Introduction  1

PART I
Demand-led growth and structural change  9

1 Growth theory from a demand-side perspective  11
  1.1 Demand-led growth  12
  1.2 The theory of Transformational Growth  19
  1.3 Evolutionary theory and the demand side of economic growth  23

2 Transformational Growth and the structural dynamics of market creation  26
  2.1 An alternative framework for the analysis of growth  26
  2.2 A reformulation of demand-led growth: Transformational Growth and the consumption-growth relationship  27
  2.3 The structural dynamics of market creation  31

3 Growth, effective demand and the composition of output  40
  3.1 Effective demand in the long run  40
  3.2 Structural dynamics and demand composition  41
  3.3 Product innovation  43
  3.4 Innovation in consumption  46
  3.5 The composition effect: new products and expansion  48
  3.6 Need development and collective goods  52
PART II
The 1990s expansion: technology, investment and new markets

4 The 1990s: the boom and the bust of the "New Economy"
   4.1 The roaring 1990s
   4.2 The expansion and new technologies
   4.3 Interpreting the 1990s expansion
   4.4 The New Economy: rhetoric and facts
   4.5 An appraisal and a new hypothesis

5 Information and communication technologies: productivity and structural change
   5.1 Hi-Tech, productivity and the macroeconomy
   5.2 The ICT sector
   5.3 Information technologies and the US economy
   5.4 From productivity studies to the analysis of structural change
   5.5 Increasing returns: the network effect

6 Technology, investment, new markets: the forward and backward linkages
   6.1 Investment and structural change: spill-over vs the forward linkage
   6.2 A desegregated analysis of investment
   6.3 Computerization: industrial restructuring and a new technological infrastructure
   6.4 The advancing technological frontier: the Internet
   6.5 The backward linkage: science and technology
   6.6 The forward linkage reconsidered

7 The transformation of the Consumption Sphere and market creation
   7.1 Change in consumption and need development in the 1990s
   7.2 New products and the pattern of transformation of consumption
   7.3 E-commerce: a future of electronic transactions?
   7.4 Need development and market creation
   7.5 The transformation of the Consumption Sphere: limiting factors
PART III
Two decades of structural transformation in the US economy: the path of Transformational Growth 119

8 From the recovering 1980s to the booming 1990s 121
8.1 The 1990s expansion in a long-term perspective 121
8.2 A break in the pattern of growth of the post-war period 122
8.3 Growth and cyclical expansion in the post-war period 125
8.4 Cyclical expansion, structural transformation and market creation 127
8.5 Long-term economic development 132

9 Innovative investment and long-term development: questions from the 1990s 134
9.1 The dynamic instability of the 1990s 134
9.2 The stylized facts of the information economy 136
9.3 The network effect and ICT-driven development 137
9.4 Innovative investment and market development 138
9.5 Questions from the 1990s 142

10 The path of Transformational Growth 145
10.1 The flop of the Internet scenario of economic development 145
10.2 ICTs as general purpose technology (GPT) 149
10.3 Beyond the New Economy 151
10.4 Concluding remarks 156
