and the Trade Deficit 674

Summary 677
Key Terms 678
Review Questions 679
Problems 679
Answers to In-Chapter Exercises 681
