

# Management and Exchange of Animal Genetic Resources

– Nordic perspective

*Asko Mäki-Tanila, Morten Walløe Tvedt, Hans Ekström  
and Erling Fimland*

# Contents

Preface.....	7
Foreword from NordGen.....	9
Executive summary .....	11
Project description.....	15
I. Background for discussing regulatory options .....	19
Prospects of genetic diversity and breeding programmes in farm animals.....	20
Convention on Biological Diversity.....	26
Intellectual Property Rights.....	28
Coordination by FAO.....	29
Europe and EU.....	30
II. Nordic issues on animal genetic resources.....	33
Species and breeds .....	33
Breeding co-operatives.....	34
Health status and sound objectives.....	34
Nordic collaboration in breeding operations .....	35
The Future of Nordic Red Dairy Cattle.....	35
Nordic joint work on animal genetic resources .....	36
III. What lessons can be learnt from the regulation of plant breeding? .....	37
Outline of the International Treaty on Plant Genetic Resources for Food and Agriculture .....	37
Plant Breeder's Right – UPOV .....	39
The farm animal gene banks are within the breeding programmes .....	40
IV. Criteria for sustainable use of animal genetic resources.....	43
Collaboration over production chain.....	43
Analysis for breeding goals.....	43
Recording schemes .....	44
Avoiding genetic risks.....	44
Planned importation .....	45
Operative risks .....	45
Checklist for sustainable breeding schemes .....	46
V. Exchange of animal genetic resources.....	49
Active exchange.....	49
Gene flow from North to the South:.....	50

Animal health.....	51
Open comparison and good practices.....	51
Avoiding the risk of being accused of biopiracy.....	52
Ownership of animal genetic resources.....	53
Possible model agreement for exchange .....	55
VI. Patenting in animal breeding sector .....	57
Description of the tendencies in applying patents to the animal sector .....	57
Patentability for animal breeding techniques .....	63
Prior art for animal breeding methods.....	66
Novelty and inventiveness in animal breeding.....	66
The scope for exclusive right .....	67
Exemptions from the scope of patent protection .....	69
General observation on patent law applied to the animal sector .....	69
VII. Conclusions .....	71
References.....	75
Sammendrag.....	79
