Environment and Employment: A Reconciliation

Edited by
Philip Lawn
PART I
An introduction to environment and employment 1

1 Why focus on the connection between the environment and employment? 3
   PHILIP LAWN

   Introduction 3
   Coverage of the book 5
   The moral imperative of full employment 13

2 The potential conflict between ecological sustainability and full employment 24
   PHILIP LAWN

   Introduction 24
   Economic and ecological limits to growth 25
   Debunking pro-growth arguments 62
   The current sustainability–employment trade-off 78
   Concluding remarks 81
Contents

PART II
Post-Keynesian economics and the environment 95

3 Why have Post-Keynesians (perhaps) inadequately dealt with issues related to the environment? 97
ANDREW MEARMAN
Introduction 97
Post-Keynesianism and the environment 97
Data collection and questionnaire design 101
Survey results: why have Post-Keynesians said little on the environment? 102
Conclusions 115

4 Recovering and extending classical and Marshallian foundations for a Post-Keynesian environmental economics 126
PAUL CHRISTENSEN
Introduction 126
Biophysical foundations of early production theory 129
Marshall's neglect of classical foundations 139
Conclusion 142

5 The relevance of Post-Keynesian economics to sustainable development 146
RICHARD HOLT
Introduction 146
The sustainability debate 147
Sustainability in the neoclassical model 148
Main features of Post-Keynesian economics related to public policy 149
The Post-Keynesian approach to policy 153
Sustainable development and Post-Keynesian economics 155
Conclusion 158

PART III
Guaranteed employment versus guaranteed income 161

6 The Basic Income Guarantee and the goals of equality, efficiency, and environmentalism 163
KARL WIDERQUIST AND MICHAEL A. LEWIS
Introduction 163
The definition of poverty and the goal of poverty policy 163
Views on the causes of poverty 164
Social policies to address poverty 167
The Basic Income Guarantee and environmental protection 179
Conclusion 181

7 Evaluating the economic and environmental viability of Basic Income and Job Guarantees 184
PAVLINA R. TCHERNEVA
Introduction 184
Can we pay for Basic Income or Job Guarantees? 185
Macroeconomic consequences of the Basic Income Guarantee 188
Macroeconomic effects of the employer of last resort 191
Environmental aspects of the Basic Income and Job Guarantees 194
The road to participation and the promise for a joint proposal 199
Conclusion 202

8 A comparison of the macroeconomic consequences of Basic Income and Job Guarantee schemes 206
WILLIAM MITCHELL AND MARTIN WATTS
Introduction 206
Constructing the problem 207
The labour market and the welfare system: rights and obligations 215
Coercion and the future of work 218
Employment guarantees and income guarantees in developing countries 220
Conclusion 220

PART IV
Ecological tax reform and the double dividend 225

9 An applied general equilibrium analysis of a double dividend policy for the Spanish economy 227
ANTONIO MANRESA AND FERRAN SANCHO
Introduction 227
The double dividend 228
The modelling facility 230
Policies and simulation results 233
Concluding remarks 238
Contents

10 An empirical assessment of ecological tax reform and the double dividend 241
PHILIP LAWN

Introduction 241
What is the conventional approach to ETR? 242
What do some ecological economists have to say about conventional ETR measures and why? 242
Evidence of ETR performances 246
Concluding remarks 265

PART V
Jobs versus the environment 269

11 A city that works: employment patterns and urban ecosystem service requirements in Greater Christchurch, New Zealand 271
NIGEL JOLLANDS, NANCY GOLUBIEWSKI AND GARRY MCDONALD

Introduction 271
Ecosystem service appropriation and employment 272
The case of Greater Christchurch 274
Method and data used in the analysis 275
Assumptions, limitations, and strengths of the method 281
Results and discussion 284
Conclusions 291

12 Employment and environment in a sustainable Europe 297
FRIEDRICH HINTERBERGER, INES OMANN AND ANDREA STOCKER

Introduction: sustainable development – a European goal 297
Indicators for the three dimensions of sustainable development 298
Theoretical aspects of the economy–employment–environment relationship 300
Empirical application 305
Conclusions 314

13 Managing without growth 317
PETER VICTOR AND GIDEON ROSENBLUTH

Introduction 317
Simulating low/no growth in the Canadian economy 317
Managing without growth: exploring no-/low-growth scenarios 324
Managing without growth: some policy implications 326
Conclusion 328
Appendix: LOWGROW – technical description 329

PART VI
Conclusion 343

14 Final thoughts on reconciling the goals of ecological sustainability and full employment 345
PHILIP LAWN

Introduction 345
What is necessary to achieve ecological sustainability and full employment? 347
An assessment of four major policy approaches 358
A strategy to deal with the full employment/sustainability dilemma 369

Index 380
