## INTRODUCTION

The Ideological Divide and Sound-Bite Economics  
Have Polarized the Public Discussion of Economic Issues  
and Given Rise to Dangerous Myths

1

## BACKGROUND: LESSONS FROM HISTORY AND THE CONSENSUS AMONG ECONOMISTS

Don't Lose Sight of the Big Picture:  
The Major Economic Events and "Grand Experiments" of the  
Twentieth Century Have Taught Us a Lot about Market Forces

7

Believe It or Not, Economists Agree on Many of Today's Issues

17

## PART I

### MARKETS KNOW BEST

Markets and Trading Are Hard-Wired into Humans

27

Yes, There Were No Bananas in East Germany:  
Why the Collective Wisdom of the Crowd Is Almost  
Always Greater than the Wisdom of Governments

33

Famines, Environmental Damage, and Financial Crises:  
How Government Failures Have Often Been  
More Damaging than Market Failures

41

PART II

THERE IS A PRICE FOR EVERYTHING

Minimum Wage, Rent Control, and Environmental Protection:  
Why Politicians and Policy Advocates Don't Like Talking about  
the Costs versus the Benefits of Their Pet Programs

51

Corporate Welfare: Robbing the Poor to Pay the Rich

57

Are Americans Crazy or Europeans Lazy?  
Or Are Both Reacting Rationally to How They  
Are Taxed—and Other Incentives?

64

PART III

COMPETITION IS THE  
CONSUMER'S BEST FRIEND

Attempts to Limit Competition Are Little More  
than Stealing from the Public

71

How Technology and Markets May Be More Successful at  
Limiting Monopoly Power than Governments Are

79

The Good, the Bad, and the Ugly: Deregulation of Airlines,  
Telecommunications, and Electricity

85

**PART IV**  
**GROWTH IS GOOD**

There Are (Almost) No Limits to Economic Growth—  
 How Technology and Productivity Have Delivered  
 Stunning Improvements in Living Standards

**95**

Why Has Asia Been Successful,  
 while Africa Has Fallen Further Behind?

**103**

Doomsayers Have Been Consistently Wrong—  
 We Will Never Run Out of Oil and Other Scarce Commodities

**113**

Nostalgia for the “Good Old Days” Is Seriously Misguided:  
 Lives Were Shorter and Harder, Cities Dirtier, Governments Less  
 Democratic, and Women and Minorities More Oppressed

**119**

**PART V**  
**GLOBALIZATION IS MORE  
 LIKE LOVE THAN WAR**

Technology and Globalization Are  
 Positive-Sum Forces (like Love)  
 rather than Zero-Sum Forces (like War)

**129**

Wrongheaded Notions about Immigration,  
 Offshoring, and Foreign Ownership

**139**

Stop Worrying about the Rise of China,  
 India, and Other Emerging Markets

**151**

Attempts to Slow or Stop Globalization  
 Help Vested Interests, but Hurt the  
 Public at Large—Especially the Poor

**158**

What Should Governments Do?  
Protect People, Not Jobs!

165

No, No, Bono: Trade—Not Aid—  
Is the Best Way to Help the World's Poor

169

PART VI

GOOD GOVERNMENT, BAD GOVERNMENT:  
THE FINE ART OF KNOWING  
WHEN GOVERNMENT INTERVENTION  
HELPS MORE THAN IT HURTS

Governments Can Do a Lot of Good—but  
Only if They Settle for Being the Handmaidens of Markets

177

The Case of 9/11: Why Airports Can Be Privatized,  
but Airport Security Cannot

189

Education and Health Care: Too Important to Be Left  
to either the Public Sector or the Private Sector Alone

195

Social Security and Medicare: Manageable Problems  
That Require Political Courage and Leadership

209

The Lesser of Evils: Why Gasoline and Other  
Consumption Taxes Are Better than Income Taxes

218

The Larger the Footprint of Government,  
the Bigger the Drag on the Economy

228

## PART VII

POVERTY, INEQUALITY, AND  
JOB INSECURITY: HELP THE  
VULNERABLE AND DOWNTRODDEN  
WITHOUT HURTING THE REST

Some Inequality Is OK—Too Much Is Corrosive

235

The Best Antidote for Poverty Is Growth; the Best Antidote for  
Inequality Is Equal Access to Education and Jobs

247

Reducing Job-Loss Fears: Better to Be Securely Unemployed  
(in Europe) or Insecurely Employed (in the United States)?

258

## PART VIII

MACROECONOMIC POLICIES:  
THE LONG (AND ULTIMATELY SUCCESSFUL)  
SEARCH FOR STABILITY

The “Great Moderation”—  
while the Business Cycle Is Not Dead,  
It Has Been Tamed

267

Central Banks Should—Mostly—  
Focus on Keeping Inflation Low

274

Budget Deficits Are OK in the Near Term,  
but Damaging in the Long Term

283

Currency Crises and the Euro—  
Why Flexible Exchange Rates Are (Usually)  
Better than Fixed Ones

291

PART IX

FINANCIAL MARKETS AND THE ECONOMY:  
THE TAIL NEED NOT WAG THE DOG

We Can't Seem to Avoid Manias and Bubbles—  
but Don't Confuse Financial Volatility with  
Financial Instability or Economic Problems

303

Lessons from the Financial Meltdown and Bailout  
of 2008—and All the Ones That Came Before

313

Hedge Funds, Private Equity Firms, and Sovereign Wealth Funds:  
Financial Innovators and “Masters of the Universe,”  
or Just a Bunch of “Locusts” and “Barbarians”?

318

Financial “Re-Regulation”—  
Don't Throw Out the Baby with the Bathwater

326

CONCLUSION: NINE ECONOMIC LESSONS  
FOR A POLARIZED WORLD

333
