1 Summary of Technology Transfer

1.1 Definition of Technology Transfer

1.1.1 Basic Meaning of Technology

1.1.2 Establishment and Evolution in the Definition of Technology

1.1.3 Discriminate Correlative Definition of Technology Transfer

1.1.3.1 Technology Innovation

1.1.3.2 Technology Diffusion

1.1.3.3 Technology Spillover

1.1.3.4 Inherent Relationship of Correlated Concept

1.2 Manner and Effect Factors of Technology Transfer

1.2.1 Basic Form of Technology Transfer—Technology Flow

1.2.1.1 Components of Technology Flow

1.2.1.2 Features of Technology Flow

1.2.1.3 Channels of Technology Flow

1.2.2 Ways of Technology Transfer

1.2.2.1 FDI

1.2.2.2 Sale of Technology

1.2.2.3 License Transaction

1.2.2.4 Coproduction and Cooperative Research

1.2.2.5 Technology Assistance

1.2.2.6 Turnkey
1.2.3 Influencing Factors of Technology Transfer

| 1.2.3.1 | Law and Policy Factors | 16 |
| 1.2.3.2 | Market Factors | 17 |
| 1.2.3.3 | Technology Basis | 17 |
| 1.2.3.4 | Infrastructure Status | 18 |

1.3 Main Features of Technology Transfer

| 1.3.1 | Characteristics of Contemporary International Technology Transfer |
| 1.3.1.1 | Structure Upgrade of International Transfer Technology | 18 |
| 1.3.1.2 | Multipolarization of International Technology Transfer Supply | 19 |
| 1.3.1.3 | Development of Technology Transfer from Monodirection to Bidirection | 19 |
| 1.3.1.4 | Transfer Technology, an Important Dynamic Move to Promote Economic Development | 20 |

1.3.2 Features of Technology Transfer in China in Different Periods

| 1.3.2.1 | Period of Imitation (1949–1959) | 21 |
| 1.3.2.2 | Fumbling Period (1959–1978) | 22 |
| 1.3.2.3 | Stage of Internalization of Development (1978–1992) | 23 |
| 1.3.2.4 | Opening-Round Stage (1992–) | 24 |

2 Technology Transfer and Its Mechanism, Characteristics, Effects, and Models

| 2.1 | Mechanism of Technology Transfer |
| 2.1.1 | Local Potential Difference Determines the Direction of Technology Transfer | 28 |
| 2.1.2 | Determination of Feature in Technology Transfer Elements by Margin of Interest | 28 |
| 2.1.3 | Technology Elements Are the Carriers of Technology Transfer | 29 |
| 2.1.4 | Principle of Energy Increase in Technology Transfer | 29 |
| 2.1.5 | Technology Transfer Has a Two-Way Network Trend | 31 |
| 2.1.6 | Technology Transfer Shows a Positive Link to Technology Level | 32 |
| 2.1.7 | Technology Transfer Is Influenced and Constrained by Many Factors | 32 |

| 2.2 | Technology Transfer Properties |
| 2.2.1 | Direction in Transfer | 36 |
| 2.2.2 | Stages in Transfer | 36 |
| 2.2.3 | Difficulties in Transfer | 37 |
2.2.4 “Space Division” in Transfer ............................................. 37
2.2.5 Regional Agglomeration of Transfer ................................. 38

2.3 Effects of Technology Transfer .......................................... 38
2.3.1 Associated Effect ...................................................... 38
2.3.2 Multiplier Effect ....................................................... 40
2.3.3 Coupling Effect ......................................................... 40
2.3.4 Integration Effect ....................................................... 41
2.3.5 Polarization Effect ..................................................... 41
2.3.6 Equilibrium Effect ..................................................... 42
2.3.7 Spillover Effect ........................................................ 42

2.4 Model of Technology Transfer ........................................... 43
2.4.1 Divided by the Actionable Mechanism ............................... 43
  2.4.1.1 Market-Guided Control Transfer .............................. 43
  2.4.1.2 Plan-Guided Control Transfer ................................ 44
2.4.2 Divided by the Span of Transfer .................................... 44
  2.4.2.1 Vertical Transfer .................................................. 45
  2.4.2.2 Horizontal Transfer .............................................. 45
2.4.3 Division by the Vector of Transfer ................................ 45
  2.4.3.1 Transfer of Physical Elements ............................... 45
  2.4.3.2 Transfer of Information ........................................ 46
  2.4.3.3 Transfer of Capability ......................................... 46
2.4.4 Division by Absorption and Processing ............................. 46
  2.4.4.1 Simple Transfer .................................................. 46
  2.4.4.2 Absorption Transfer ............................................ 46
2.4.5 Spatial Model of Technology Transfer .............................. 47
  2.4.5.1 Types of Spatial Transfer and Its Disciplines ................ 47
  2.4.5.2 Case Study: Spatial Pattern of Technology Transfer in Zhujiang Delta Region .............................. 48

3 Dynamic Mechanism and Measurement of Technology Transfer ....... 49
3.1 Constituents of the Technology Transfer System ...................... 49
  3.1.1 Hierarchical Structure of the Technology Transfer System .......... 49
  3.1.2 Basic Composition of the Technology Transfer System ............ 51
    3.1.2.1 Source of Technology Transfer ................................ 51
    3.1.2.2 Object of Transfer ............................................ 51
    3.1.2.3 Sink of Transfer ................................................ 52
    3.1.2.4 Information Channel ........................................... 52
    3.1.2.5 Auxiliary System ............................................... 52
    3.1.2.6 Incentive Mechanism ......................................... 53
    3.1.2.7 Internal Environment of Technology Transfer .................. 53
3.2 Dynamic Mechanism of Technology Transfer System
3.2.1 Analysis of the Technology Transfer Affecting Factors
3.2.1.1 Technology Potential
3.2.1.2 Space Distance
3.2.1.3 Transfer Channel
3.2.2 Constituents of the Dynamic Mechanism of Technology Transfer
3.2.3 Force of Technology Transfer System
3.2.3.1 Attraction of Transfer Sink for Technology
3.2.3.2 Impetus for Technology Transfer of the Sink
3.2.3.3 Resistance of Technical Transfer Field
3.2.3.4 Gravitation of Technical Transfer Field
3.3 Imitation of Technical Innovation and Transfer Model in Two Regions
3.3.1 Assumptions
3.3.2 Imitation Model of Technical Innovation in Two Regions
3.3.2.1 Market Clearing Conditions in Two Regions
3.3.2.2 Relation between the Imitation Rate and Innovation Rate
3.4 Measurement of Technology Transfer
3.4.1 Model of Technology Transfer
3.4.2 Empirical Study on Technology Transfer in China
3.4.2.1 Data Specification
3.4.2.2 Results of Calculations
3.4.2.3 Analysis of Results
4 Cost and Benefit of Technology Transfer
4.1 Cost of Technology Transfer
4.1.1 Connotation of Cost
4.1.2 Factors That Affect the Cost of Technology Transfer
4.1.2.1 Asymmetric Information
4.1.2.2 Financial Benefit
4.1.2.3 Supply and Demand
4.1.3 Classification of Technology Transfer Cost
4.1.3.1 Direction of Technology Transfer
4.1.3.2 Factors of Technology Transfer
4.1.3.3 Willingness in Technology Transfer
4.1.3.4 Nature of Technology Transfer
4.1.3.5 Participants of Technology Transfer
4.1.4 Nature of Technology Transfer
4.1.4.1 Typical Irreversible Investments Partly Belonging to Capital Cost
4.1.4.2 Cost Variation in Different Domains and Aspects ............................................. 83
4.1.4.3 Technology Transfer Cost and Nonlinear Variation of Benefit ............................................. 83
4.1.4.4 Nature of Shift in Technology Transfer Cost .......................................................... 83

4.2 Benefits of Technology Transfer ......................................................................................... 84
4.2.1 Connotation of Benefit .................................................................................................. 84
4.2.2 Technology Transfer Benefit ....................................................................................... 84
4.2.3 Relation between Technology Transfer Cost and Its Benefit ........................................ 85

4.3 Measurement of Technology Transfer Cost and Benefit .................................................... 86
4.3.1 Measurement of Technology Talent Transfer .................................................................. 87
4.3.1.1 Cost Evaluation Model of Technology Talents .............................................................. 88
4.3.1.2 Enterprise-Based Cost Measurement Model ................................................................. 89
4.3.1.3 Example Study ............................................................................................................ 90
4.3.2 Measurement of the Cost of Production Technology Transfer ........................................ 92
4.3.2.1 Factors That Affect the Transfer Cost ........................................................................... 92
4.3.2.2 Transfer Cost Estimation Model for Transferors ........................................................ 94
4.3.2.3 Measurement Model of the Transfer Cost for the Transferees ................................... 95
4.3.2.4 Case Study .................................................................................................................. 96
4.3.3 Measurement of Benefit in Technology Talent Transfer .................................................. 96
4.3.3.1 Benefit of Technology Talent Transfer ...................................................................... 96
4.3.3.2 Measurement Model of the Benefit in Technology Talent Transfer .......................... 97
4.3.4 Measurement of Benefit in Production Technology Transfer .......................................... 98
4.3.4.1 Benefit of Production Technology Transfer ............................................................... 98
4.3.4.2 Measurement of Production Technology Transfer ..................................................... 99

5 Technology Transfer Analysis Based on Technical Diffusion Field Theory ................................ 101
5.1 Technical Diffusion Field Statement .................................................................................. 101
5.1.1 Technical Diffusion Field .............................................................................................. 101
5.1.2 Technical Diffusion Process ......................................................................................... 102
5.1.2.1 Plan and Choice ......................................................................................................... 102
5.1.2.2 Digestion and Absorption ........................................................................................ 103

7 Technology Transfer Optimization and Disposition ........................................ 149

7.1 Linear Programming Model of Technology Transfer of Unipolar City Based on the Perfect Mechanism ........................................ 149

7.1.1 Several Important Concepts ......................................................... 150
  7.1.1.1 Technology Transfer and Technology Elements Transfer ................. 150
  7.1.1.2 Perfect Mechanism of Technology Elements Transfer ..................... 151
  7.1.1.3 Competitive and Noncompetitive Technology Elements .................... 151
  7.1.1.4 Technology Transfer in a Unipolar City ...................................... 152

7.1.2 Linear Programming Model of Technology Transfer of a Unipolar City Based on the Perfect Mechanism ........................................ 152
  7.1.2.1 Objective Analysis .............................................................. 152
  7.1.2.2 Identification of Constraints .................................................. 153

7.1.3 Study of the Properties of the Linear Programming Model of Technology Transfer of a Unipolar City Based on Perfect Mechanism ...................... 155

7.1.4 Case Study .................................................................................... 159
  7.1.4.1 Linear Programming Model for Noncompetitive Resource ............... 159
  7.1.4.2 Linear Programming Model for Competitive Resource .................... 161

7.2 Linear Programming Model of Technology Transfer of Unipolar City Based on the Perfect Mechanism ........................................ 161

7.2.1 Linear Programming Model of Technology Transfer of Multipolar City Based on the Perfect Mechanism ........................................ 161
  7.2.1.1 Objective Analysis .............................................................. 161
  7.2.1.2 Constraint Conditions ........................................................... 163

7.2.2 Study of the Properties of the Model of Multiobjective Programming of Technology Transfer Based on the Perfect Mechanism ...................... 164

7.2.3 Case Study .................................................................................... 168
  7.2.3.1 Interpretation of Data .............................................................. 168
  7.2.3.2 Calculation Results ............................................................... 168
  7.2.3.3 Analysis of the Results ........................................................... 170

7.3 Measurement Model of Government Matching Funds Based on Maximum Social Benefits ................................................................. 171

7.3.1 Government Investment and Planning Model in Technology Introduction ................................................................. 171
7.3.1.1 Regional Production Function Model .................. 171
7.3.1.2 Target Analysis ........................................ 172
7.3.1.3 Constraint Conditions Recognition .................. 173
7.3.1.4 Optimization Model of the Government
Investment in Technology Introduction .................. 174
7.3.2 Study of the Properties of the Optimization Model of
Government Investment in Technology Introduction ...... 175
7.3.3 Break-Even Analysis of the Government Investment
Model in Technology Introduction ......................... 178
  7.3.3.1 Production Function .................................. 179
  7.3.3.2 Break-Even Analysis with Consideration
          of Production Function ................................. 180
7.3.4 Case Study ................................................ 183
  7.3.4.1 Government Investment and Planning
         Model in Technology Introduction .................. 183
  7.3.4.2 Result Analysis ........................................ 185

8 Game Strategy Analysis on Technology Transfer and Technology
Innovation ................................................................... 187
8.1 Game Model and Strategy Analysis of Technology Innovation .... 187
  8.1.1 Static Game Analysis with Complete Information
      on Duopoly Enterprise's Technology Innovation ........ 188
        8.1.1.1 Construction of the Game Model ............... 188
        8.1.1.2 Solution and Analysis of Game Model .......... 189
        8.1.1.3 Numerical Analysis .............................. 195
  8.1.2 Dynamic Game Analysis of Complete Information
      Theory of Technology Innovation ........................ 197
        8.1.2.1 Game Model of Enterprises 1 and 2 with
                Equal Technical Content after Innovation .... 197
        8.1.2.2 Game Model of Enterprises 1 and 2 with
                Different Technical Content after Innovation ... 202
8.2 Game Model of Technology Transfer and Stable Strategy .......... 207
  8.2.1 Game Model and Stable Strategy of Technical
      Innovation of Fixed Payment Model .................... 207
        8.2.1.1 Construction of Game Model .................... 207
        8.2.1.2 Solution and Analysis of Game Model .......... 207
        8.2.1.3 Best Technical Content Analysis of
                Enterprise Production After Independent
                Technology Innovation ............................. 210
        8.2.1.4 Numerical Analysis .............................. 211
  8.2.2 Game Model and Stable Strategy of Technology
      Innovation while Paying according to a Certain
      Percentage of Total Profit ................................ 213
8.2.2.1 Modeling and Analysis ........................................... 213
8.2.2.2 Numerical Analysis ........................................... 216
8.3 Game Model of Technical Diffusion and Its Stable Strategy
Analysis ........................................................................... 217
  8.3.1 Single Monopoly of Innovator ................................ 218
  8.3.2 Another Company Entering the Market ......................... 219
  8.3.3 N Enterprises Entering the Market ............................ 224
  8.3.4 Numerical Analysis ............................................. 225
    8.3.4.1 Comparison of Profits in Different Stages
     of Enterprise 1 .................................................. 225
    8.3.4.2 Analysis on Gross Profit ............................... 227
8.4 Game Model of Technical Spillover and Its Stable Strategy
Analysis ........................................................................... 228
  8.4.1 Construction and Analysis of the Model ....................... 228
  8.4.2 Numerical Analysis ............................................. 230
8.5 Evolutionary Game Model of Technical Innovation
and Its Strategy Analysis ................................................ 232
  8.5.1 Construction of the Model ................................... 233
  8.5.2 Case Study ........................................................ 235
  8.5.3 Results Analysis ................................................ 236
9 Comprehensive Measurement of Technology Transfer
and the Analysis of Its Impact on Economic Growth ............... 237
  9.1 Comprehensive Measure of Technology Transfer ............... 238
    9.1.1 International Technology Transfer Measurement .......... 238
    9.1.2 Technology Transfer Indicators of Measurement
     in China .............................................................. 240
    9.1.3 Indicators Analysis of Measurement in Technology
     Transfer .............................................................. 240
      9.1.3.1 FDI Technology Spillover ............................ 240
      9.1.3.2 Introduction of Foreign Technology (JSYJ) ....... 241
      9.1.3.3 High-Tech Product Imports (GJSJK) ............... 243
      9.1.3.4 Foreign Economic Cooperation (DWJJHZ) ....... 244
      9.1.3.5 High-Tech Exports (GJSCK) ........................ 246
      9.1.3.6 Technology Market Turnover ........................ 247
      9.1.3.7 Soft Technology Spillover in the
       Knowledge-based Service Sector (Z) .................. 249
    9.1.4 Chinese Technology Transfer Degrees ...................... 254
  9.2 Empirical Analyses in Technology Transfer and Economic
Growth in China ................................................................ 256
    9.2.1 Technology Transfer and Economic Growth Theory ....... 256
    9.2.2 Demonstration Test ......................................... 259
9.3 Technology Spillover Effects of FDI and Its Relationship with the Growth of Chinese Economy .................................................262

9.3.1 Characteristics of FDI Introduced by China .......................262

9.3.2 Analysis of the Technology Spillover Effects in FDI ..........263

9.3.3 Empirical Test of FDI Technology Spillover Effects ....... 266

9.3.4 FDI and Its Technology Spillover Effects and China's Economic Growth .................................................................274
