

*Edited by Fred L. Bunnell and
Glen B. Dunsworth*

Forestry and Biodiversity
Learning How to Sustain Biodiversity
in Managed Forests

UBC Press · Vancouver · Toronto

Contents

List of Illustrations / viii

Preface / xvii

Acknowledgments / xxi

Part 1: Introduction

1 The Problem / 5

Fred L. Bunnell, Glen B. Dunsworth, David J. Huggard, and Laurie L. Kremsater

- 1.1 "Wicked" Problems / 5
- 1.2 Expanding and Competing Values / 7
- 1.3 Special Difficulties in Forests / 8
- 1.4 Adaptive Management / 10
- 1.5 Bounding the Book: What It Is and Is Not / 12
- 1.6 Summary / 15

2 The Example / 17

Fred L. Bunnell, William J. Beese, and Glen B. Dunsworth

- 2.1 Physical and Ecological Setting / 17
 - 2.1.1 Physical Landscape / 17
 - 2.1.2 Climate, Vegetation, and Fauna / 19
- 2.2 Social and Historical Contexts / 26
- 2.3 New Planning and Practices / 28
 - 2.3.1 Planning / 28
 - 2.3.2 Practices / 31
- 2.4 Structures to Make It Work / 32
- 2.5 Monitoring / 34
- 2.6 Summary / 35

3 The Approach / 36

Fred L. Bunnell and Glen B. Dunsworth

- 3.1 Managers' Questions / 36
- 3.2 Establishing Objectives and Measures of Success / 36
 - 3.2.1 Defining Biological Diversity / 37
 - 3.2.2 A Criterion and Indicators of Success / 39
- 3.3 Deciding on Actions / 42
- 3.4 Evaluating Success / 44
 - 3.4.1 Bounding the Problem / 44
 - 3.4.2 The Major Questions / 46
 - 3.4.3 Kinds of Monitoring and Adaptive Management / 47
 - 3.4.4 Creating Structured Learning / 49
- 3.5 Linking Findings to Actions / 51
- 3.6 Summary / 52

4 Implementing the Approach / 54

Fred L. Bunnell, William J. Beese, and Glen B. Dunsworth

- 4.1 Change in Midstream / 54
- 4.2 Progress in Adopting the Approach / 55
 - 4.2.1 Implementing Planning / 55
 - 4.2.2 Implementing Variable Retention / 58
- 4.3 Assessing the Outcomes of Guidelines / 60
 - 4.3.1 Biological Legacies / 61
 - 4.3.2 Forest Influence / 63
 - 4.3.3 Amount of Retention / 64
 - 4.3.4 Forest Stewardship / 65
 - 4.3.5 Requisite Variety / 66
- 4.4 Lessons from Implementation Monitoring / 67
- 4.5 Summary / 69

Part 2: The Indicators

5 Effectiveness Monitoring: An Introduction / 75

Fred L. Bunnell, David J. Huggard, and Glen B. Dunsworth

- 5.1 Context / 75
- 5.2 How Do We Ask Our Questions? / 76
- 5.3 What Would We Do with the Data if We Had Them? / 78
- 5.4 How Do We Discern What Is Better? / 79
- 5.5 Where Does the Answer Apply? / 80
- 5.6 The Role of Pilot Studies / 81
- 5.7 Summary / 82

6 Ecosystem Representation: Sustaining Poorly Known Species and Functions / 83

David J. Huggard and Laurie L. Kremsater

- 6.1 Rationale / 83
- 6.2 What to Monitor / 85
 - 6.2.1 Amount of Non-Harvestable or Lightly Managed Area / 86
 - 6.2.2 Ecosystem Representation / 86
 - 6.2.3 Size of Non-Harvestable Patches and Geographic Distribution / 89
 - 6.2.4 Edge and Interior / 90
 - 6.2.5 Special Ecosystems and Productivity / 90
 - 6.2.6 Other Indices of Spatial Pattern / 91
 - 6.2.7 Natural Disturbances and Stand Age Distribution / 91
 - 6.2.8 Responsibility and Regional Protected Areas / 92
- 6.3 How to Monitor / 92
- 6.4 Anticipated Feedback to Management / 97
- 6.5 Summary / 99

7 Learning from Ecosystem Representation / 100

David J. Huggard, Laurie L. Kremsater, and Glen B. Dunsworth

- 7.1 Context / 100
- 7.2 Methods / 101
 - 7.2.1 Ecosystem Representation / 101
 - 7.2.2 Edge/Interior and Patch Size / 102
 - 7.2.3 Other Land Use Designations Emphasizing Conservation / 102
 - 7.2.4 Responsibility and Protected Areas / 103
- 7.3 Results / 103
 - 7.3.1 Responsibility and Protected Areas / 103
 - 7.3.2 Representation of Variants in the Non-Harvestable Land Base / 105
 - 7.3.3 Representation of Site Series / 107
 - 7.3.4 Edge/Interior and Other Spatial Aspects / 108
 - 7.3.5 Representation in Other Conservation Designations / 110
- 7.4 Discussion / 111
 - 7.4.1 Limitations of Analysis / 112
 - 7.4.2 Management Priorities: Under-Represented Dry Variants / 113
 - 7.4.3 Management Priorities: Edge Effects / 114
 - 7.4.4 Focusing Finer-Filter Monitoring / 115
- 7.5 Summary / 116

8 Sustaining Forested Habitat / 117

David J. Huggard, Fred L. Bunnell, and Laurie L. Kremsater

- 8.1 Rationale / 117
 - 8.1.1 Habitat Elements in Stands / 118
 - 8.1.2 Habitat Structure in Stands / 119
 - 8.1.3 Landscape Features / 121
- 8.2 What to Monitor / 123
 - 8.2.1 Standard Habitat Elements and Their Attributes / 123
 - 8.2.2 Integrative Habitat Variables / 134
 - 8.2.3 Process Variables for Long-Term Habitat Projections / 136
 - 8.2.4 Landscape Features / 137
 - 8.2.5 Hypothetical Species as Landscape Indices / 140
- 8.3 How to Monitor / 140
 - 8.3.1 Standard Habitat Elements and Their Attributes / 140
 - 8.3.2 Integrative Habitat Variables (Habitat Structures) / 144
 - 8.3.3 Process Variables for Long-Term Habitat Projections / 146
 - 8.3.4 Landscape Features / 147
 - 8.3.5 Hypothetical Species for Landscape Evaluation / 148
- 8.4 Anticipated Feedback to Management / 149
- 8.5 Summary / 151

9 Learning from Habitat Elements / 152

David J. Huggard, Jeff Sandford, and Laurie L. Kremsater

- 9.1 Context / 152
- 9.2 Methods / 153
 - 9.2.1 Field Methods / 153
 - 9.2.2 Subsampling Design / 154
 - 9.2.3 Study Design / 154
 - 9.2.4 Approach to Summaries / 156
- 9.3 Results and Implications / 157
 - 9.3.1 Expected Precision / 157
 - 9.3.2 Comparison among Retention Types / 157
 - 9.3.3 Comparison of Retention Patches with Uncut Benchmarks / 159
 - 9.3.4 Relationships of Habitat Elements with Percent Retention / 162
 - 9.3.5 Edge Effects / 166
 - 9.3.6 Comparison of Patch Anchor Types / 167
 - 9.3.7 Operational Progress / 168
- 9.4 General Discussion / 169
- 9.5 Summary / 171

10 Sustaining Forest-Dwelling Species / 173*Laurie L. Kremsater and Fred L. Bunnell*

- 10.1 Rationale / 173
- 10.2 What to Monitor? An Overview / 174
- 10.3 What to Monitor: Vascular Plants / 177
 - 10.3.1 Factors Influencing Monitoring: Vascular Plants / 178
 - 10.3.2 How to Monitor: Vascular Plants / 180
 - 10.3.3 Links to Management: Vascular Plants / 183
- 10.4 What to Monitor: Bryophytes / 183
 - 10.4.1 Factors Influencing Monitoring: Bryophytes / 184
 - 10.4.2 How to Monitor: Bryophytes / 188
 - 10.4.3 Links to Management: Bryophytes / 188
- 10.5 What to Monitor: Lichens / 189
 - 10.5.1 Factors Influencing Monitoring: Lichens / 189
 - 10.5.2 How to Monitor: Lichens / 193
 - 10.5.3 Links to Management: Lichens / 194
- 10.6 What to Monitor: Fungi / 195
 - 10.6.1 Factors Influencing Monitoring: Fungi / 195
 - 10.6.2 How to Monitor: Fungi / 198
 - 10.6.3 Links to Management: Fungi / 199
- 10.7 What to Monitor: Invertebrates / 199
 - 10.7.1 Factors Influencing Monitoring: Invertebrates / 200
 - 10.7.2 How to Monitor: Invertebrates / 205
 - 10.7.3 Links to Management: Invertebrates / 205
- 10.8 What to Monitor: Vertebrates / 206
 - 10.8.1 Factors Influencing Monitoring: Vertebrates / 206
 - 10.8.2 What to Monitor: Vertebrates / 209
 - 10.8.3 Links to Management: Vertebrates / 212
- 10.9 Overall Feedback to Management / 213
- 10.10 Summary / 214

11 Learning from Organisms / 219*David J. Huggard and Laurie L. Kremsater*

- 11.1 Context / 219
- 11.2 Intended Roles of the Pilot Study Phase / 219
 - 11.2.1 Assess Sensitivity to Forest Practices / 219
 - 11.2.2 Define Ecological Strata / 221
 - 11.2.3 Define Appropriate Sampling Methods / 222
 - 11.2.4 Guide Optimization of Sampling / 223
 - 11.2.5 Illustrate Ways to Generalize / 224
 - 11.2.6 Summary of the Pilot Phase / 225

- 11.3 Individual Monitoring Projects / 226
 - 11.3.1 Breeding Bird Surveys / 226
 - 11.3.2 Songbirds / 226
 - 11.3.3 Owls / 227
 - 11.3.4 Red Squirrels / 230
 - 11.3.5 Carabid (Ground) Beetles / 230
 - 11.3.6 Gastropods / 231
 - 11.3.7 Bryophytes and Vascular Plants / 232
 - 11.3.8 Epiphytic Lichens / 235
 - 11.3.9 Ectomycorrhizal Fungi / 235
 - 11.3.10 Aquatic-Breeding Amphibians / 236
- 11.4 Summary / 237

Part 3: Summary

12 Designing a Monitoring Program / 241

David J. Huggard, Laurie L. Kremsater, and Fred L. Bunnell

- 12.1 Context / 241
- 12.2 How to Ask Questions / 242
 - 12.2.1 Comparisons and Mechanisms / 242
 - 12.2.2 Types of Comparisons / 243
- 12.3 Stand-Level Comparisons / 243
 - 12.3.1 Very High-Priority Comparisons / 244
 - 12.3.2 High-Priority Comparisons / 246
 - 12.3.3 Moderate-Priority Comparisons / 250
 - 12.3.4 Low-Priority Comparisons / 251
 - 12.3.5 Summary of Comparisons / 253
- 12.4 Selecting Indicator Variables / 255
- 12.5 Matching Indicators with Comparisons / 256
- 12.6 Answering Questions Well / 258
 - 12.6.1 Operational versus Experimental Comparisons / 258
 - 12.6.2 Blocking Factors / 260
 - 12.6.3 Pre-Treatment Measurement / 261
- 12.7 Monitoring over Larger Areas / 262
 - 12.7.1 Indicator 1: Representation of Ecosystem Types in Non-Harvestable Areas / 263
 - 12.7.2 Indicator 2: Stand and Landscape Features / 264
 - 12.7.3 Indicator 3: Organisms / 265
 - 12.7.4 Other Possible Ecological Variables for Broad-Scale Monitoring / 266

- 12.8 The Role of Models / 267
 - 12.8.1 General Modelling Approach / 267
 - 12.8.2 Specific Forms of Modelling / 268
 - 12.8.3 Implications of Incorporating Mechanisms / 273
- 12.9 Summary / 274

13 Summary: Progress and Lessons Learned / 276

Fred L. Bunnell, David J. Huggard, and Laurie L. Kremsater

- 13.1 Context / 276
- 13.2 Progress / 276
- 13.3 Lessons Learned / 279
 - 13.3.1 Organizational Structure / 279
 - 13.3.2 Design / 282
 - 13.3.3 Feedback / 285
- 13.4 Summary Thoughts / 292

Appendices / 294

Notes / 303

Glossary / 309
