Management of Technology and Innovation

Competing through Technological Excellence

SECOND EDITION

P.N. RASTOGI
Contents

List of Figures ix
Preface to the Second Edition xi
Preface to the First Edition xii

1. Technology as the Driving Force of Global Industrial Competition 1

Part One: Concepts and Themes

2. The Axes and Atlas of Technology 9
3. Strategic Management of Technology 18

Part Two: Manufacturing Technology

4. Productivity and Incremental Innovation 35
5. Technology Absorption 73
6. Structure of World Class Manufacturing 85
7. Crucial Issues in Flexible Technology 109
8. Strategic Evaluation of Technological Investments 120

Part Three: Technology Development

9. The Product Development Cycle—Integration of Design and Manufacturing 133
10. Management of Technological Innovation 148
11. Technology Fusion and the New R&D 168
12. Core Competencies in Technology and its Commercialization

Part Four: The Organizational Support System

13. Structural Imperatives of Technology Management
14. Building Organization Culture
15. The Organization as a Laboratory for Learning

Part Five: Cooperation between Government and Industry

16. Role, Rationale, and Requisites of a National Technology Policy
17. Coping with Continuous Change—The Structure of the Japanese Innovation System
18. Spectrum of Technological Excellence and Generation of Wealth
19. Prosperity of Companies and Countries—Is Social Capital the Missing Resource?

Appendix I Methods for Coping with Uncertainty in Technovation and New Product Development

Appendix II Some Useful Methods and Approaches
