xi  

1  Introduction and brief overview  
1.1 Some background  
1.2 Scope of this book  

### PART ONE: MODELS OF BALANCED GROWTH  

2 Basic growth model with fixed labor supply  
2.1 A canonical model of a small open economy  
2.2 The endogenous growth model  
2.3 Equilibrium in one-good model  
2.4 Productive government expenditure  
2.5 Two immediate generalizations  

3 Basic growth model with endogenous labor supply  
3.1 Introduction  
3.2 The analytical framework: centrally planned economy  
3.3 Decentralized economy  
3.4 Fiscal shocks in the decentralized economy  
3.5 Optimal fiscal policy  
3.6 Conclusions  

### PART TWO: TRANSITIONAL DYNAMICS AND LONG-RUN GROWTH  

4 Transitional dynamics and endogenous growth in one-sector models  
4.1 Upward-sloping supply curve of debt
4.2 Comparison with basic model 84
4.3 Public and private capital 85
4.4 Role of public capital: conclusions 102
5 Two-sector growth models 104
5.1 Introduction 104
5.2 The model 107
5.3 Determination of macroeconomic equilibrium 111
5.4 Structural changes 124
5.5 Transitional dynamics 129
5.6 Conclusions 131
6 Non-scale growth models 133
6.1 Introduction 133
6.2 Small open economy 136
6.3 Aggregate dynamics 138
6.4 Upward-sloping supply curve of debt 144
6.5 Elastic labor supply 154
6.6 Conclusions 156
Appendix 157

PART THREE: FOREIGN AID, CAPITAL ACCUMULATION, AND ECONOMIC GROWTH 159
7 Basic model of foreign aid 161
7.1 Introduction 161
7.2 The analytical framework 165
7.3 Long-run effects of transfers and fiscal shocks 173
7.4 Optimal responses 175
7.5 Numerical analysis of transitional paths 176
7.6 Temporary transfers 186
7.7 Conclusions 195
8 Foreign aid, capital accumulation, and economic growth: some extensions 196
8.1 Generalization of model 196
8.2 Macroeconomic equilibrium 198
8.3 The dynamic effects of foreign aid: a numerical analysis 200
8.4 Sensitivity analysis 208
8.5 Consequences for the government fiscal balance 217
Contents

8.6 Conclusions 221
Appendix 222
