PREFACE xvi

PART 1 INTRODUCTION 1

CHAPTER 1 Thinking About Macroeconomics 2

Output, Unemployment, and Prices in Canadian History 3

By The Numbers: History of U.S. real GDP, unemployment, and inflation 8

Economic Models 10

A Simple Example—The Coffee Market 12

Extending The Model: Demand and supply curves are functions 13

Flexible Versus Sticky Prices 17

Key Terms and Concepts 18

CHAPTER 2 National-Income Accounting: Gross Domestic Product and the Price Level 19

Nominal and Real GDP 19

Calculating Real GDP 21

Real GDP as a Measure of Welfare 23

Alternative Views of GDP—Expenditure, Income, and Production 23

Measuring GDP by Expenditure 24

Measuring GDP by Income 26

Differences between GDP and national income 28

Personal income and personal disposable income 30

Measuring GDP by Production 30

Seasonal Adjustment 30

By The Numbers: Gross provincial and territorial product by Canadian provinces and territories 32

Prices 32

Back To Reality: Problems with the consumer price index 33

Key Terms and Concepts 34

Questions and Problems 35

PART 2 ECONOMIC GROWTH 37

CHAPTER 3 Introduction to Economic Growth 38

Facts About Economic Growth 40

Economic Growth Around the World, 1960 to 2000 40

World Poverty and Income Inequality 44

Long-Term Growth in Canada and Other Rich Countries 46

Patterns of World Economic Growth 48

Theory of Economic Growth 49

The Production Function 49

Growth Accounting 52

The Solow Growth Model 55

Back To Reality: Intellectual origin of the Solow growth model 56

The growth rate of the capital stock 57
## Contents

The growth rate of labour 58  
The growth rate of capital and real GDP per worker 59  
The transition and the steady state 60

**Do The Math** 63  
Summing Up 65  
Key Terms and Concepts 65  
Questions and Problems 65  
Appendix 67  
  - *Part A: The Growth-Accounting Equation* 67  
  - *Part B: The Solow Residual* 69  
  - *Part C: The Cobb-Douglas Production Function* 69

### CHAPTER 4 Working with the Solow Growth Model 71

A Change in the Saving Rate 72  
**Do The Math** 73  
A Change in the Technology Level 73  
**Extending The Model:** Consumption in the Solow model 74  
**Do The Math** 76  
Changes in Labour Input and the Population Growth Rate 76  
  - *A Change in Labour Input* 76  
**Do The Math** 78  
  - *A Change in the Population Growth Rate* 79  
**Do The Math** 80  
Convergence 81  
  - *Convergence in the Solow Model* 81  
**Extending The Model:** Endogenous population growth 82  
  - *Facts About Convergence* 85  
  - *Conditional Convergence in the Solow Model* 86  
Where Do We Stand with the Solow Model? 92  
Key Terms and Concepts 92  
Questions and Problems 93  
Appendix 94  
  - *The Rate of Convergence* 94

### CHAPTER 5 Conditional Convergence and Long-Run Economic Growth 98

Conditional Convergence in Practice 98  
  - *Recent Research on the Determinants of Economic Growth* 99  
  - *Examples of Conditional Convergence* 101  
**Back To Reality:** A rock star’s perspective on debt relief and foreign aid 102  
Long-Run Economic Growth 103  
  - *Models with Constant Average Product of Capital* 104  
  - *Exogenous Technological Progress* 106  
    - The steady-state growth rate 107  
    - Steady-state saving 109  
    - The transition path and convergence 110  
  - *Endogenous Growth Theory* 111  
**Back To Reality:** The story of Napster and Viagra 115  
  - *The Diffusion of Technology* 117  
**Back To Reality:** Hybrid corn: A case of technological diffusion 118  
What Do We Know About Economic Growth? 119  
Key Terms and Concepts 119  
Questions and Problems 120
Appendix 120

The Steady-State Path in the Solow Model with Exogenous
Technological Progress 120

PART 3  ECONOMIC FLUCTUATIONS  123

CHAPTER 6  Markets, Prices, Supply, and Demand 124

Markets in the Macroeconomy 126

The Goods Market 126
The Labour Market 126
The Rental Market 127
The Bond Market 128

Money as a Medium of Exchange 128

Back To Reality: Common currency 129

Markets and Prices 129

The Goods Market 129
The Labour Market 130
The Rental Market 131
The Bond Market 131

Extending The Model: On bonds, interest rates, and the
yield curve 132

Constructing the Budget Constraint 133

Income 134

Profit 134
Wage income 134
Rental income 134
Interest income 135
Total income 135

Consumption 135
Assets 136

Household Budget Constraint 137

Extending The Model: Allowing for a risk premium on ownership
of capital 138

Clearing of the Markets for Labour and Capital Services 140

Profit Maximization 140
The Labour Market 140
Demand for labour 140
Supply of labour 142
Clearing of the labour market 142
The Market for Capital Services 144
Demand for capital services 144
Supply of capital services 145
Clearing of the market for capital services 145
The interest rate 146

Profit in Equilibrium 147

Back To Reality: Economic profit versus accounting profit 148

Summing Up 148

Key Terms and Concepts 149
Questions and Problems 149

Appendix 151

Output Equals Real Factor Incomes and Profit Equals Zero 151
CHAPTER 7 Consumption, Saving, and Investment 153

Consumption and Saving 153

Consumption Over Two Years 155

Present value 160

Choosing consumption: income effects 160

Choosing consumption: the intertemporal-substitution effect 161

By The Numbers: Empirical evidence on intertemporal substitution of consumption 163

The income effect from a change in the interest rate 163

Combining income and substitution effects 164

Consumption Over Many Years 164

By The Numbers: Empirical evidence on the propensity to consume 168

Consumption, Saving, and Investment in Equilibrium 168

By The Numbers: The response of consumption to anticipated income changes 169

Summing Up 170

Key Terms and Concepts 171

Questions and Problems 171

Appendix 172

The Multiyear Budget Constraint and the Planning Horizon 172

CHAPTER 8 An Equilibrium Business-Cycle Model 175

Cyclical Behaviour of Real GDP—Recessions and Booms 175

By The Numbers: Recessions in long-term Canadian history 179

An Equilibrium Business-Cycle Model 180

Conceptual Issues 180

The Model 181

The marginal product of labour and the real wage rate 182

Marginal product of capital, real rental price, and the interest rate 183

Consumption, saving, and investment 186

Matching the Theory with the Facts 187

Consumption and Investment 187

The Real Wage Rate 190

The Real Rental Price 191

The Interest Rate 191

By The Numbers: The real rental price of capital in the United States 192

Temporary Changes in the Technology Level 193

Variations in Labour Input 194

Labour Supply 194

The substitution effect for leisure and consumption 194

Income effects on labour supply 195

Intertemporal-substitution effects on labour supply 196

By The Numbers: Empirical evidence on intertemporal substitution of labour supply 197

Fluctuations in Labour Input 197

The cyclical behaviour of labour input: empirical 197

The cyclical behaviour of labour input: theory 198

The cyclical behaviour of labour productivity 200

Summing Up 201

Key Terms and Concepts 202

Questions and Problems 202
CHAPTER 9 Capital Utilization and Unemployment 204

Capital Input 204

The Demand for Capital Services 205

The Supply of Capital Services 206

Back To Reality: Multiple shifts and overtime hours 209

Market Clearing and Capital Utilization 210

The Cyclical Behaviour of Capacity Utilization 212

The Labour Force, Employment, and Unemployment 212

Basic Concepts and Empirical Patterns 213

A Model of Job Finding 217

Search by Firms 220

Job Separations 221

Job Separations, Job Finding, and the Natural Unemployment Rate 222

Economic Fluctuations, Employment, and Unemployment 225

Vacancies 226

By The Numbers: Labour market fluctuations in the United States 227

Back To Reality: Seasonal fluctuations 229

Summing Up 230

Key Terms and Concepts 230

Questions and Problems 231

PART 4 MONEY AND PRICES 233

CHAPTER 10 The Demand for Money and the Price Level 234

Concepts of Money 234

Back To Reality: Money in a prisoner-of-war camp 235

Back To Reality: Where is all the currency? 236

The Demand for Money 238

The Interest Rate and the Demand for Money 240

The Price Level and the Demand for Money 240

Real GDP and the Demand for Money 240

Other Influences on the Demand for Money 241

The Money-Demand Function 241

Back To Reality: The payments period and the demand for money 242

Empirical Evidence on the Demand for Money 242

Determination of the Price Level 243

The Nominal Quantity of Money Supplied Equals the Nominal Quantity Demanded 243

A Change in the Nominal Quantity of Money 245

The Neutrality of Money 247

A Change in the Demand for Money 248

The Cyclical Behaviour of the Price Level 249

Back To Reality: The quantity theory of money 250

Price-Level Targeting and Endogenous Money 251

Trend growth of money 253

Cyclical behaviour of money 253

Seasonal variations in money 255

Summing Up 255

Key Terms and Concepts 256

Questions and Problems 256

References 259
CHAPTER 11  

Inflation, Money Growth, and Interest Rates 260
Inflation and Interest Rates 266
   Actual and Expected Inflation 266
   Real and Nominal Interest Rates 267
   The Real Interest Rate and Intertemporal Substitution 269
   Actual and Expected Real Interest Rates 270
      Measuring expected inflation 270
      Canadian expected inflation and interest rates since World War II 271
      Indexed bonds, real interest rates, and expected inflation rates 272
   Interest Rates on Money 274
By The Numbers: Indexed bonds, real interest rates, and expected inflation rates in the United States 275
Inflation in the Equilibrium Business-Cycle Model 276
   Intertemporal-Substitution Effects 277
   Bonds and Capital 277
   Interest Rates and the Demand for Money 278
   Inflation and the Real Economy 278
      Money Growth, Inflation, and the Nominal Interest Rate 280
Back To Reality: International evidence on the neutrality of money and the Fisherian link 281
      A Trend in the Real Demand for Money 283
      A Shift in the Money Growth Rate 284
      Government Revenue from Printing Money 288
      The Welfare Cost of Inflation 289
By The Numbers: Money and prices during the German hyperinflation 290
Summing Up 291
Key Terms and Concepts 292
Questions and Problems 292

PART 5  

THE GOVERNMENT SECTOR 297
CHAPTER 12  

Government Expenditure 298
Data on Government Expenditure 298
The Government's Budget Constraint 300
By The Numbers: Just how much bigger is government in Canada? 303
Public Production 304
Public Services 305
The Household's Budget Constraint 305
Permanent Changes in Government Purchases 307
      A Permanent Change in Government Purchases: Theory 307
Extending The Model: Useful public services 310
      The Cyclical Behaviour of Government Purchases 312
Temporary Changes in Government Purchases 312
      A Temporary Change in Government Purchases: Theory 312
      Government Purchases and Real GDP During Wartime: Empirical 314
Extending The Model: Effects on the term structure of interest rates 317
      Wartime Effects on the Economy 318
         Employment during wartime 318
         Effects of war on labour supply 318
         Effects of war on the real wage rate 320
         Effects of war on the rental market 320
Summing Up 322
CHAPTER 13  Taxes 325
Taxes in Canada 325
Types of Taxes 327

By The Numbers: Average marginal income tax rates 330
Taxes in the Model 331
A Tax on Labour Income 332
A Tax on Asset Income 336

Extending The Model: A consumption tax 337
An Increase in Government Purchases Financed by a Labour Income Tax 339

Back To Reality: The Laffer curve 340
Transfer Payments 343
Summing Up 343
Key Terms and Concepts 343
Questions and Problems 344

CHAPTER 14  Public Debt 346
The History of Canadian Public Debt 346
Public Debt in the U.S. and U.K. 348
Characteristics of Government Bonds 351
Budget Constraints and Budget Deficits 352
The Government’s Budget Constraint 352
The Budget Deficit 353
Public Saving, Private Saving, and National Saving 355
Public Debt and Households’ Budget Constraints 356
A Simple Case of Ricardian Equivalence 356
Another Case of Ricardian Equivalence 359
Ricardian Equivalence More Generally 360
Economic Effects of a Budget Deficit 361
Lump-Sum Taxes 361
Labour Income Taxes 362
Asset Income Taxes 363
The Timing of Taxes and Tax-Rate Smoothing 364
Strategic Budget Deficits 365
Back To Reality: “Unpleasant monetarist arithmetic” 366
The Standard View of a Budget Deficit 366
Finite lifetimes 368
Imperfect credit markets 369
Social Security 370

By The Numbers: Empirical evidence on the macroeconomic effects of budget deficits 371
Open-Market Operations 372
Summing Up 374
Key Terms and Concepts 374
Questions and Problems 375

PART 6  MONEY AND BUSINESS CYCLES 377

CHAPTER 15  Money and Business Cycles I: The Price-Misperceptions Model 378
Effects of Money in the Equilibrium Business-Cycle Model 378
The Price-Misperceptions Model 379
A Model with Non-Neutral Effects of Money 379
Money Is Neutral in the Long Run 383
Only Unperceived Inflation Affects Real Variables 383
Predictions for Economic Fluctuations 385
Empirical Evidence on the Real Effects of Monetary Shocks 386
Friedman and Schwartz's Monetary History 386
Unanticipated money growth 387
Romer and Romer on U.S. Federal Reserve policy 387
A brief overview 388
Real Shocks 388

Back To Reality: Incomplete information about prices: Is it significant? 389
Rules Versus Discretion 391
Summing Up 395
Key Terms and Concepts 396
Questions and Problems 396

CHAPTER 16 Money and Business Cycles II: Sticky Prices and Nominal Wage Rates 398

The New Keynesian Model 398
Price Setting Under Imperfect Competition 399
Short-Run Responses to a Monetary Shock 401
New Keynesian Predictions 403
Price Adjustment in the Long Run 404

By The Numbers: Evidence on the stickiness of prices 406
Comparing Predictions for Economic Fluctuations 407
Shocks to Aggregate Demand 407
Money and Nominal Interest Rates 409
The Operating Band for the Overnight Rate 409
The Market for Reserves 410
The Tools of Monetary Policy 411
Open-market buyback operations 412
Receiver General auctions 412
Settlement balances 413
Monetary Policy at Times of Financial Crisis 413

Extending The Model: Monetary policy tools of the Federal Reserve 414
The Role of Monetary Aggregates 415
Inflation Targeting 416

The Keynesian Model—Sticky Nominal Wage Rates 418

Back To Reality: Keynes, Friedman, and the Great Depression 419
Back To Reality: The real wage rate during the New Deal 422
Long-Term Contracts and Sticky Nominal Wage Rates 423

By The Numbers: Empirical evidence on the contracting approach 424
Summing Up 426
Key Terms and Concepts 426
Questions and Problems 427

PART 7 INTERNATIONAL MACROECONOMICS 429

CHAPTER 17 World Markets in Goods and Credit 430

The Balance of International Payments 431
History of the Canadian Current-Account Balance 434
Determinants of the Current-Account Balance 437
Economic Fluctuations 441
Harvest Failures, Government Purchases, Developing Countries 442
Examples of International Borrowing and Lending 444
The Current-Account Deficit and the Budget Deficit 446
