### Part I. Pricing of Carbon in Europe

1. Carbon-Energy Taxation, Revenue Recycling, and Competitiveness  
   *Mikael Skou Andersen*  
   1.1. Introduction  
   1.2. The Porter hypothesis on the relationship between environmental regulation and competitiveness  
   1.3. The double dividend debate  
   1.4. What kind of efficiency are we talking about?  
   1.5. Conventional indicators of competitiveness  
   1.6. The need to account for technology and innovation  
   1.7. Coverage of the book  
   3

2. Design of Environmental Tax Reforms in Europe  
   *Stefan Speck and Jirina Jilkova*  
   2.1. Introduction  
   2.2. Denmark  
   2.3. Finland  
   2.4. Germany  
   2.5. The Netherlands  
   2.6. Slovenia  
   2.7. Sweden  
   2.8. UK  
   2.9. Conclusions  
   24
Part II. Industry-Sector Competitiveness

   John Fitz Gerald, Mary J. Keeney, and Susan Scott
   3.1. Introduction 55
   3.2. Context 56
   3.3. Literature review and price-setting model 59
   3.4. Data 62
   3.5. Results 63
   3.6. Discussion of results by sector 63
   3.7. Implications 70
   3.8. Summary and conclusions 74

4. Trends in the Competitiveness of Selected Industrial Sectors in ETR Countries 77
   Roger Salmons and Alexandra Miltner
   4.1. Introduction 77
   4.2. Theoretical assessment of competitiveness indicators 79
   4.3. Empirical assessment of competitiveness trends 89
   4.4. Conclusions 96

5. The Impact of Energy Taxes on Competitiveness: A Panel Regression Study of 56 European Industry Sectors 100
   Martin K. Enevoldsen, Anders Ryelund, and Mikael Skou Andersen
   5.1. Introduction 100
   5.2. Modelling the Porter effects associated with energy taxes 102
   5.3. Data and method 104
   5.4. The relation between energy taxes, competitiveness, and output 108
   5.5. Interpretation of results 113
   5.6. Conclusions 117

6. Energy-Intensive Industries: Approaches to Mitigation and Compensation 120
   Mikael Skou Andersen and Stefan Speck
   6.1. Introduction 120
   6.2. Ex-ante mitigation: tax-base modifications and reductions in tax rates 121
| Contents |
|-----------------|-------|
| 6.3. Ex-post compensation: revenue recycling approach | 129 |
| 6.4. Winners and losers in ETR | 130 |
| 6.5. Conclusions | 140 |

### Part III. Country Competitiveness and Carbon Leakage

7. The Effects of Environmental Tax Reform on International Competitiveness in the European Union: Modelling with E3ME
   *Terry Barker, Sudhir Junankar, Hector Pollitt, and Philip Summerton*
   - 7.1. Introduction | 147
   - 7.2. Modelling the EU Energy-Environment-Economy System with E3ME | 151
   - 7.3. Processing the COMETR tax data | 167
   - 7.4. Scenarios specified to model ETR | 177
   - 7.5. Estimation of competitiveness effects | 179
   - 7.6. The effects of selected ETRs, using E3ME, 1995–2012 | 180

   *Terry Barker, Sudhir Junankar, Hector Pollitt, and Philip Summerton*
   - 8.1. Introduction | 215
   - 8.2. The literature on carbon leakage | 216
   - 8.3. Modelling carbon leakage | 222
   - 8.4. Description of ETR policies and carbon leakage scenarios | 227
   - 8.5. Results | 230
   - 8.6. Conclusions | 236

### Part IV. Implications for Future Climate Policy

   *Paul Ekins*
   - 9.1. Introduction | 241
   - 9.2. Emissions trading | 242
   - 9.3. Competitiveness implications of emissions trading | 243
