Econometric Studies to the Economic and Social Factors of Crime

ACADEMISCH PROEFSCHRIFT

der verkrijging van de graad Doctor aan
de Vrije Universiteit Amsterdam,
op gezag van de rector magnificus
prof.dr. L.M. Bouter,
in het openbaar te verdedigen
ten overstaan van de promotiecommissie
van de faculteit der Economische Wetenschappen en Bedrijfskunde
op donderdag 7 mei 2009 om 10.45 uur
in de aula van de universiteit,
De Boelelaan 1105

1 Introduction 1

1.1 Motivation and background ................................................. 1

1.2 Outline ............................................................................. 2

1.2.1 The impact of sentence reform in Virginia ......................... 2

1.2.2 Economic trends and cycles in crime .............................. 4

1.2.3 Education and crime .................................................. 5

1.2.4 Early behavioural problems and human capital ................. 7

1.3 Software ........................................................................ 8

2 Intervention Time Series Analysis of Crime Rates: The Impact of Sentence Reform in Virginia 9

2.1 Introduction ...................................................................... 9

2.2 Changes in criminal justice system of Virginia ..................... 11

2.3 Plan and details of empirical intervention study .................... 17

2.3.1 Data description ........................................................ 17

2.3.2 Intervention analysis ................................................... 20

2.3.3 Preliminary data analysis ............................................. 22

2.4 Preliminary approaches to intervention analysis .................. 22

2.4.1 Regression analysis .................................................... 22

2.4.2 Regression models with ARMA errors ......................... 27

2.4.3 Box-Jenkins ARIMA model approach ......................... 30

2.5 The structural time series approach .................................... 34

2.5.1 The basic structural time series model ......................... 34

2.5.2 State space representation, filtering and smoothing .......... 37

2.5.3 Equivalence between STS and ARIMA models ............... 42

2.5.4 Structural time series analysis results ......................... 43

2.6 The multivariate structural time series approach ................. 51

2.6.1 The multivariate STS approach: state space formulation .... 51

2.6.2 Multivariate STS intervention analysis results ............... 55

2.7 General discussion of empirical findings ......................... 56

2.7.1 Relation to difference-in-difference approach ............... 56
3 Economic Trends and Cycles in Crime: A Study for England and Wales

3.1 Introduction

3.2 Decomposition of the economic and crime series

3.2.1 Data and methodology

3.2.2 Trend-cycle decompositions for economic and crime series

3.2.3 Regression effects

3.3 Multivariate trend-cycle decompositions

3.3.1 The multivariate unobserved components model

3.3.2 Multivariate decomposition results

3.3.3 Multivariate decomposition results with explanatory variables

3.3.4 Model for thefts

3.3.5 Multivariate model with economics, crime and police

3.4 Literature overview on crime and economic incentives

3.4.1 Criminal opportunity and criminal motivation

3.4.2 Unemployment and crime

3.4.3 Income and crime

3.5 Conclusion

3.A Appendix

3.A.1 Definitions of variables and sources of data

4 Crime and Education: New Evidence From Britain

4.1 Introduction

4.2 How education can impact on crime

4.3 Crime data sources and schooling reform in Britain

4.3.1 Crime data sources

4.3.2 Background on the schooling reform in Britain

4.4 Data description and matching approaches

4.4.1 Data

4.4.2 Approaches

4.5 Empirical approach

4.5.1 The statistical model

4.5.2 Logit models from Census data

4.6 Estimation results

4.6.1 Approach 1

4.6.2 Approach 2

4.7 Conclusions

4.A Appendix
