INCENTIVE EFFECTS OF PERFORMANCE-VESTED STOCK OPTIONS

Proefschrift

ter verkrijging van de graad van doctor aan de Universiteit van Tilburg, op gezag van de rector magnificus, prof.dr. F.A. van der Duyn Schouten, in het openbaar te verdedigen ten overstaan van een door het college voor promoties aangewezen commissie in de aula van de Universiteit op dinsdag 30 oktober 2007 om 16.15 uur door

Yu Kuang

geboren op 5 september 1977 te Jiangxi, China
# Table of Contents

**CHAPTER 1: INTRODUCTION**

1.1 **BACKGROUND** ........................................................................................................ 1

1.2 **OVERVIEW AND OUTLINE** ....................................................................................... 4

1.3 **MULTIPLE PERSPECTIVES ON COMPENSATION** ......................................................... 6

1.4 **REFERENCES** .............................................................................................................. 9

**CHAPTER 2: PERFORMANCE-VESTED STOCK OPTIONS AND INTEREST ALIGNMENT**

2.1 **INTRODUCTION** .......................................................................................................... 12

2.2 **HYPOTHESIS DEVELOPMENT** .................................................................................... 15

2.2.1 **Compensating managers with PVSOs** ................................................................ 15

2.2.2 **Target difficulty in PVSOs** ..................................................................................... 16

2.3 **METHODOLOGY** .......................................................................................................... 18

2.3.1 **Measuring compensation and firm performance** ..................................................... 18

2.3.2 **Measuring the presence of PVSO and TSO, and vesting target difficulty** ............... 20

2.3.3 **Control variables** .................................................................................................... 23

2.3.4 **Empirical models** .................................................................................................... 24

2.4 **SAMPLE SELECTION AND DATA SOURCES** .............................................................. 26

2.5 **EMPIRICAL ANALYSIS** ................................................................................................ 28

2.5.1 **Descriptive statistics** ............................................................................................... 28

2.5.2 **Main results** ............................................................................................................ 36

2.5.2.1 **PPS and PVSO compensation** ............................................................................ 39

2.5.2.2 **Pay-performance sensitivity and PVSO target difficulty** .................................... 42

2.6 **ROBUSTNESS TESTS** ................................................................................................ 44

2.6.1 **Alternative explanation** ......................................................................................... 45

2.6.2 **Validity tests** .......................................................................................................... 47

2.6.2.1 **Alternative model specifications and performance measures** ............................ 47
