

Five Essays in Energy Economics

Dissertation for the Faculty of Economics, Business Administration and Information Technology of the University of Zurich

to achieve the title of
Doctor of Economics

presented by

Boris B. Krey
from Braunschweig / Germany

approved at the request of

Prof. Dr. Peter Zweifel
Prof. Dr. Reinhard Madlener

Contents

<i>Preface</i>	<i>iii</i>
1 Introduction	1
2 Efficient and Secure Power for the United States and Switzerland	7
2.1 Introduction	7
2.2 Literature review	8
2.3 Methodology	11
2.3.1 Real asset portfolio estimation	11
2.3.2 Seemingly unrelated regression estimation (SURE)	14
2.3.3 Shannon-Wiener index	15
2.3.4 Herfindahl-Hirschman index	16
2.4 Efficient U.S. and Swiss power generation frontiers in 2003	16
2.4.1 The data	16
2.4.2 Actual mix of power generation as of 2003	19
2.4.3 SURE results for the United States and Switzerland	19
2.4.4 Efficient power generation frontiers	21
2.4.4.1 Efficient frontiers for the United States	21
2.4.4.2 Efficient frontiers for Switzerland	25
2.4.4.3 Comparing efficient power frontiers: a tale of two countries	27
2.4.5 Supply security	28
2.4.5.1 Supply security for the United States	28
2.4.5.2 Supply security for Switzerland	30
2.5 Conclusions	31
References	33
3 Efficient Electricity Portfolios for the United States and Switzerland: An Investor View	37
3.1 Introduction	37
3.2 Review of the literature	39
3.3 Portfolio theory	42
3.4 Econometric analysis	45
3.4.1 Seemingly unrelated regression estimation (SURE)	45
3.4.2 The data	47
3.4.3 Current U.S. and Swiss generation portfolios	49
3.5 Efficient frontiers for U.S. and Swiss power generation	50
3.5.1 Time series analysis	50
3.5.1.1 Preliminary testing	50
3.5.1.2 Seemingly unrelated regression estimation (SURE) results	50
3.5.2 Construction of efficient electricity portfolios	52
3.5.2.1 Current (2003) efficient electricity portfolios for the United States	53
3.5.2.2 Current (2003) efficient electricity portfolios for Switzerland	55
3.5.2.3 United States and Switzerland compared	57

3.6 Conclusions	58
References	60
Appendix	62
4 <i>The Impact of Liberalization on the Scope of Efficiency Improvement in Electricity-Generating Portfolios for the United States and Switzerland</i>	67
4.1 Introduction	67
4.2 Background information	68
4.2.1 United States	68
4.2.2 Switzerland	69
4.3 Methodology	69
4.3.1 Portfolio theory	69
4.3.2 Seemingly unrelated regression estimation (SURE)	73
4.3.3 Data	74
4.4 Efficient U.S. and Swiss electricity-generating frontiers	74
4.4.1 Efficiency frontier for the United States: Investor view	74
4.4.2 Efficiency frontier for Switzerland: Investor view	75
4.4.3 United States and Switzerland compared: Investor view	77
4.4.4 Efficiency frontier for the United States: Current user view	77
4.4.5 Efficiency frontier for Switzerland: Current user view	78
4.4.6 United States and Switzerland compared: Current user view	79
4.5 Conclusions	80
References	81
5 <i>Scope of Electricity Efficiency Improvement in Switzerland until 2035</i>	85
5.1 Introduction	85
5.2 Measuring multiple electricity-generating technology portfolios	86
5.2.1 Markowitz mean-variance portfolio theory	88
5.2.2 Efficiency frontier	89
5.2.3 Measures of return-to-risk	91
5.3 Econometric analysis	91
5.3.1 Seemingly unrelated regression estimation (SURE)	92
5.3.2 Measures of supply security	93
5.4 The data	93
5.5 Portfolio estimation and discussion	94
5.5.1 Preliminary testing and SURE results	95
5.5.2 Efficient portfolio shares for different scenarios using SURE	97
5.5.2.1 Scenario SI: No constraints imposed	98
5.5.2.2 Scenario SII: No nuclear and gas, restricted shares for hydro power	100
5.5.2.3 Scenario SIII: Restricted shares for nuclear, hydro power, and new-renewables	101
5.5.3 Comparing OLS-based portfolios with SURE in scenario SIII	103
5.6 Concluding comments	104
References	105
Appendix	108
6 <i>Russian Gas to Western Europe: A Game-theoretic Analysis</i>	113
6.1 Introduction	113
6.2 The Eurasian gas chain	114

6.2.1 Historical development of transport routes	114
6.2.2 Russia	115
6.2.3 Ukraine	116
6.2.4 Belarus	117
6.3 The model	117
6.3.1 The cooperative module	118
6.3.2 The non-cooperative module	120
6.4 Data and results	123
6.4.1 Results for the cooperative module	124
6.4.1.1 Postdictions for 2004	124
6.4.1.2 Predictions for 2010	126
6.4.1.3 Predictions for 2030	127
6.4.2 Results for the non-cooperative module	128
6.4.2.1 Postdictions for 2004	129
6.4.2.2 Predictions for 2010	131
6.4.2.3 Predictions for 2030	132
6.4.2.4 Strategy analysis	135
6.5 Summary and conclusion	136
References	137
Internet sources	139
Appendix	140
7 Conclusions	141
