PART I

Welfare economics	1
Introduction to Part I	2
1 A quick primer on consumer demand	3
1.1 <i>Introduction</i>	3
1.2 <i>Some key definitions</i>	3
1.3 <i>Utility functions</i>	7
1.4 <i>The consumer's utility maximization problem</i>	7
1.5 <i>Some other useful relations in demand theory</i>	13
1.6 <i>Consumer's surplus and measurement of welfare changes</i>	14
1.7 <i>Conclusions</i>	17
1.8 <i>Appendix on welfare evaluation of economic changes</i>	18
2 Perfect competition and Pareto optimality	28
2.1 <i>Introduction</i>	28
2.2 <i>Paretian ranking of social states</i>	28
2.3 <i>Pareto optimality</i>	29
2.4 <i>The classical theorems of welfare economics</i>	33
2.5 <i>An extension to the case of uncertainty</i>	43
2.6 <i>The theorem of second best</i>	51
2.7 <i>Conclusions</i>	53

3	Forms of the social welfare function	54
3.1	<i>Introduction</i>	54
3.2	<i>Early attempts at formulating an approach to distribution</i>	54
3.3	<i>Aggregating individual preferences to arrive at social choice</i>	58
3.4	<i>Arrow's general possibility and other impossibility theorems</i>	61
3.5	<i>Beyond the Arrow framework</i>	68
3.6	<i>Forms of the social welfare function (SWF)</i>	70
3.7	<i>Concluding remarks</i>	74
	PART II	
	The theory of public expenditure	75
	Introduction to Part II	76
4	External effects and the market mechanism	79
4.1	<i>Introduction</i>	79
4.2	<i>Effects of externalities</i>	80
4.3	<i>A policy example: the pricing of education</i>	85
4.4	<i>Common property resources</i>	90
4.5	<i>Multilateral externalities</i>	92
4.6	<i>Conclusions</i>	94
5	The theory of pure public goods	95
5.1	<i>Introduction</i>	95
5.2	<i>Pareto optimality with pure public goods</i>	96
5.3	<i>Public goods with distortionary taxation</i>	99
5.4	<i>The free-rider problem</i>	101
5.5	<i>Private provision of public goods</i>	110
5.6	<i>Voting models of public goods</i>	115
5.7	<i>Concluding remarks</i>	120
6	Topics in the theory of public goods	121
6.1	<i>Introduction</i>	121
6.2	<i>The theory of clubs</i>	121
6.3	<i>The Tiebout hypothesis</i>	124
6.4	<i>Multi-product clubs</i>	129
6.5	<i>Financing pure public goods with distortionary taxes</i>	133

- 6.6 *Public goods provision with asymmetric information* 136
- 6.7 *Rent seeking* 143
- 6.8 *Conclusions* 150

PART III

7	The theory of taxation	153
	Introduction to Part III	154
	7 The effects of taxes on savings	157
	7.1 <i>Introduction</i>	157
	7.2 <i>The elementary life-cycle model of saving</i>	157
	7.3 <i>Capital market imperfections and the life-cycle model</i>	163
	7.4 <i>Broader life-cycle models of savings and taxes</i>	165
	7.5 <i>Aggregate savings and taxation</i>	166
	7.6 <i>A consumption/expenditure tax</i>	170
	7.7 <i>Savings by firms</i>	178
	7.8 <i>Social security, pensions, and savings</i>	178
	7.9 <i>The extended life-cycle models of savings</i>	180
	7.10 <i>Empirical evidence on effects of taxes on savings</i>	182
	7.11 <i>Conclusions</i>	184
8	Taxation and labor supply	186
	8.1 <i>Introduction</i>	186
	8.2 <i>The basic model of labor supply</i>	186
	8.3 <i>Comparison of the effects of various types of taxes</i>	189
	8.4 <i>Taxation and the decision to enter the labor market</i>	190
	8.5 <i>Effects of a progressive tax on labor supply</i>	193
	8.6 <i>A summary of the empirical evidence on effects of lower taxes on labor supply</i>	200
	8.7 <i>Conclusions</i>	205
	<i>Appendix</i>	205
9	The effects of taxes on investment behavior	208
	9.1 <i>Introduction</i>	208
	9.2 <i>The Fisherian model</i>	208
	9.3 <i>The aggregate approach</i>	213
	9.4 <i>Comparing the effects of an investment tax credit versus a corporate tax cut: a Cobb–Douglas example</i>	222
	9.5 <i>Decisions on the financing of investment expenditure</i>	224
	9.6 <i>The effective rate of taxation and the cost of finance</i>	224

x Contents

9.7	<i>The impact of subsidies on incentives for R&D</i>	231
9.8	<i>Conclusions</i>	232
10	Taxation and risk taking	234
10.1	<i>Introduction</i>	234
10.2	<i>Effects of taxation on risk taking by households</i>	234
10.3	<i>The Modigliani–Miller theorem and decisions on the financing of investment expenditure</i>	238
10.4	<i>The effects of progression on risk taking</i>	246
10.5	<i>Concluding comments</i>	248
11	The theory of tax incidence	249
11.1	<i>Introduction</i>	249
11.2	<i>Tax incidence in the two-sector model of general equilibrium</i>	250
11.3	<i>Tax incidence in a model of involuntary unemployment</i>	259
11.4	<i>Extensions of the basic model</i>	265
11.5	<i>Tax incidence with a rate of return regulation</i>	266
11.6	<i>Conclusions</i>	271
12	Tax incidence in dynamic models	273
12.1	<i>Introduction</i>	273
12.2	<i>The neoclassical model of economic growth</i>	273
12.3	<i>Balanced growth path tax incidence</i>	278
12.4	<i>Taxation in the life-cycle model</i>	279
12.5	<i>Tax incidence in a monetary version of the Solow model</i>	282
12.6	<i>Tax incidence in more general life-cycle models</i>	285
12.7	<i>Land rent taxation in an intertemporal economy</i>	294
12.8	<i>Tax and debt as revenue instruments</i>	297
12.9	<i>Conclusions</i>	302
13	Some results in commodity taxation	304
13.1	<i>Introduction</i>	304
13.2	<i>Elasticity type rules in commodity taxation</i>	304
13.3	<i>Uniform commodity taxation</i>	310
13.4	<i>Redistributive indirect taxation</i>	311
13.5	<i>Extent of redistribution through commodity taxation</i>	315
13.6	<i>The value added tax (VAT)</i>	319
13.7	<i>VAT and the informal sector</i>	323
13.8	<i>Conclusions</i>	326

14 Aspects of income taxation	328
14.1 <i>Introduction</i>	328
14.2 <i>Optimal linear taxes</i>	328
14.3 <i>Optimal non-linear income taxation (Mirrlees and Ramsey)</i>	331
14.4 <i>Information theoretic foundations of optimal tax theory</i>	339
14.5 <i>Optimal taxation with imperfect substitution of labor</i>	346
14.6 <i>Optimal wage and interest income taxation in steady state</i>	348
14.7 <i>The optimal mix of direct and indirect taxes</i>	353
14.8 <i>Conclusions</i>	356
<i>Appendix</i>	357
15 Topics in the theory of taxation	359
15.1 <i>Introduction</i>	359
15.2 <i>Taxation in models of endogenous growth</i>	359
15.3 <i>Problems of income tax indexation</i>	364
15.4 <i>Time inconsistency</i>	366
15.5 <i>Tax compliance and tax evasion</i>	373
15.6 <i>Intertemporal tax evasion: Andreoni's model</i>	379
15.7 <i>Concluding comments</i>	382
16 Tax reform	384
16.1 <i>Introduction</i>	384
16.2 <i>Welfare foundations of tax reform</i>	390
16.3 <i>Tax reform in a dynamic context</i>	396
16.4 <i>The marginal approach to tax reform</i>	401
16.5 <i>Conclusions</i>	406
PART IV	
Applied problems in public economics	409
Introduction to Part IV	410
17 Pricing in the public sector	411
17.1 <i>Introduction</i>	411
17.2 <i>The Ramsey–Boiteux linear pricing problem</i>	411
17.3 <i>Some simplified examples</i>	415
17.4 <i>The optimality of marginal cost pricing</i>	417
17.5 <i>Second-best Ramsey–Boiteux pricing once again</i>	422
17.6 <i>Redistributive Ramsey (Feldstein) pricing – the general case</i>	425

xii *Contents*

17.7	<i>Multi-part tariffs</i>	426
17.8	<i>Peak load pricing</i>	434
17.9	<i>Pricing of joint products – allocation of common costs</i>	437
17.10	<i>Conclusions</i>	443
18	International aspects of taxation	445
18.1	<i>Introduction</i>	445
18.2	<i>The theory of tariffs in an open economy</i>	445
18.3	<i>International fiscal coordination: interest taxation</i>	452
18.4	<i>Integrating personal and corporate taxation in an open economy</i>	457
18.5	<i>Ramsey optimal taxation in an open economy</i>	461
18.6	<i>Concluding remarks</i>	462
19	Tax incentives and corporate taxation	464
19.1	<i>Introduction</i>	464
19.2	<i>Tax incentives</i>	470
19.3	<i>Effective tax rates</i>	475
19.4	<i>Conclusions</i>	479
20	Global public goods	480
20.1	<i>Introduction</i>	480
20.2	<i>Defining a global public good</i>	480
20.3	<i>Allocation issues with inter-generational global public goods</i>	482
20.4	<i>Understanding supply decision problems of global public goods</i>	484
20.5	<i>International cooperation and global public goods</i>	487
20.6	<i>Conclusions</i>	488
21	Cost-benefit analysis and randomized evaluation	490
21.1	<i>Introduction</i>	490
21.2	<i>Criteria for cost-benefit analysis</i>	491
21.3	<i>The social rate of discount</i>	493
21.4	<i>Evaluating benefits and costs – shadow prices</i>	496
21.5	<i>Some difficulties in the measurement of benefits and costs</i>	504
21.6	<i>Randomized evaluation</i>	505
21.7	<i>Conclusions</i>	508

22 Environmental taxation and emission trading schemes	510
22.1 <i>Introduction</i>	510
22.2 <i>Instrument choice in the design of environmental policy</i>	511
22.3 <i>Choosing between environmental taxes and emissions trading</i>	514
22.4 <i>Designing environmental taxes</i>	515
22.5 <i>Efficiency in permit markets</i>	518
22.6 <i>Comparing auctions and grandfathering</i>	520
22.7 <i>Conclusions</i>	521
PART V	
Fiscal federalism	523
Introduction to Part V	524
23 Issues in fiscal federalism	525
23.1 <i>Introduction and background</i>	525
23.2 <i>Efficiency and equity in a federal economy</i>	526
23.3 <i>Equity considerations with layers of governments</i>	527
23.4 <i>Rationale for the existence of subcentral authorities</i>	528
23.5 <i>Other roles of subcentral authorities</i>	534
23.6 <i>The optimal size of local jurisdictions</i>	535
23.7 <i>Conclusions</i>	539
<i>Appendix</i>	540
24 Grants and taxes in federal countries	545
24.1 <i>Introduction</i>	545
24.2 <i>Purposes of grants</i>	545
24.3 <i>Types of grants</i>	553
24.4 <i>The effects of various types of grants – traditional models</i>	554
24.5 <i>The new models of the effects of grants</i>	559
24.6 <i>Tax assignment in federal countries</i>	561
24.7 <i>Conclusions</i>	567
<i>Problems</i>	569
<i>Bibliography</i>	582
<i>Author index</i>	616
<i>Subject index</i>	620
