BRIEF CONTENTS

PART I  Basic Economics Tools  1
Chapter 1  Introduction  2
Chapter 2  Microeconomic Tools for Health Economics  20
Chapter 3  Statistical Tools for Health Economics  48
Chapter 4  Economic Efficiency and Cost-Benefit Analysis  64

PART II  Supply and Demand  85
Chapter 5  Production of Health  86
Chapter 6  The Production, Cost, and Technology of Health Care  105
Chapter 7  Demand for Health Capital  128
Chapter 8  Demand and Supply of Health Insurance  143
Chapter 9  Consumer Choice and Demand  167

PART III  Information and Insurance Markets  189
Chapter 10  Asymmetric Information and Agency  190
Chapter 11  The Organization of Health Insurance Markets  204
Chapter 12  Managed Care  230
Chapter 13  Nonprofit Firms  258

PART IV  Key Players in the Health Care Sector  279
Chapter 14  Hospitals and Long-Term Care  280
Chapter 15  The Physician's Practice  299
Chapter 16  Health Care Labor Markets and Professional Training  317
Chapter 17  The Pharmaceutical Industry  342

PART V  Social Insurance  365
Chapter 18  Equity, Efficiency, and Need  366
Chapter 19  Government Intervention in Health Care Markets  389
Chapter 20  Government Regulation: Principal Regulatory Mechanisms  406
Chapter 21  Social Insurance  436
Chapter 22  Comparative Health Care Systems  467
Chapter 23  Health System Reform  493

PART VI  Special Topics  511
Chapter 24  The Health Economics of Bads  512
Chapter 25  Epidemiology and Economics: HIV/AIDS in Africa  530
## CONTENTS

*Preface*  xix

### Part I  Basic Economics Tools  1

#### Chapter 1  Introduction  2

- What Is Health Economics?  3
- The Relevance of Health Economics  4
  - The Size and Scope of the Health Economy  4
  - Health Care’s Share of GDP in the United States  5
  - Health Care Spending in Other Countries  6
  - Importance of the Health Economy in Personal Spending  7
  - Importance of Labor and Capital in the Health Economy  7
- Time—The Ultimate Resource  8
- The Importance Attached to Economic Problems of Health Care Delivery  9
- Inflation  10
- Access  10
- Quality  10
- The Economic Side to Other Health Issues  10

#### Economic Methods and Examples of Analysis  10

- Features of Economic Analysis  11
- Examples of Health Economics Analysis  11

#### Does Economics Apply to Health and Health Care?  12

- An Example: Does Price Matter?  13

#### Is Health Care Different?  14

- Presence and Extent of Uncertainty  14
- Prominence of Insurance  14
- Problems of Information  15
- Large Role of Nonprofit Firms  15
- Restrictions on Competition  15
- Role of Equity and Need  16
- Government Subsidies and Public Provision  16

#### Conclusions  16

- Summary  17  •  Discussion Questions  18  •  Exercises  18

#### Chapter 2  Microeconomic Tools for Health Economics  20

- Scarcity and the Production Possibilities Frontier  21
- Practice with Supply and Demand  24
  - The Demand Curve and Demand Shifters  24
  - The Supply Curve and Supply Shifters  25
- Equilibrium  25
- Comparative Statistics  26
Contents

Functions and Curves 27
  Linear Functions 27
  Demand Functions 27
  Derived Demand 29
Consumer Theory: Ideas Behind the Demand Curve 29
  Utility 29
  Indifference Curves 30
  Budget Constraints 31
  Consumer Equilibrium 32
Individual and Market Demands 33
Elasticities 34
  Production and Market Supply 35
    The Production Function 36
    Production Functions 37
  Isocost Curves 39
    Cost Minimization or Output Maximization 40
Marginal and Average Cost Curves 40
The Firm Supply Curve Under Perfect Competition 41
Monopoly and Other Market Structures 43
Welfare Losses 44
Conclusions 46

Chapter 3  Statistical Tools for Health Economics 48
  Hypothesis Testing 49
    Difference of Means 50
      The Variance of a Distribution 50
      Standard Error of the Mean 51
      Hypothesis and Inferences 52
  Regression Analysis 54
    Ordinary Least Squares (OLS) Regressions 55
    A Demand Regression 56
    Eliminating Elasticities 57
  Multiple Regression Analysis 58
    Interpreting Regression Coefficients 58
    Dummy Variables 60
  Statistical Inference in the Sciences and Social Sciences 61
Conclusions 61
  Summary 61 • Discussion Questions 62 • Exercises 62

Chapter 4  Economic Efficiency and Cost-Benefit Analysis 64
  Economic Efficiency 64
  Cost-Benefit Analysis: Background 67
  Cost-Benefit Analysis: Basic Principles 67
    Measuring Costs 68
Chapter 6 The Production, Cost, and Technology of Health Care 105

Production and the Possibilities for Substitution 106
Substitution 106
What Degree of Substitution Is Possible? 107
Elasticity of Substitution 108
Estimates for Hospital Care 109
Costs in Theory and Practice 109
Deriving the Cost Function 109
Cost Minimization 111
Economies of Scale and Scope 112
Why Would Economies of Scale and Scope Be Important? 113
Empirical Cost-Function Studies 114
Difficulties Faced by All Hospital Cost Studies 114
Modern Results 116
Summary: Empirical Cost Studies and Economies of Scale 116
Technical and Allocative Inefficiency 116
Technical Inefficiency 116
Allocative Inefficiency 117
Frontier Analysis 118
The Uses of Hospital Efficiency Studies 119
For-profit Versus Nonprofit Hospitals 120
Efficiency and Hospital Quality 120
Performance-Based Budgeting 120
Technological Changes and Costs 121
Technological Change: Cost Increasing or Decreasing? 121
Health Care Price Increases When Technological Change Occurs 122
Diffusion of New Health Care Technologies 123
Who Adopts and Why? 123
Other Factors That May Affect Adoption Rates 125
Diffusion of Technology and Managed Care 125
Conclusions 125
Summary 126 • Discussion Questions 126 • Exercises 127
Chapter 7  Demand for Health Capital  128
The Demand for Health  128
   The Consumer as Health Producer  128
   Time Spent Producing Health  129
Labor–Leisure Trade-Offs  130
   Trading Leisure for Wages  131
   Preferences Between Leisure and Income  131
The Investment/Consumption Aspects of Health  132
   Production of Healthy Days  132
   Production of Health and Home Goods  133
Investment over Time  134
   The Cost of Capital  134
The Demand for Health Capital  135
   Marginal Efficiency of Investment and Rate of Return  135
   The Decreasing $MEI$  135
Changes in Equilibrium: Age, Wage, Education, and Uncertainty  136
   Age  136
   Wage Rate  137
   Education  137
   Uncertainty  138
*Empirical Analyses Using Grossman’s Model  139
Conclusions  140
   Summary  141 • Discussion Questions  141 • Exercises  142

Chapter 8  Demand and Supply of Health Insurance  143
What Is Insurance?  143
   Insurance Versus Social Insurance  144
   Insurance Terminology  144
Risk and Insurance  145
   Expected Value  145
   Marginal Utility of Wealth and Risk Aversion  146
Purchasing Insurance  147
The Demand for Insurance  148
   How Much Insurance?  148
   Changes in Premiums  150
   Changes in Expected Loss  150
   Changes in Wealth  151
The Supply of Insurance  151
   Competition and Normal Profits  151
The Case of Moral Hazard  154
   Demand for Care and Moral Hazard  154
   Effects of Coinsurance and Deductibles  156
Health Insurance and the Efficient Allocation of Resources  157
   The Impact of Coinsurance  157
The Agency Relationship 197
  Agency and Health Care 197
Consumer Information, Prices, and Quality 197
  Consumer Information and Prices 198
  Consumer Information and Quality 199
Other Quality Indicators 200
Conclusions 201
  Summary 202 • Discussion Questions 203 • Exercises 203

Chapter 11 The Organization of Health Insurance Markets 204
  Loading Costs and the Behavior of Insurance Firms 204
  Impacts of Loading Costs 205
  Insurance for Heart Attacks and Hangnails 206
  Loading Costs and the Uninsured 206
  Employer Provision of Health Insurance: Who Pays? 206
    Spousal Coverage: Who Pays? 209
    How the Tax System Influences Health Insurance Demand 209
    Who Pays the Compensating Differentials?—Empirical Tests 211
    Other Impacts of Employer Provision of Health Insurance 212
  Employer-Based Health Insurance and Labor Supply 213
    Health Insurance and Retirement 213
    Health Insurance and Mobility 213
  The Market for Insurance 215
    The Market for Private Insurance 215
    Insurance Practices 215
    The Past 30 Years 217
  The Uninsured: An Analytical Framework 218
    The Working Uninsured 222
    The Impacts of Mandated Coverage 223
  Technological Change, Higher Costs, and Inflation 225
    The Cost-Increasing Bias Hypothesis 225
    Goddeeris's Model—Innovative Change over Time 225
    Evidence on Technological Change and Inflation 227
Conclusions 227
  Summary 228 • Discussion Questions 228 • Exercises 229

Chapter 12 Managed Care 230
  What Is the Organizational Structure? 231
  What Are the Economic Characteristics? 232
  The Emergence of Managed Care Plans 233
    Employer-Sponsored Managed Care 234
    Medicaid Managed Care Plans 235
    Managed Care Contracts with Physicians 235
    Managed Care Contracts with Hospitals 236
Contents xi

Development and Growth of Managed Care—Why Did It Take So Long? 237
Federal Policy and the Growth of Managed Care 238
The Economics of Managed Care 239
Modeling Managed Care 239
Modeling Individual HMOs 240
How Much Care? 240
What Types of Care? 241
Framework for Prediction 242
Where Managed Care Differs from FFS—Dumping, Creaming, and Skimping 242
Equilibrium and Adverse Selection in a Market with HMOs 243
How Does Managed Care Differ?—Empirical Results 244
Methodological Issues—Selection Bias and Quality of Care 245
Comparative Utilization and Costs 245
The RAND Study—A Randomized Experiment 246
The Most Recent Evidence 247
Growth in Spending 248
Competitive Effects 250
Theoretical Issues 250
Managed Care Competition in Hospital Markets 251
Managed Care Competition in Insurance Markets 252
Managed Care and Technological Change 253
The Managed Care Backlash 253
Conclusions 255
Summary 255 • Discussion Questions 256 • Exercises 257

Chapter 13 Nonprofit Firms 258
An Introduction to Nonprofits 258
Why Nonprofits Exist and Why They Are Prevalent in Health Care 259
Nonprofits as Providers of Unmet Demands for Public Goods 259
The Public Good—Private Good Aspect of Donations 260
Relevance to Health Care Markets 262
Nonprofits as a Response to Contract Failure 262
Applications of Contract Failure to Nursing Home Care 263
Relevance of Contract Failure to Hospitals and Other Firms 263
Financial Matters and the Nonprofit 264
Summary of the Reasons for the Prevalence of Nonprofits 264
Models of Nonprofit Hospital Behavior 264
The Quality–Quantity Nonprofit Theory 264
The Profit-Deviating Nonprofit Hospital 266
The Hospital as a Physicians’ Cooperative 267
Maximizing Net Revenue per Physician 268
A Comparison of the Quantity-Quality and the Physicians' Cooperative Theories 268
The Evidence: Do Nonprofit Hospitals Differ from For-Profit Hospitals? 270
Summary of Models of Hospital Behavior 273
What Causes Conversion of Nonprofits into For-Profits? 273
The Relative Efficiency of Nonprofits Versus For-Profits 274
Property Rights Theory and Its Application to Nonprofits 274
Are Nonprofit Health Care Firms Less Efficient?—Hospitals and Nursing Home Studies 275
Conclusions 277
Summary 277 • Discussion Questions 278 • Exercises 278

Part IV Key Players in the Health Care Sector 279

Chapter 14 Hospitals and Long-Term Care 280
Background and Overview of Hospitals 280
History 281
Organization 282
Regulation and Accreditation 283
Hospital Utilization and Costs 283
Competition and Costs 284
Closures, Mergers, and Restructuring 288
Quality of Care 290
Nursing Homes 291
Background and Costs 291
Quality of Care 291
Excess Demand 292
Financing Long-Term Care 294
Hospice, Home Health, and Informal Care 295
Conclusions 296
Summary 297 • Discussion Questions 297 • Exercises 298

Chapter 15 The Physician’s Practice 299
A Benchmark Model of the Physician’s Practice 300
Do Physicians Respond to Financial Incentives? 302
Physician Agency and Supplier-Induced Demand 302
Modeling Supplier-Induced Demand 303
The Target Income Hypothesis 303
The Benchmark Model as a Synthesis 305
The Parallel Between Inducement and Marketing 306
What Do the Data Say About Supplier-Induced Demand? 306
Physician Fees, Fee Tests, and Fee Controls 307
Diffusion of Information and Small Area Variations 308
Contributions to These Variations 309
The Physician Practice Style Hypothesis 309
Chapter 16 Health Care Labor Markets and Professional Training 317

The Demand for and Supply of Health Care Labor 317
- Production Functions and Isoquants 318
- Marginal Productivity of Labor 319
- Factor Substitution and Labor Demand 320
- The Supply of Labor 320

Factor Productivity and Substitution Among Factors 322
- Measurement of Physician Productivity 322
- The Efficient Utilization of Physician Assistants: Substitution Among Inputs 322

Health Manpower Availability and the Meaning of Shortages 323
- Availability of Physicians 324
- Economic Definitions of Shortages of Health Professionals 325
- The Role of Monopsony Power: Shortages of Registered Nurses 328

Medical Education Issues and the Question of Control 330
- Sources of Medical School Revenues 330
- Capital Market Imperfections Justify Subsidies 330
- Teaching Hospitals, Medical Schools, and Joint Production 331
- Foreign Medical School Graduates 332
- The Control of Medical Education 332
- Control over Entry 333
- Another View: The Donor Preference Hypothesis 334

Licensure and Monopoly Rents 334
- Public Interest or Self-Interest 335
- Licensure and Quality 336

Other Physician Labor Issues 337
- Specialization 338
- Physician Income by Gender 338

Conclusions 339
- Summary 340 • Discussion Questions 341 • Exercises 341

Chapter 17 The Pharmaceutical Industry 342

Structure and Regulation 344
- Competition 344
- Barriers to Entry 345
- Regulation 346
Part V Social Insurance 365

Chapter 18 Equity, Efficiency, and Need 366

Efficiency and Competitive Markets 367
The Concept of Pareto Efficiency (Optimality) 367
Trading Along the Budget Line 368
The Competitive Equilibrium 369
The First Fundamental Theorem of Welfare Economics 369
Redistribution of the Endowment 370
Price Discrimination 371
Trade-offs Between Equity and Efficiency 371

Deviations from the Competitive Model in the Health Care Sector 372
The Assumptions Under Perfect Competition 372
Promoting Competition in the Health Care Sector 373
The Theorem of the Second Best 373
An Economic Efficiency Rationale for Social Health Insurance 374

Need and Need-Based Distributions 375
Health Care Needs and the Social Welfare Function 376
Norman Daniels’s Concept of Health Care Need 380
Economic Criticisms of Need-Based Distributions 381
Horizontal Equity and Need 381
Chapter 19  Government Intervention in Health Care Markets  389

Economic Rationale for Government Intervention  389
  Monopoly Power  390
  Public Goods  391
  Externalities  393
  Other Rationales for Government Intervention  393

Forms of Government Intervention  394
  Commodity Taxes and Subsidies  394
  Public Provision  395
  Transfer Programs  395
  Regulation  396

Government Involvement in Health Care Markets  396
  Support of Hospitals  397
  The Hill-Burton Act  397
  The Veterans Administration and CHAMPUS  397
  Food and Drug Administration  398
  Mandated Health Insurance Benefits  398
  Tax Policy  398
  Public Health  398
  Other Government Programs  399

Government Failure  399
  Who Does the Regulator Represent?  401
  Bureaucracy and Efficiency  402

Conclusions  404
  Summary  404  •  Discussion Questions  405  •  Exercises  405

Chapter 20  Government Regulation: Principal Regulatory Mechanisms  406

Do the Laws of Supply and Demand Apply?  406

Objectives of Regulation  408
  Regulatory Policy  408
  Regulatory Instruments in Health Care  408

Regulation of the Hospital Sector  409
  Empirical Findings on Regulation  409

Prospective Payment  413
  Description of PPS  413
Chapter 21 Social Insurance 436
Social Insurance and Social Programs 436
Program Features 437
Historical Roots of Social Insurance 438
European Beginnings 438
Early Experience in the United States 439
The Establishment of Medicare and Medicaid 439
Medicare and Medicaid in the United States 441
Medicare 441
Part D Prescription Drug Insurance 442
Medicaid 445
Medicaid Eligibility 446
The Medicaid-Medicare Relationship 449
Medicare and Medicaid: Conflicting Incentives for Long-Term Care 449
State Children’s Health Insurance Program 450
Public Insurance and Health 451
The Effects of Medicare and Medicaid 454
Costs and Inflation 454
Health Status 459
Medicare: Recent Changes and Future Prospects 459
Criticisms of the U.S. Health Care System 462
Conclusions 464
Summary 465 • Discussion Questions 465 • Exercises 465

Chapter 22 Comparative Health Care Systems 467
Contemporary Health Care Systems 467
A Typology of Contemporary Health Care Systems 467
National Health Programs: United Kingdom and Germany  468
  The United Kingdom: The National Health Service  470
  Germany  473
The Canadian Health Care System  477
  Background  477
  Physician Fees and Quantity  479
  Why Are Fees and Hospital Costs Lower in Canada?  480
  Administrative Costs  480
  A Comparison  482
Different Systems: The Public's Evaluation  485
Differences in Health Care Spending Across Countries  488
  A Model of Health Expenditure Sales  488
Conclusions  490
  Summary  491 • Discussion Questions  492 • Exercises  492

Chapter 23 Health System Reform  493
Goals of Reform  493
  Basic Issues in Reform  495
  The Costs of Universal Coverage  495
Ensuring Access to Care  496
  Employer Versus Individual Mandates  496
  Separation of Health Insurance from Employment  497
  Single Payer Versus Multiple Insurers  497
Competitive Strategies  498
  Development of Alternative Delivery Systems  499
  Consumer-Drive Health Plans and Health Savings Accounts  499
Other Market Reforms  501
  Representation of the Competitive Approach  502
Health System Reform and International Competitiveness  503
Conclusions  508
  Summary  508 • Discussion Questions  509 • Exercises  510

Part VI Special Topics  511

Chapter 24 The Health Economics of Bads  512
An Introduction to Bads  513
Models of Addiction  515
  Imperfectly Rational Addiction Models  515
  Myopic Addiction Models  515
  Rational Addiction  515
Rationales for Public Intervention  518
Other Interventions  518
