CHAPTER 1 MEASURING CONSUMER
PREFERENCES AND ESTIMATING
DEMAND SYSTEMS 1

William A. Barnett and Apostolos Serletis

CHAPTER 7  EASI MADE EASIER

Krishna Pendakur

1. Introduction 180
2. An extended example 181
3. The EASI demand system 185
4. EASI estimation 186
   4.1. Approximate models 188
   4.2. Iterated linear estimation 188
   4.3. Instrumental variables estimation 189
   4.4. Imposing symmetry with linear system estimation 190
5. EASI extensions 191
6. EASI-to-use 192
7. Conclusions 194
References 194
Appendix. STATA code 195

CHAPTER 8  COST OF LIVING INDEXES AND EXACT INDEX NUMBERS

W. Erwin Diewert

1. Introduction 208
2. Koni's true cost of living indexes 209
3. The true cost of living index when preferences are homothetic 215
4. Wold's identity and Shephard's lemma 218
5. Superlative indexes I: The Fisher ideal index 219
6. Superlative indexes II: Quadratic mean of order r indexes 223
7. Superlative indexes III: Normalized quadratic indexes 227
8. Nonhomothetic preferences and cost of living indexes 233
9. Allen quantity indexes 239
10. Conclusion 242
Acknowledgment 242
References 242

CHAPTER 9  THE REVEALED PREFERENCE APPROACH TO DEMAND

Laurens Cherchye, Ian Crawford,
Bram De Rock and Frederic Vermeulen

1. Introduction 248
2. The basic model: GARP 250
   2.1. Testing 250
   2.2. Recoverability 253
3. Empirical issues 256
   3.1. Goodness-of-fit 256
   3.2. Power 258
   3.3. Measurement error 261
4. Some extensions of the basic model
   4.1. Characteristics model
   4.2. Habit formation
   4.3. Collective model
5. Conclusion
   Acknowledgments
   References
   Appendix

CHAPTER 10 DEVELOPMENTS IN NONPARAMETRIC DEMAND ANALYSIS: HETEROGENEITY AND NONPARAMETRICS
Stefan Hoderlein

1. Introduction
2. Models and literature
3. Linear models in a heterogeneous population – nonparametric estimation of the density of random coefficients
4. Nonlinear models in a heterogeneous population – the implications for testing rationality restrictions
5. Nonparametric tests of rationality restrictions
6. Conclusion
   References

CHAPTER 11 MODELLING INTERNATIONAL TOURIST ARRIVALS AND VOLATILITY: AN APPLICATION TO TAIWAN
Chia-Lin Chang, Michael McAleer and Daniel J. Slottje

1. Introduction
2. Data
3. Unit root tests
4. Conditional mean and conditional volatility models
5. Estimated models and discussion
6. Concluding remarks
   Acknowledgments
   References

CHAPTER 12 ESTIMATING THE DEMAND FOR QUALITY WITH DISCRETE CHOICE MODELS
Daniel J. Phaneuf and Roger H. von Haefen

1. Introduction
2. Conceptual basis
   2.1. Assumptions
   2.2. Models for micro data
CHAPTER 13 THE CONSTRUCTION AND ESTIMATION OF EQUIVALENCE SCALES AND THEIR USES

Carsten Schröder

1. Introduction
2. Econometric approach
3. The survey approach
4. Applications
   4.1. Inequality and poverty
   4.2. Income taxation
   4.3. Indexing social security payments
   4.4. Insurance economics
   4.5. Psychological and medical studies
5. Conclusion
References

CHAPTER 14 THE USE OF RESTRICTED REGRESSIONS IN ESTIMATING DEMAND SYSTEMS

Joseph G. Hirschberg, Jeanette N. Lye and Daniel J. Slottje

1. Introduction
2. The two forms of restrictions
   2.1. LFUP to ROP ($R\beta = r \rightarrow (\beta = A\gamma + d)$)
   2.2. ROP to LFUP ($\beta = A\gamma + d \rightarrow R\beta = r$)
   2.3. Computational aspects of the restricted parameter estimates and the conversion of restricted forms
3. Example applications
   3.1. The reparameterization in the case of restricted demand equations
   3.2. The combination of both linear restrictions and reparameterizations
4. Conclusion
References
4. A test of linear restrictions using the reparameterized model 376
5. Conclusions 376
Acknowledgment 377
References 377
Appendix A. The derivation of the ROP from the LFUP
\[(R\beta = r \rightarrow \beta = A\gamma + d)\] 379
Appendix B. The derivation of the LFUP from the ROP
\[(\beta = A\gamma + d \rightarrow R\beta = r)\] 380
